APPENDICES

APPENDIX A Proposed Site Layout

APPENDIX B Swept Path Analysis

APPENDIX C ATC Data

1. Introduction

1.1 Overview

1.1.1 This Delivery and Servicing Plan (DSP) has been prepared by mode transport planning (mode) on behalf of Royal UK Property Holdings LLP (the Applicant) to support the planning application associated with the proposed redevelopment of Plots 1 and 2, Longwalk Road, Uxbridge, within the administrative boundary of the London Borough of Hillingdon (LBH).

1.1.2 The site is located within Stockley Park, an established managed employment area recognised as a Locally Significant Employment Location (LSEL) within the LBH's Local Plan. The site is accessed via Longwalk Road, which bounds the site to the east and forms the internal spine road of Stockley Park. Longwalk Road is accessed from the A408 Stockley Road (to the west) via Bennetsfield Road, which bounds the site to the north, whilst additional units bound the site to the south.

1.1.3 The site currently comprises two office buildings with a total Gross Internal Area (GIA) of 12,267sqm and circa 380 car parking spaces. The two units are situated in the north west corner of the wider Stockley Park, adjacent to the Stockley Park access.

1.1.4 The development proposals comprise the redevelopment of both existing units to flexible industrial, storage and distribution uses (Use Classes B2/B8/E(g)(iii)), with ancillary office space, comprising a total GIA of 11,006sqm (6,052sqm for Unit 100 / 4,954sqm for Unit 200).

1.1.5 Access for vehicles, pedestrians and cyclists will remain via Longwalk Road, though parking provision will be reduced and reconfigured across the site, considering relevant standards, guidance and future operational requirements.

1.1.6 The proposed site layout is presented in Appendix A.

1.2 Purpose of the Document

1.2.1 The purpose of the DSP is to ensure that all delivery and servicing operations associated with the site are facilitated in a cohesive, safe, efficient and sustainable manner. The document has been prepared in accordance with the best practice guidance across national and local policies.

1.2.2 This DSP identifies the following aspects in relation to the future site operation:

- Types of servicing vehicles accessing the site;
- On-site servicing arrangements;
- Frequency and timing of servicing activity;
- Proposed service vehicle routing; and

- On-site management mechanisms to ensure efficient and safe servicing activity occurs at the site.

1.2.3 The DSP will remain a live document that will evolve over time to ensure that objectives are met in the most appropriate manner.

1.2.4 The DSP should be read in conjunction with the Healthy Streets Transport Assessment (HSTA), Framework Travel Plan (FTP), Construction and Logistics Plan (CLP) and Car Park Management Plan (CPMP) that have also been prepared and submitted as part of the planning application.

1.3 Report Structure

1.3.1 The remainder of this report is structured under the following chapter headings:

- Chapter 2: Policy and Good Practice Guidance.
- Chapter 3: Local Context.
- Chapter 4: Delivery and Servicing Strategy.
- Chapter 5: Measures and Initiatives.
- Chapter 6: Monitoring and Review.

2. Policy and Good Practice Guidance

2.1 National Policy

2.1.1 The National Planning Policy Framework (NPPF) sets out the Government's planning policies for England and includes specific requirements relevant to the movement of goods and servicing activity.

2.1.2 Policy E3, *Freight and Logistics*, states that development proposals for freight and logistics uses and associated infrastructure should have good access to transport networks appropriate to the type of development and provide sufficient and secure parking for lorries and other vehicles to cater for the anticipated use.

2.1.3 Policy E3 further states that such proposals should be sited and designed to minimise environmental impacts, ensuring that impacts on local residents and neighbouring uses remain acceptable and consider any proposed mitigation measures, particularly where night-time operations are required. Sufficient and secure parking should also be provided for lorries and other vehicles to accommodate the anticipated operational requirements.

2.1.4 Policy TR4 further requires development proposals to allow for the efficient delivery of goods and safe access by service and emergency vehicles.

2.1.5 These requirements are of particular relevance to the proposed B2/B8/Class E(g)(iii) uses and have informed the site access, servicing, vehicle routing and management arrangements set out within this DSP.

2.2 The London Plan (2021)

2.2.1 The London Plan (2021) provides the spatial development strategy for Greater London and forms part of the statutory Development Plan.

2.2.2 Policy T7, *Deliveries, Servicing and Construction*, requires development proposals to facilitate safe, clean and efficient deliveries and servicing. Adequate provision should be made for servicing, storage and deliveries off-street, with Delivery and Servicing Plans prepared having regard to Transport for London guidance and the scale and complexity of the development.

2.2.3 The policy also encourages development to be designed and managed so that deliveries can take place outside the busiest periods where appropriate.

2.2.4 In response to these requirements, the proposed development provides dedicated off-street servicing areas within the site, together with a managed delivery and servicing strategy intended to minimise conflict with other site users and the surrounding highway network.

2.3 London Borough of Hillingdon Local Plan Part 2

2.3.1 The London Borough of Hillingdon Local Plan Part 2 includes detailed policies relating to highway impacts, servicing and freight movements.

2.3.2 Policy DMT 2 requires development proposals to provide safe and efficient vehicular access to the highway network and minimise impacts on congestion, local amenity and highway safety. Of particular relevance to servicing activity, traffic should be routed by the most direct means towards the strategic road network where appropriate.

2.3.3 Policy DMT 7 relates specifically to freight-generating development and requires proposals associated with logistics, distribution and other freight-intensive uses to demonstrate that they are conveniently located to enable direct routing to the strategic road network and do not result in unacceptable impacts on residential areas, local amenity, air quality or the highway network.

2.3.4 The location of the site close to the A408 Stockley Road and wider Strategic Road Network, together with the servicing and routing arrangements set out within this DSP, has therefore informed the proposed strategy.

2.4 Fleet Operator Recognition Scheme (FORS)

2.4.1 FORS is an industry-led, membership (bronze, silver, gold) scheme to help van and lorry operators become safer, more efficient and more environmentally friendly. FORS aims to assist businesses in improving operator safety, fuel efficiency, economical operations and vehicle emissions. The FORS standards will be relayed to all operators engaged during the development and operation of the site.

2.5 Good Practice Guidance

2.5.1 Regard has also been given to the Department for Transport's Quiet Deliveries Good Practice Guidance, which promotes the efficient management of delivery activity through measures including appropriate scheduling, communication with drivers and site operatives, minimisation of unnecessary vehicle waiting and idling, and the reduction of noise associated with servicing activity.

2.5.2 The principles of this guidance have informed the operational measures set out within Chapter 5 of this DSP.

3. Local Context

3.1 Overview

3.1.1 This chapter sets out the site location in relation to its wider surroundings, and a summary of the existing road network and local highway network within the vicinity of the site, including the Transport for London Road Network (TLRN) and the Strategic Road Network (SRN).

3.2 Site Context

3.2.1 The site is located within the north western corner of Stockley Park, an established business park approximately 2.5km southwest of Uxbridge. The wider estate accommodates a range of employment uses together with ancillary facilities including retail, leisure and hotel uses.

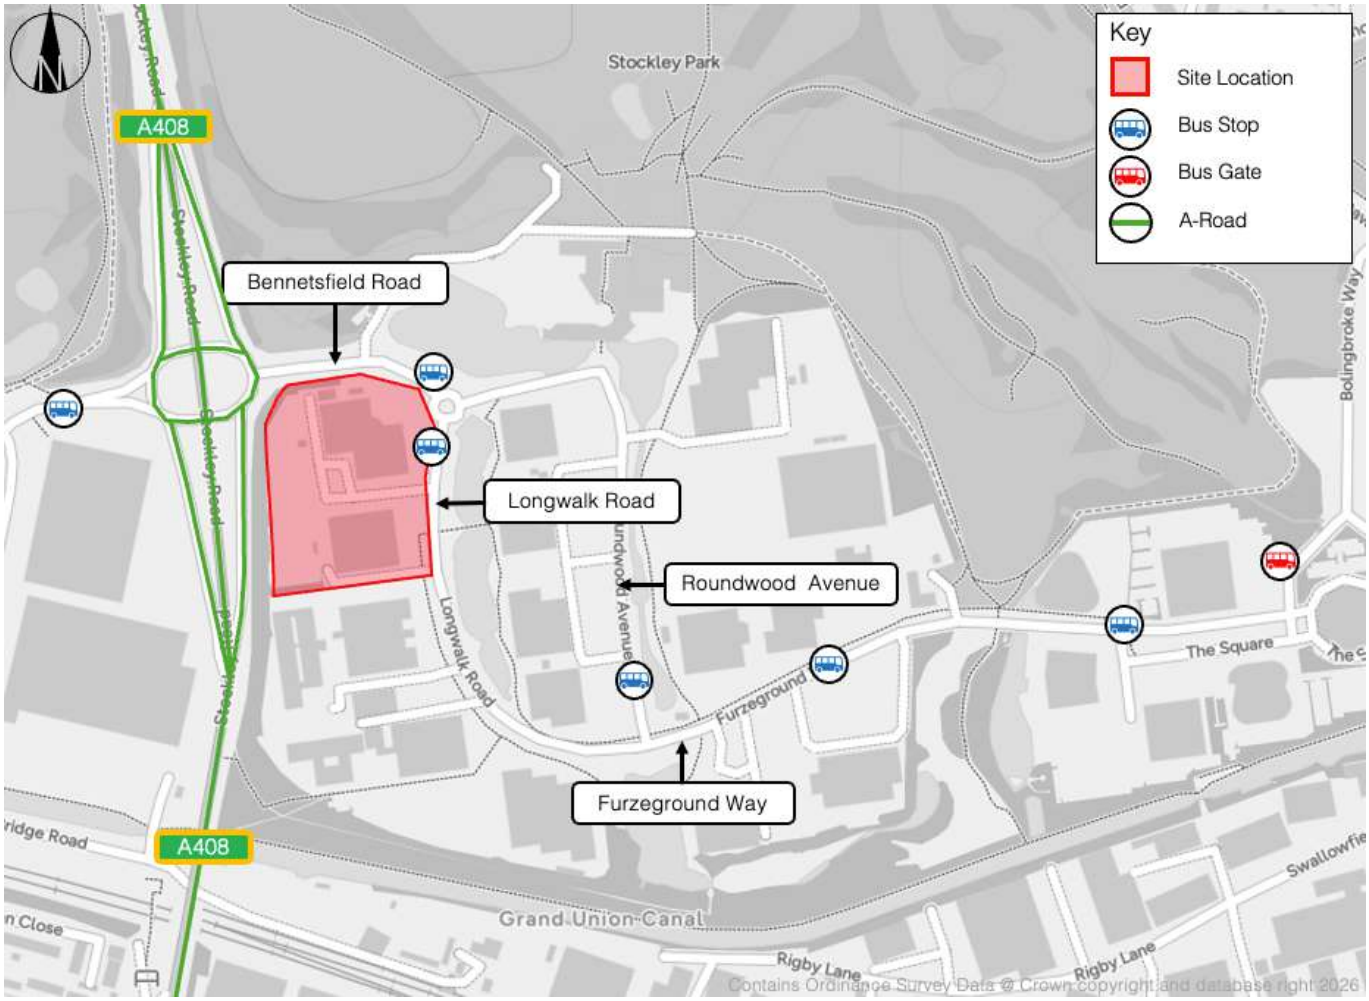
3.2.2 The site is bounded by Bennetsfield Road to the north, Longwalk Road to the east and the A408 Stockley Road to the west, with further employment uses located to the south.

3.2.3 Stockley Park operates as a managed business park, with established estate management arrangements governing vehicle access, parking and movement within the internal road network. The proposed development will operate within these wider estate management arrangements.

3.2.4 Vehicular access to the site is provided from Longwalk Road. The site occupies a particularly accessible position within the estate, immediately adjacent to the principal Stockley Park entrance from Bennetsfield Road. As such, delivery and servicing vehicles associated with the development will not ordinarily need to travel through the wider internal road network of Stockley Park to access the site.

3.2.5 A site location plan is provided in Figure 3.1.

Figure 3.1 Site Location Plan



3.3 Local Highway Network

3.3.1 The site benefits from close proximity to the strategic highway network, with access to the A408 Stockley Road provided via Longwalk Road and Bennetsfield Road.

3.3.2 Bennetsfield Road forms the principal vehicular access into Stockley Park from the A408 Stockley Road. It is a dual carriageway road subject to a 20mph speed limit and provides direct access to Longwalk Road and the development site.

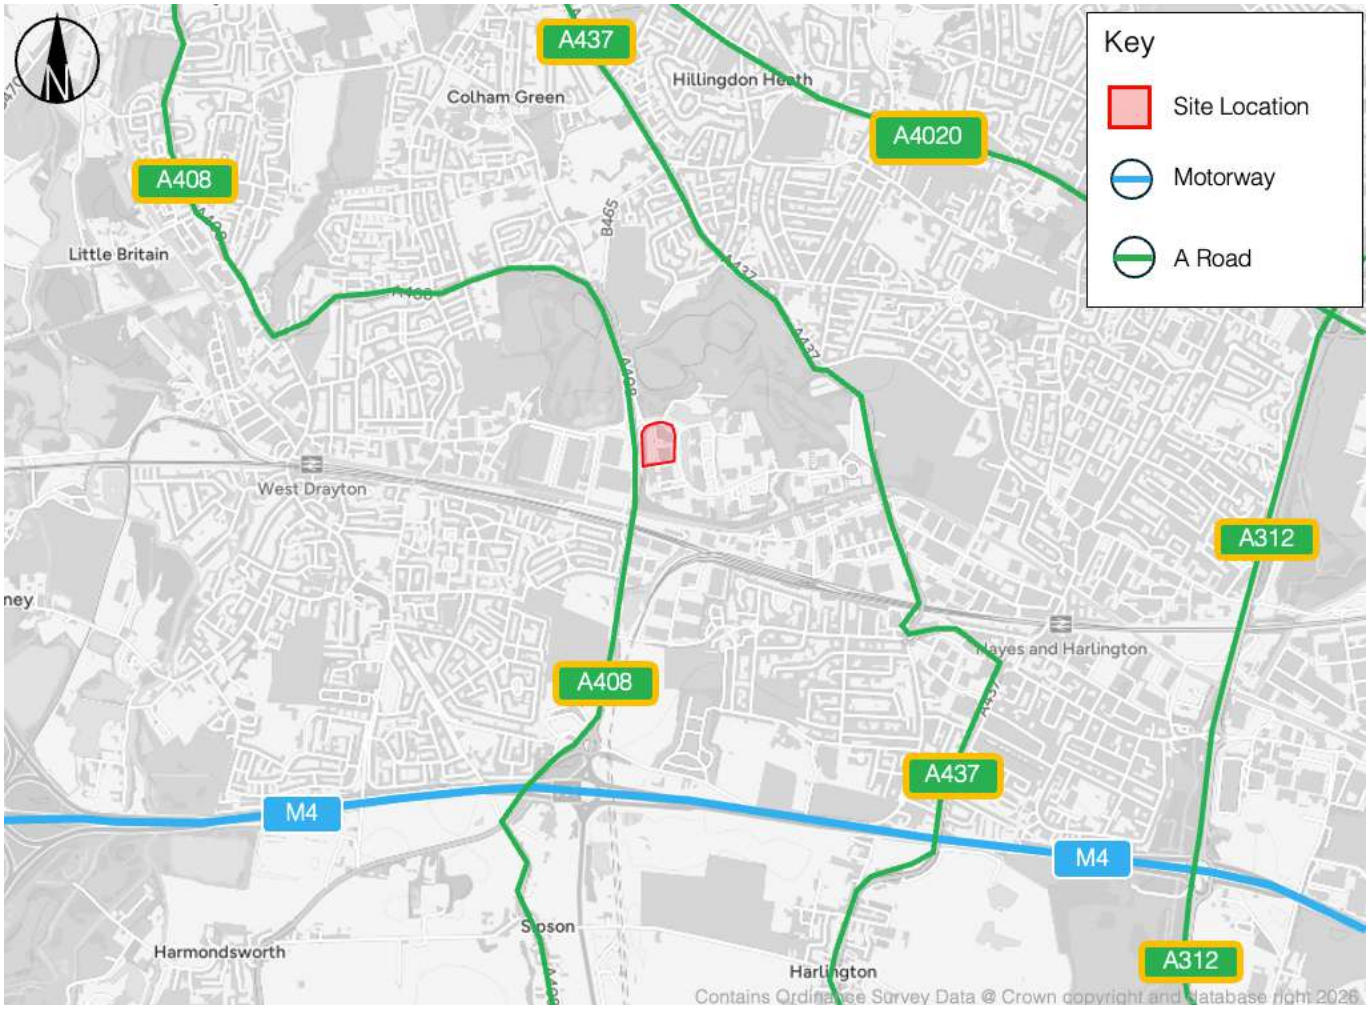
3.3.3 Longwalk Road forms the principal internal road through Stockley Park and provides direct access to the site. The internal road network is designed to accommodate commercial traffic associated with the established employment uses within the estate.

3.3.4 A secondary access to Stockley Park is provided to the east from the A437 Dawley Road, however, this is restricted by a bus gate and is not available to general vehicular traffic. Accordingly, delivery and servicing vehicles associated with the development will access and egress Stockley Park via Bennetsfield Road and the A408 Stockley Road.

3.3.5 The A408 Stockley Road is a dual carriageway located immediately west of Stockley Park and provides the principal connection between the site and the wider strategic highway network. The A408 Stockley Road provides onward connectivity towards the M4 to the south, with the M4 providing east-west connections towards London and the wider motorway network, including the M25.

3.3.6 The relationship of the site to the local and strategic highway network is shown in Figure 3.2.

Figure 3.2 Local and Strategic Highway Network



3.4 Summary

3.4.1 The site is located within an established managed employment location and benefits from direct access to the A408 Stockley Road and onward connections to the M4 and wider SRN.

3.4.2 Importantly, the site is located immediately adjacent to the principal entrance to Stockley Park. Delivery and servicing vehicles can therefore access the development directly from Bennetsfield Road and Longwalk Road without ordinarily travelling through the wider internal estate road network.

3.4.3 On this basis, the site is considered to be well located to accommodate the delivery and servicing requirements associated with the proposed development.

4. Delivery and Servicing Strategy

4.1 Overview

4.1.1 This chapter sets out the proposed delivery and servicing strategy for the development, including the site access arrangements, servicing provision, vehicle routing, anticipated servicing trip generation and waste collection arrangements.

4.2 Development Proposals

4.2.1 The development proposals comprise the redevelopment of the site to provide two flexible industrial, storage and distribution units within Use Classes B2, B8 and Class E(g)(iii), together with ancillary office accommodation, parking, servicing yards, landscaping and associated works.

4.2.2 The proposed development will provide a total GIA of 11,006sqm, comprising:

- Unit 100 – 6,052sqm GIA; and
- Unit 200 – 4,954sqm GIA.

4.2.3 Each unit will be provided with a dedicated rear service yard incorporating loading bays and sufficient space for delivery and servicing vehicles to manoeuvre within the site.

4.2.4 An extract of the site layout is shown in Figure 4.1, with the proposed site layout also provided in Appendix A.

Figure 4.1 Proposed Site Layout

4.3 Access Arrangements

4.3.1 Access to the site will remain from Longwalk Road, with the two existing access points being retained. A central spine road will run between the two units from the northern access, facilitating access to the rear service yards, in addition to the parking area fronting Unit 100. The southern access will continue to provide direct access into the parking associated with Unit 200.

4.3.2 It is important to note that Unit 100 and Unit 200 are the first units accessible from the Stockley Park entrance, and as such, vehicles will be able to access the site without the need to travel through the wider Stockley Park road network. This will reduce the impact of the development proposals on the other units within Stockley Park.

4.3.3 Swept path analysis has been undertaken to assess whether a 16.5m articulated vehicle can safely access and egress the northern access in forward gear. As shown in mode drawing J32-8841-AT-A02 (attached in Appendix B), the northern site access can accommodate two-way HGV movement (inclusive of a 300mm buffer), without impeding existing vegetation, landscaping and pedestrian infrastructure at the access.

4.4 Servicing Arrangements

4.4.1 Delivery/servicing bays will be provided to meet the operational requirements of each of the units. A total of eight loading bays will be provided at the rear of Unit 100, whilst seven loading bays will be provided at the rear of Unit 200.

Figure 4.2 Delivery/Servicing Bays

4.4.2 All loading and unloading activity will therefore take place within the site, with no requirement for delivery or servicing vehicles to load or unload from Longwalk Road or the wider Stockley Park road network.

4.4.3 Swept path analysis has been undertaken to ensure that the largest vehicle anticipated to access the site (a 16.5m articulated vehicle) can safely manoeuvre into, and park within, the rear service yards. The outputs are presented in mode drawing J32-8841-AT-A03, A04, A05 and A06, included within Appendix B, and demonstrate that HGVs can access the service yard and servicing bays suitably with a 300mm buffer.

4.4.4 It is important to note that when considering servicing activity associated with the development proposals, Unit 100 and Unit 200 are the closest units to the Stockley Park entrance. As such, vehicles associated with the servicing of the site will not route through the wider Stockley Park to access the site. As noted previously, there is no through access to the southeast of Stockley Park, and so servicing vehicles will route to the site via the A408 Stockley Road.

4.4.5 Notwithstanding the above, in response to comments received from LBH during pre-application discussions, additional swept path analysis has also been undertaken to consider the scenario whereby a 16.5m articulated vehicle inadvertently passes the site access and continues into the wider Stockley Park road network.

4.4.6 The analysis (included in mode drawing J32-8841-AT-A12 and A13 in Appendix B) demonstrates that should a vehicle continue through the internal road network, it will be able to route back towards the site through Stockley Park. This represents a robustness test rather than the intended servicing route, with drivers to be provided with appropriate routing and arrival information prior to visiting the site. Furthermore, this scenario is unlikely to occur in practice, with access monitored from a security lodge located at the main entrance to the estate, where drivers will be stopped and asked to sign in before being directed towards the correct unit within Stockley Park.

4.5 Servicing Strategy

4.5.1 Delivery and servicing activity will be undertaken within the dedicated service yards associated with each unit.

4.5.2 The general servicing process will comprise the following:

1. Delivery and servicing vehicles will approach the site via the approved/preferred route and enter via the northern access from Longwalk Road.
2. Vehicles will proceed to the service yard associated with the relevant unit and manoeuvre into an appropriate loading bay.
3. Following completion of loading or unloading activity, vehicles will leave the service yard and exit the site onto Longwalk Road in forward gear.

4.5.3 It is anticipated that most of the servicing activity will occur during daytime periods. Future occupiers will seek, where reasonably practicable, to schedule routine servicing activity outside the identified network peak periods.

4.6 Vehicle Routing

4.6.1 Delivery and servicing vehicles will access and egress the development via Longwalk Road and Bennetsfield Road, which provides direct connectivity to the A408 Stockley Road via Stockley Park Roundabout.

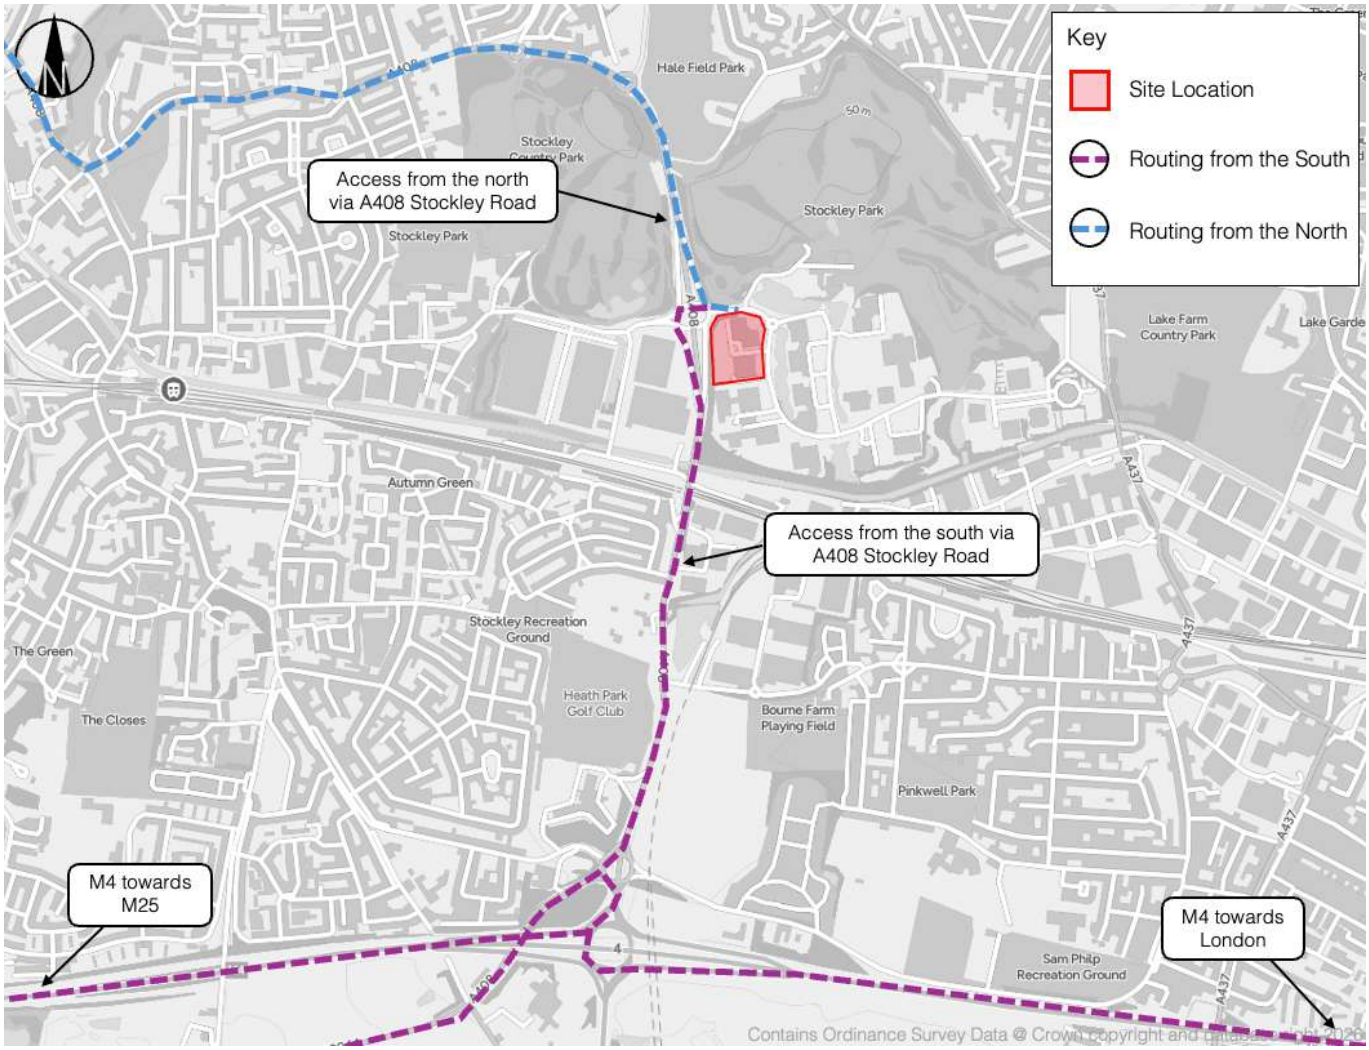
4.6.2 The A408 Stockley Road provides the principal connection from the site towards the SRN, including the M4 to the south. The M4 provides onward east-west connectivity and access to the M25 for wider north-south movements.

4.6.3 Delivery and servicing vehicles will be directed towards the most appropriate higher-order road network having regard to their origin and destination and any applicable vehicle restrictions, including the London Lorry Control Scheme.

4.6.4 Drivers will be provided with appropriate routing and arrival information prior to visiting the site to minimise unnecessary circulation through the wider Stockley Park estate and surrounding local road network.

4.6.5 The proposed delivery and servicing routing strategy is illustrated on Figure 4.3.

Figure 4.3 Proposed Delivery and Servicing Routing



4.7 Servicing Trip Generation

4.7.1 This section provides a review of the baseline HGV movements recorded on Bennetsfield Road and Longwalk Road and compares these movements against the anticipated servicing and delivery vehicle movements associated with the development proposals.

4.7.2 This section should be read in conjunction with the HSTA, which is submitted alongside this DSP.

Baseline Vehicle Movements

4.7.3 To establish baseline vehicle movements at Stockley Park, an Automatic Traffic Count (ATC) survey was undertaken within the park in February 2026. ATCs were located on Bennetsfield Road and Longwalk Road, with the Longwalk Road ATC located between the existing two access points, which are being retained as part of the development proposals.

4.7.4 As part of the ATC survey, the existing HGV movements were recorded, with the 5-day average for the peak periods and daily period summarised in Table 4.1. The raw outputs of the ATC are presented in Appendix C.

Table 4.1 Existing Two-Way Vehicle Movements (5-day average)

Time	Total Vehicles	HGVs	
		Total	%
Bennetsfield Road (Stockley Park Access)			
Daily (24-Hour)	2,251	372	17%
Longwalk Road (Adjacent to Proposed Development)			
Daily (24-Hour)	819	177	22%

4.7.5 As demonstrated in Table 4.1, Stockley Park is noted to have several existing HGV movements, making up between 17-22% of daily traffic. On this basis, HGVs are already noted to serve Stockley Park, and therefore, the existing road surfacing is suitable.

Future Trip Generation

4.7.6 It is anticipated that there will be 98 two-way HGV movements associated with the proposed development across a daily period.

4.7.7 The forecast HGV movements comprise a range of goods vehicle types, with analysis of the TRICS data indicating that approximately 32% of HGV movements comprise OGV1 vehicles, with the remaining 68% comprising OGV2 vehicles.

4.7.8 OGV2 represents a broad category of larger goods vehicles and does not exclusively comprise 16.5m articulated vehicles. Accordingly, only a proportion of the forecast OGV2 movements would be expected to comprise 16.5m articulated vehicles.

4.7.9 The forecast HGV movements have also been considered in the context of existing HGV activity recorded on Bennetsfield Road and Longwalk Road, as shown in Table 4.2. This demonstrates that the proposed development would result in a relatively modest increase in HGV activity when considered against the existing level of commercial vehicle movements on the surrounding road network.

Table 4.2 Existing and Proposed HGV Movement Comparison (Two-Way Daily Movements)

Time	Baseline HGV Flows (Bennetsfield Road)	Baseline HGV Flows (Longwalk Road)	Proposed HGV Flows
07:00-08:00	21	12	6
08:00-09:00	24	13	6
09:00-10:00	21	16	9
10:00-11:00	26	14	10
11:00-12:00	22	9	8
12:00-13:00	20	9	11
13:00-14:00	17	9	11
14:00-15:00	19	9	6
15:00-16:00	24	12	6
16:00-17:00	24	13	5
17:00-18:00	22	10	6
18:00-19:00	20	8	5
19:00-20:00	12	7	6
20:00-21:00	13	3	3
Total	**285**	**144**	**98**

4.7.10 As shown in Table 4.2, the typical level of HGV activity associated with the development proposals ranges between approximately three and 11 two-way HGV movements per hour. There is a maximum of 11 two-way HGV movements between 12:00-13:00 and 13:00-14:00, which equates to a HGV movement every five to six minutes. This is not considered to be a material addition to the network, given the existing commercial environment of the wider Stockley Park site and level of HGVs already travelling on its internal road network.

4.7.11 Furthermore, as the development proposals comprise the two units that are closest to the Stockley Park entrance, HGVs would not need to route through Stockley Park to access the site and therefore the impact of HGV movements is likely to be minimal. Given that Stockley Park is already carrying HGV traffic, the increase in HGV movements as a result of the development proposals is unlikely to cause detrimental impacts to the road network within Stockley Park, including the existing road surfacing.

4.7.12 On this basis, and having regard to the location of the site, proposed servicing provision and direct connectivity towards the SRN, the anticipated servicing activity is considered capable of being safely and satisfactorily accommodated.

4.8 Refuse Collection

4.8.1 Dedicated refuse storage facilities will be provided within the rear service areas associated with Units 100 and 200.

4.8.2 Refuse collection arrangements will be coordinated by the future occupiers in liaison with the Stockley Park Estates Team, having regard to the wider waste management arrangements operating across the estate.

4.8.3 Refuse collection activity will take place within the site and will be coordinated with other servicing activity where necessary to minimise potential conflict within the service yards.

4.8.4 Swept path analysis has been undertaken to demonstrate that the anticipated refuse collection vehicle can safely access, manoeuvre within and exit the site. The relevant swept path analysis is provided at Appendix B.

5. Measures and Initiatives

5.1 Overview

5.1.1 This chapter sets out the measures and initiatives that will be implemented to support the safe and efficient management of delivery and servicing activity associated with the development.

5.1.2 The development is located within Stockley Park, which operates as a managed business park with established estate management and security arrangements. The development will therefore benefit from and operate within these wider management arrangements, alongside measures implemented by the future occupiers of Units 100 and 200.

5.1.3 Given that the future occupiers of the units are not yet known, the measures set out within this DSP provide an overarching management framework which can be implemented and, where appropriate, refined to reflect the specific operational requirements of future occupiers.

5.2 Management of the Plan

5.2.1 Each occupier will nominate an appropriate operational representative responsible for implementing the principles of this DSP within their respective unit. The nominated representative will be responsible for overseeing delivery and servicing activity and ensuring that relevant staff, suppliers and delivery drivers are made aware of the servicing arrangements.

5.2.2 The nominated representatives will liaise with the Stockley Park estate management and security teams where necessary to ensure that delivery and servicing activity is appropriately coordinated with the wider management of the estate.

5.2.3 A security lodge is located at the principal entrance to Stockley Park from Bennetsfield Road, immediately north of the development site. The security presence at the entrance provides an additional opportunity to assist with the management of delivery and servicing vehicles entering the estate, including directing drivers towards the appropriate site access and minimising unnecessary circulation within the wider Stockley Park road network.

5.2.4 Where appropriate, the existing estate management and security arrangements will also be utilised to assist with monitoring servicing activity associated with the development. This may include recording relevant delivery vehicle details and directing drivers to the appropriate unit where required, providing an additional level of oversight alongside the individual occupiers' own delivery management procedures.

5.2.5 The internal road network within Stockley Park is subject to ongoing management and maintenance by the wider estate management team. As part of these existing arrangements, the condition of the internal road network will continue to be monitored following occupation of the development. Should any deterioration or damage be identified which is considered to be associated with delivery and servicing activity generated by the development, this will be investigated through the estate management arrangements and appropriate remedial action undertaken where necessary.

5.2.6 The above arrangement will provide an ongoing mechanism through which the effects of servicing activity on the internal Stockley Park road network can be identified and addressed, rather than relying solely upon the forecast level of HGV activity at the planning stage.

5.2.7 Delivery and servicing activity will also be managed having regard to the principles of the Department for Transport's Quiet Deliveries Good Practice Guidance. Measures will include, where appropriate:

- ensuring servicing areas and associated equipment are appropriately maintained;
- coordinating routine delivery and collection times to minimise unnecessary vehicle conflicts;
- minimising unnecessary vehicle idling within the service yards;
- ensuring drivers are provided with appropriate access and routing information;
- encouraging drivers to minimise unnecessary noise when manoeuvring, loading and unloading; and
- coordinating refuse collection and other servicing activity where necessary to minimise potential conflict.

5.2.8 The above measures will be implemented having regard to the operational requirements of the future occupiers and may be refined where appropriate as part of the ongoing management and review of this DSP.

5.3 Delivery Management

5.3.1 Future occupiers will implement appropriate delivery management procedures proportionate to their operational requirements. Where reasonably practicable, routine HGV deliveries and collections will be scheduled in advance to minimise potential conflict between servicing vehicles and ensure the efficient operation of the service yards.

5.3.2 Where delivery slots are utilised, these will be coordinated to minimise simultaneous vehicle arrivals and unnecessary vehicle waiting. Drivers arriving outside agreed delivery arrangements will be required to contact the relevant occupier or site management for further instructions.

5.3.3 Delivery and servicing drivers will be provided with appropriate access, routing and arrival information prior to visiting the site. This will include details of the relevant site access and service yard, together with the preferred approach via the higher-order road network.

5.3.4 Drivers will be instructed not to park or wait on Longwalk Road, Bennetsfield Road or elsewhere within the internal Stockley Park road network whilst awaiting access to the development.

5.3.5 The location of the development immediately adjacent to the principal Stockley Park entrance, together with the existing security presence at the entrance, will assist in directing servicing vehicles to the appropriate access and reducing the potential for unnecessary circulation within the wider estate.

5.3.6 Where reasonably practicable, routine delivery and servicing activity will be coordinated to avoid unnecessary concentration of vehicle movements during the busiest network periods, whilst recognising that precise delivery times will be influenced by the operational requirements of the future occupiers and their suppliers.

5.4 Summary

5.4.1 The measures set out within this chapter provide a framework for the effective management of delivery and servicing activity associated with the development. The strategy combines the established estate management and security arrangements operating within Stockley Park with site-specific measures to be implemented by the future occupiers.

5.4.2 In particular, the location of the development immediately adjacent to the principal Stockley Park entrance, the presence of the entrance security lodge, provision of driver routing information and dedicated on-site service yards will assist in ensuring that delivery and servicing activity can take place safely and efficiently, whilst minimising unnecessary vehicle waiting and circulation within the wider estate.

5.4.3 The existing estate management arrangements will also provide an ongoing mechanism for monitoring the condition of the internal road network. Any issues associated with delivery and servicing activity can therefore be identified, investigated and, where necessary, addressed through the wider management and maintenance of Stockley Park.

5.4.4 The measures will be implemented by the future occupiers in coordination with the Stockley Park estate management team where appropriate and may be reviewed and refined following occupation to reflect specific operational requirements and any issues identified through ongoing monitoring.

6. Monitoring and Review

6.1 Monitoring

6.1.1 The operation of the delivery and servicing arrangements will be monitored following occupation to ensure that the measures set out within this DSP continue to operate safely and effectively.

6.1.2 Each occupier will be responsible for monitoring delivery and servicing activity associated with their respective unit through their normal operational management procedures. Where appropriate, this may include consideration of delivery timings, vehicle types, routing and any operational issues identified within the service yards.

6.1.3 The individual occupiers will liaise with the Stockley Park estate management and security teams where necessary. The existing management arrangements at the principal entrance to Stockley Park will provide an additional opportunity to identify and record servicing-related issues, including vehicles requiring assistance with routing or access to the development.

6.1.4 The condition of the internal Stockley Park road network will continue to be monitored through the wider estate management and maintenance arrangements. This will provide an ongoing mechanism to identify any deterioration or damage to the internal road network following occupation of the development.

6.1.5 Where deterioration or damage is identified which is considered to be associated with delivery and servicing activity generated by the development, the matter will be investigated through the estate management arrangements. Where necessary, appropriate remedial measures will subsequently be identified and undertaken.

6.1.6 Monitoring will also provide an opportunity to identify any recurring issues associated with delivery and servicing activity, including inappropriate vehicle routing, waiting or parking, conflicts within the service yards or unnecessary circulation through the wider Stockley Park estate.

6.1.7 Where recurring issues are identified, appropriate corrective measures will be considered in liaison with the relevant occupier and, where appropriate, the Stockley Park estate management team. Measures may include revised delivery instructions, amendments to scheduling arrangements, additional driver information or other proportionate management measures.

6.2 Review

6.2.1 This DSP will remain a live document and will be reviewed as necessary following occupation to reflect the operational requirements of the future occupiers and any issues identified through ongoing monitoring.

6.2.2 The effectiveness of the delivery and servicing arrangements will be considered having regard to the matters identified through occupier and estate management monitoring, including the operation of the service yards, vehicle routing and waiting, and the condition of the internal Stockley Park road network.

6.2.3 Where the monitoring process identifies a need for changes to the delivery and servicing arrangements, appropriate measures will be developed and implemented by the relevant occupier in coordination with the Stockley Park estate management team where necessary.

6.2.4 Where material amendments to the servicing strategy are required, these will be discussed and agreed with LBH where necessary.

6.2.5 Relevant contact details for the future occupiers and/or site management will be provided to LBH where required, enabling any servicing-related matters to be raised, investigated and addressed appropriately.
