## Description of Your Proposal

Please provide the description of the approved development as shown on the decision letter

The Installation of a replacement Lattice stub tower supporting a headframe supporting 9No. antenna and transmission dish and ancillary apparatus, removal of 2No.. pole mounted antenna all on the rooftop of the building, and installation of ground based equipment cabinets (removal of existing redundant cabinet) and ancillary apparatus, through Planning decision approved 06th April 2018, ref: 10105/APP/2018/181. Then a Section 96A Non Material Amendment changing the stub tower to a different 7.5m FLI Stub Tower, where the existing and new antenna were to be relocated and the reduction in the number of cabinets at ground level, again approved 13th April 2021, ref: 10105/APP/2021/235.

What was the original application type?

Full planning permission

For the purpose of calculating fees, which of the following best describes the original development type?

- ☐ **Householder development:** Development to an existing dwelling-house or development within its curtilage
- ☒ **Other:** Anything not covered by the above category

## Non-Material Amendment(s) Sought

Please describe the non-material amendment(s) you are seeking to make

The current approved Stub tower and support poles are no longer to be deployed and the existing rooftop stub mast and tripod / quadpod mounts on the rooftop are to be utilised for the installation of the new antenna. The current ground based equipment cabinets are to be removed and 2 x new CSC cabinets plus ancillary equipment are to be located to the exchange rooftop on new supporting grillage. Ancillary works will see the installation of 1 x GPS module on the stub mast and ancillary equipment to support the new antenna and feeder cable works within the existing feeder management system.

Please state why you wish to make this amendment

We are looking to make this amendment as the required new equipment does not require the installation of the new Stub tower and can utilise the existing steelwork located on the rooftop thus reducing the visual impact of new steelwork on the rooftop and also to locate the equipment cabinets at roof level so as to increase the security of the equipment cabinets and improve the performance of the proposed new equipment.
