reviews

The Multi DC inverter range are innovative multi-split systems from Mitsubishi Heavy Industries thermal systems which offers the perfect answer for air conditioning comfort in several environments. A single outdoor unit can air condition up to 6 different rooms. Utilising a range of compact and elegant indoor units that are available in 6 different types, make air conditioning any indoor environment possible. The whole range is characterised by high flexibility, high energy efficiency and extreme low noise levels.

Key Features

- Number of connectable indoor units (min-max) – 1-5
- High energy efficiency by new R32 refrigerant –It has a potential refrigerating effect 1.5 times that of R410a meaning it needs less energy to achieve the desired temperature and requires less refrigerant volume to operate
- Low noise & comfort – Thanks to the application of twin rotary compressor, the outdoor units have low noise levels, silent operation is installed in all outdoor units
- Wide range in operation – Expand the cooling range to 46 °C
- Installation flexibility – You are given the freedom to decide where the indoor units will be installed to optimise interior space and convenience
- R32 Refrigerant – Protect the planet by reducing the impact of climate change
