Dear Planning Department

Application PP-1203623

I would like to follow up my email of 29th June for which I have not had a reply.

I now enclose the following:

1. Existing ground floor plan
2. Proposed glazed veranda on existing ground floor plan.
3. Proposed glazed veranda
4. Current rear view
5. Typical glazed veranda of type being proposed. It can be seen that this is simply a glazed canopy, not raised from the ground, with support posts.

On the tree survey the two closest trees are over 15 metres and 25 metres from the planned installation and the support pillars will not affect their roots.

I trust that these are all the information you require but please let me know if anything more is needed.

With best wishes

E.S. Komorowski
