This was Planning Application Ref: **16080 / APP / 2016 / 3282**

It is not easily split this dwelling into two completely separate dwellings for the following reasons:

1) To use the lift for the top only, the lower dwelling would lose the use for the lounge, and
2) The stairs are central though the house and therefore the occupants of the main part of the house, the lower two floors, will lose any and all privacy
