

PROJECT: BOURNE COURT SITE 2016

ADDENDUM TO ENERGY REPORT REF: E608-Energy-1401-10ch.

28-09-16

This report is based on a previously approved planning application 11891/APP/2014/91 which incorporated 2 blocks of flats (Block A and Block B) and 10 semi-detached houses.

The proposed scheme replaces the 10 semi-detached houses for a single block of 30 flats, called Block C, Blocks A and B remain the same.

In the original scheme the photovoltaics (PV) design for Blocks A and B gave a 40% carbon reduction, meaning that the new scheme would require a nominal increase in PV provision, this could be accommodated the south facing roof of Block C to meet the new required carbon reduction.

The rear amenity space to Block C is insufficient for ground source heat pumps, and therefore not applicable.
