Subject: RE: Cherry Lane Cemetery Communications Mast, Shepiston Lane, West Drayton, London UB7 9DL

Classification: Public

Hi Darren,

We have now assessed the above application against safeguarding criteria and can confirm that we have no safeguarding objections to the proposed development.

Please can I make you aware of the following observations:

Cranes

Given the nature of the proposed development it is possible that a crane may be required during its construction. We would, therefore, draw the applicant's attention to the requirement within the British Standard Code of Practice for the safe use of Cranes, for crane operators to consult the aerodrome before erecting a crane in close proximity to an aerodrome. This is explained further in Advice Note 4, 'Cranes and Other Construction Issues' (available at <http://www.aoa.org.uk/policy-campaigns/operations-safety/>)

5G Aviation Informative

To demonstrate that 5G capability can be operated safely from the site, the installing/operating organisation should ensure there is compliance with the Ofcom 5G Coordination procedure for air traffic control radar1. The operating organisation should be able to demonstrate this to the satisfaction of both the airport and radar operator as well as the telecoms regulator.

Dear Sirs

Please find attached correspondence informing you that we intend to submit a prior approval application to upgrade the existing electronic communications base station at this site, which is located approximately 2.3km north of Heathrow Airport
