Driveline Priora®

Marshalls Driveline Priora.

Product Description

Driveline Priora® is the affordable, low maintenance permeable driveway solution, available in a range of popular colour options to enhance every home. Our patented Priora® design offers superior driveway strength for a long lasting sustainable urban drainage system.

Designed to manage driveway drainage by allowing surface water to pass through the joints directly into the ground below, reducing the risk of flooding and not overloading drains. Choosing this product for your driveway project means you won't need any additional planning permission or drainage.

To find out more on driveway legislation, why not read our helpful blog on the [Rules for a new Driveway](#).

- Refresh your driveway with the ideal permeable driveway solution
- Choose from six attractive and popular colour options to suit your taste
- Rest assured by your choice - no planning permission or additional drainage is required!
- Reduce the risk of flooding with this patented design
