

Dear sirs

This is regarding the tree in my private property Josan Farm House, Mead House Lane, Hayes, UB4 8EW, previously called The Paddocks Farm.

On 17<sup>th</sup> August around 12 o' clock in the night time, we heard a noise of falling tree.

In the morning we got call from our neighbour that the large part of tree fell in their garden from my side and damaged their fence & plants. They are very upset with me and asking I am responsible for damage to their fence and garden because the tree is in my boundary.

Below are the photos of fallen part of tree.

Our neighbour is requesting us to remove the tree because they are afraid it can fell on their boundary & causes more damage to their property.

We also arranged tree surgeon urgently to have a quick look. According to them tree 1 and tree 2 are in high risky position. These trees are exempted. They can fall down at any time which causes severe damage to the neighbour property. They pose a risk of life if fall on any one because there is nearby alley on one side. The pedestrian used this alley for walk.

There are many trees inside our boundary. Most of them are healthy. Couple of trees are not healthy due to the lack of maintenance. I will make application to trim those trees in the future.

But the tree 1 & tree 2 are in danger position and need to act urgently for safety for everyone. These trees are dying back and dropping limbs. The trees are situated in a high-risk area next to the property.

I bought this property in February 2022 & I am responsible for these trees now.

I really appreciate if you could let me know if we can cut down tree as it is exempted as per tree surgeon.

Your sincerely  
Jarnail Singh
