

3.15.2 Gilbert Place with Access Storage redevelopment

The proposals have however been designed to facilitate the redevelopment of the Access Storage site, so that when new buildings are delivered on their site there is no compromise to either land holding. Through a legal agreement Access Storage will be able to use the two-way road to access their ground and basement levels and the single lane service way to satisfy their servicing/refuse collection needs. This means that the landscape solution for Gilbert Place can be comprehensive and complimentary.

Existing Plan - Gilbert Place with Access Storage Redevelopment

Proposed Section - Gilbert Place with Access Storage Redevelopment
