

DESIGN & ACCESS STATEMENT

Flora Fountain Pharmacy
283 High St
Uxbridge
Middlesex
UB8 1LQ

SHOPFRONT DESIGN

The new frontage will have a black/brown aluminium painted shopfront frame and glazed entrance door. This will provide a clean clinical solution and a traditional appearance in keeping with the conservation area and its surroundings. This classic colour for the new shopfront has been selected to complement the building and street scene. The colour will be attractive and durable in a painted finish, being low maintenance and therefore enhancing the front for many years adding to the visual character of the area and its surroundings.

The shopfront design will positively promote the modern and forward thinking pharmacy business within. The fascia lettering will ensure clear communication of the clinical service provided.

The new fascia signage will be opal coloured LED individual back lit letters promoting the clients brand and corporate identity. The LED illuminated projecting pharmacy cross will send clear communication to those in need of medical help.

ENTRANCE

There will be a ramped entrance from the pavement to the new 1200 mm w single automatic door. This will provide ease of use for the disabled, infirm, elderly and mothers with prams. The position of the entrance door ensures a clear path into the pharmacy.

The new door will be glazed with manifestation highlighting the glass and providing clear visibility for parties approaching from all directions.

Flooring in the retail area will include a new entrance mat. This provides the entrance with a visual demarcation between the threshold and the shop.
