

EXTENSIONS to HIGH MEADOW CLOSE CARE HOME, HIGH MEADOW CLOSE, PINNER

HA5 2HD

UTILITIES SURVEYS AND PROPOSALS

The proposed four additional bedrooms will operate as an extension to the existing care-home facilities and therefore have minimal standalone utility or servicing requirements. All new rooms will be fully integrated into the existing operational networks, including water supply, foul and surface water drainage, electricity, heating systems, fire alarm, data, and ventilation infrastructure.

No new external plant, substations, or service connections are required. The existing building has sufficient capacity to accommodate the modest increase in demand, and all works will be carried out in accordance with relevant statutory regulations and utility provider requirements.
