

18.18m³ - Volume of Existing Outrigger 2.12m³
=16.06m³ of additional Roof Space

A 3D cutaway diagram of a house showing the internal structure. A green translucent wall is highlighted in the attic area, representing a thermal break or insulation layer. The diagram shows the roof, walls, and floor, with the green wall indicating the location of the thermal break.

Existing Roof Volume (green) of 2.12m³ of outrigger to be subtracted from any new additional roof space created by the box dormer as the 2.12m³ is existing roof space, not additional.
