

Balcony Area Comparison

REVISED BALCONY TYPES / AREAS			
TYPE	AREA	COUNT	TOT AREA (m²)
101	5.48	171	937.08
102	6.48	179	1159.92
103	8.48	28	237.44
104	10.48	21	220.08
105	12.48	30	374.4
TOTAL CT		429	2928.92
TOTAL REVISED		429	2928.92
		DIFFERENCE	176.99

1. Overall building footprint area is unchanged
2. Overall podium footprint is unchanged
3. Upper-level terrace areas are unchanged
4. Podium smoke extract - This was not indicated on the consented drawings. This has been added to the podium level to provide smoke clearance from the car park levels below. This is in accordance with the fire strategy / Building Regulations / NHBC requirements / LFB requirements
5. Smoke extract fan sizes and layouts are still to be confirmed but the addition of the smoke extract housing reduces the podium area by approx. 140m²
6. Balcony areas - The attached schedule compares the AUS balcony design and the revised / optimised balcony design. This illustrates that the revised balcony design provides 176.99m² of additional area which is more than sufficient to offset the area lost at podium level due to the introduction of the smoke extract housing
