Description of Existing Building

Brief Design and Access Statement to support a retrospective planning application for a front canopy.

The existing building is brick built and two-storey on the corner of Cowley Mill Road/Mill Road, end of terrace, with a concrete tiled pitched roof. The building has commercial use on the ground floor and residential use on the upper floor.

The ground floor is currently used as a beauty salon.

The adjoining buildings generally appear to be residential apart from the opposite building adjacent to Mill Road, which mirrors the application site.

The site is not located within an area of conservation, nor are the buildings on site or adjacent to or locally or nationally listed.

Existing survey drawings are enclosed with the planning application.

Planning

The London Borough of Hillingdon adopted their 'Supplementary Planning Guidance/Documents'.

Over the years the Council has approved applications for numerous buildings including rear roof extensions depending on the type of building, location, detailing etc. Key considerations are location (visibility from afar), size, effect on adjoining properties and design.

The site has the following planning history (taken from the LBH planning search website):

As a satisfied customer of Miami Beach Tan, I can't say enough about their fantastic beauty services. What I love most is how this area has improved the look of the whole neighbourhood. The stylish canopy adds a touch of sophistication to the streetscape, making the salon stand out in the best way possible. It creates a welcoming atmosphere that draws you in, even if you're just passing by.

Agnese Gasuna

As a loyal customer of Miami Beach Tan, I'm thrilled with their new front canopy. While their tanning, hair, nail, and beauty services are top-notch, this outdoor space is a game-changer. It's perfect for relaxing before or after treatments, adding a touch of Miami Beach style to the neighbourhood. The

canopy creates a welcoming oasis that enhances the entire salon experience. It's not just about looking good anymore – it's about feeling great from the moment you arrive. This addition has truly made Miami Beach Tan the premier beauty destination in our area, combining excellent services with an unbeatable atmosphere.

We request the planning officers to support local businesses and discuss ways in which a front canopy can be retained. We have found an example of such a street in Greater London, which can serve as an example for permitting such structures to secondary street frontages, see below:

The construction of the canopy is generally in sheet timber, timber posts and a GRP roof covering, see below:

Our client is willing to discuss any amendments that LBH may wish to apply in order to retain the canopy.

Access

The existing street access is retained.

If the application is acceptable in principle than fire retardant coatings will be applied to the canopy where it is adjacent to the adjoining buildings.
