

**Design Statement
for
20 Pield Heath Road
Hillingdon
Middx**

1. It is proposed to erect a new garden wall to the boundary of this site at the side entrance to the property.
2. This has become necessary due to other people parking their vehicles on this land and causing damage.
3. In particular there is a raised water meter that is constantly ridden over, and it is feared that this may become damaged.
4. Attached are sample photographs of other parked vehicles.
5. It is believed that the erection of a new wall to the perimeter boundary of the site would be classed as permitted development under the Planning Act as the height of the new wall fronting a highway would not be greater than 1 meter.
