Date (Must be pre-application submission)

04/03/2021

Details of the pre-application advice received

The intensified use of the site and encroachment of development towards to boundary with the adjacent open space would be considered harmful to the conservation area and street scene. The loss or harm to established vegetation along the northern boundary of the site would further expose the site and development, exacerbating the harm caused to the conservation area and potentially the setting of Drayton Hall. It would fail to appear as a well integrated, sympathetic development. The proposal lacks the high-quality standard of design expected in a conservation area. As a new development consideration should also be given to the long term sustainability of the building and designed into the scheme from the outset. The development would not adequately preserve or enhance the character and appearance of the conservation area. Whilst level of harm to the individual site could result in less than substantial harm the incremental and cumulative harm that could arise from similar developments could adversely affect the significance, character and appearance of the conservation area, resulting in substantial harm. Heritage assets are irreplaceable; any harm requires clear and convincing justification.

☐ Yes ☒ No

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
