

Stride Treglown Response to SE comments dated – 1/10/25 (M Furnish)

- Comments to be read in association with Plan No. SRP1077-NVB-00-XX-D-L-2103.

Further to your email at the start of the week with the recent Sport England comments, please see below a response to these comments, produced from discussion with our landscape architects.

The grass playing field will be:

1. To Sport England gradients – see 1:100 on plan attached and extracted below
2. This is reverting to pre-existing gradients prior to the temporary school installation
3. Spot Height Explanation
  - a. Light grey are existing
  - b. Black are proposed
  - c. Existing below hatched reinstated playing field will be regraded to a consistent gradient between the four proposed levels in each corner

Attached is a snip of the attached plan, which shows the existing spot heights, all be it quite small. These confirm that the levels are 'no worse than existing', the original levels are compliant with SE gradients.

We trust that this information allows Sport England to now remove any holding objections and for the conditions to be discharged.
