

- SEASONAL ENERGY STRATEGY
- Fabric first Principles to reduce need for heating
 - Maximise opportunities for Passive Solar gains
 - Harness the sun's heat during the Summer months

- SUMMER ENERGY STRATEGY
- Store electricity during the day for use at night
 - Convert excess electricity into heat for hot water
 - Reduce dependance on the National Grid
- PV - East and West facing arrays enhance morning and evening generation performance.

- WINTER ENERGY STRATEGY
- Store electricity during the day for use at night
 - Convert excess electricity into heat for hot water
 - Reduce dependance on the National Grid
- PV - East and West facing arrays enhance morning and evening generation performance.

Proposed summer Pv production and power consumption.
