Dear Tom,

Re: Frays Court, 71-73 Cowley Road, Uxbridge

I am writing in respect of the omission of the dormer window at the front elevation of 71-71 Cowley Road.

We had a structural crank beam, which was approximately 354mm wide in that particular position. It was added by the structural engineer due to potential impact of dipropionate collapse.

The space between the other dormer (positioned to the left) and the beam was too little and did not suffice to include that additional dormer.

Yours sincerely,

Sunil Pankhania
