INFORMATIVES

1. The site lies in a Critical Drainage Area (CDA) as identified in the Surface Water Management Plan (SWMP) for Hillingdon. A CDA is the catchment area from which surface water drains and contributes to drainage problems. All developments in this area must contribute to managing the risk of flooding from surface water by reducing surface water runoff from the site. Therefore the applicant should minimise the water from your site entering the sewers. No drainage to support the extension should be connected to any existing surface water sewer, other than as an overflow. Water run off from any roof or hard paving associated with the development should be directed to a soakaway, or tank or made permeable. This includes any work to front gardens not part of the planning application, which must be permeable or be collected and directed to a permeable area, otherwise it would need an additional permission. A water butt should be incorporated.
2. You are advised that if any part of the development hereby permitted encroaches by either its roof, walls, eaves, gutters, or foundations, then a new planning application may have to be submitted. The validity of this planning permission may be challengeable by third parties if the development results in any form of encroachment onto land outside the applicant's control for which the appropriate Notice under Article 13 of the Town and Country Planning (Development Management Procedure) (England) Order 2015 has not been served.
3. On 1 July 1997, a new act, The Party Wall etc. Act 1996, came into force.

This Act requires a building owner to notify, and obtain formal agreement from, any adjoining owner, where the building owner proposes to:-

- 1) carry out work to an existing party wall;
- 2) build on the boundary with a neighbouring property;
- 3) in some circumstances, carry out groundworks within 6 metres of an adjoining building.

Notification and agreements under this Act are the responsibility of the building owner and are quite separate from Building Regulations or planning controls. Building Control will assume that an applicant has obtained any necessary agreements with the adjoining owner, and nothing said or implied by Building Control should be taken as removing the necessity for the building owner to comply fully with the Act.

4. The Council will recover from the applicant the cost of highway and footway repairs, including damage to grass verges.

Care should be taken during the building works hereby approved to ensure no damage occurs to the verge or footpaths during construction. Vehicles delivering materials to this development shall not override or cause damage to the public footway. Any damage will require to be made good to the satisfaction of the Council and at the applicant's expense.

For further information and advice contact - Highways Maintenance Operations, Central Depot - Block K, Harlington Road Depot, 128 Harlington Road, Hillingdon, Middlesex, UB3 3EU (Tel: 01895 277524).

For Private Roads: Care should be taken during the building works hereby approved to ensure no damage occurs to the verge of footpaths on private roads during construction. Vehicles delivering materials to this development shall not override or cause damage to a private road and where possible alternative routes should be taken to avoid private roads. The applicant may be required to make good any damage caused.
