David,

My apologies for the delay in getting back to you.

In design terms, no objections are raised to the Holly Ward extension or its link, although we would need to see further details of the link in terms of its design and materials, but this could be conditioned. These elements are however temporary structures and as mentioned at our meeting, they can not be granted permanent permission and the application forms need to be revised to reflect this.

The revised layout and design of the ITU extension is much improved. The only revision suggested by Sarah is that the horizontal glazing pattern proposed at the doorways and entrances should be incorporated across the building as a whole to give the elevations better visual continuity and provide more of a feature. It would also be helpful at this stage if the PVs could be shown - obviously these need to be as discrete as possible.

I am not sure where we are in terms of the access issue following our meeting and await the highway/parking information.

In terms of committee date, the very earliest meeting we are looking to now is 2 June and to meet this date, my deadline for a completed committee report is 19th May so all issues would need to be resolved well in advance of this date.

Regards,

Richard

Thanks Sarah,

Without putting words in your mouth would I be correct to say that you think it fits in better than the previous scheme and should be approved....?

All the best

David

David, yes thank you I did get them and I am sorry for the delay in responding to you. I have provided advice to Richard on the conservation and design aspects of the revised scheme, however, I believe he is waiting for some advice from another section before coming back to you with an overall view on the proposal, but I will pass your nudge onto him!

Sarah

Dear Sarah,

Just checking that you received my email and a little nudge to give me a call please.

Thanks

David

Dear Sarah,

Could you please give me a call to discuss the changes to the plans and elevations brought about following our meeting at the Civic Centre. We believe that the revised scheme answers all the points you raised and will sit comfortably next to the existing original buildings and the ITU. The Trust is most keen that the application is presented to the May Committee and would like to know how you perceive its chances of passing.

I called yesterday and tried to call this morning, but all the lines were engaged.

Kind regards,

David Whitestone
