

DELLA Umbra 1.5 Ton Mini Split

[Check Price on Amazon](#)

DELLA Umbra Series is a 18000 BTU, 1.5 ton inverter mini split designed for spaces up to 1000 square feet. It operates in temperatures as low as 19°F, enabling year-round comfort in cooler climates. The system uses R32 refrigerant to reduce environmental impact while maintaining strong cooling and heating performance. Users benefit from 4D airflow (up-down, left-right), I Feel mode, a 24-hour timer, and a sleep mode for personalized comfort and energy savings. Eco energy saving modes, multiple fan speeds, and a turbo function enhance daily control. Maintenance requires line-set vacuuming during installation, and any alterations to line-set length require freon level adjustments. Professional installation is required, and the unit is compatible with Alexa for voice control.

- 1000 sq ft coverage with smart climate control
- R32 refrigerant for lower environmental impact
- 4D airflow, I Feel mode, and eco saving options
