TOPOGRAPHICAL SURVEY, UNDERGROUND SERVICES TRACE & GPR SURVEY

NOTES

- Drainage pipe sizes (where shown) have been gauged from the surface for safety reasons and should be regarded as approximate only.
- Tree species (where shown) should be treated with caution and expert identification is advised.
- Although this is a digital survey the accuracy and amount of detail shown is limited by the scale commonly associated with the graphical scale of mapping. Special care should be exercised when working to larger scales.
- Mobile features in the vicinity of the boundaries, as shown above, may not represent the extent of legally defined ownership.
- Whilst every effort has been made to achieve accuracy on this plan, CRUCIAL clearance dimensions, levels and invert levels should be checked prior to design and construction.
- Kerb levels have been taken in the bottom of the channel.
- Areas of dense undergrowth cannot be surveyed in detail, these areas will be shown in outline only and marked as 'dense undergrowth' on the plan.
