

The Vivara Pro Build-in WoodStone® Bat Box has been specifically designed to fit into the cavity of house walls. It features a slim sized entrance hole which can sit flush in a course of bricks to provide a discreet entry way for bats.

It is manufactured from hard-wearing woodstone® and plywood with removable side panels so that several boxes can be placed side by side. Position the box at least 2m above ground level away from artificial light sources. Woodstone® is a mixture of sawdust from certified sustainable wood sources and concrete, and it is designed to last for years. It is breathable so there will be no problems with condensation and maintains a consistent temperature inside, providing excellent insulation for roosting bats.

Dimensions:: 50 x 21 x 15 (H x W x D)  
 Weight: 5.6 kg  
 Material: WoodStone®

3/ivara Pro UK Build-in WoodStone Bat Boxes

3 1SP Schwegler Sparrow Terrace

The current UK sparrow population is declining and this is thought to be due to habitat destruction and lack of suitable nesting spaces. Sparrows are social birds and like to nest in company, this sparrow terrace is ideal for three sparrow families. Made of Schwegler's revolutionary wood-concrete mix, this terrace is durable, breathable and will last many decades. It may also occasionally attract tits, redstarts and spotted flycatchers.

The terrace can be fixed on to the surface of a suitable wall or incorporated into the wall. It is suitable for all types of houses in built-up areas, and on industrial and agricultural buildings such as barns, sheds and factories. Ideally place the terrace 2m or more above the ground. Either install on the surface of the wall using the plugs and screws provided, or install directly into the wall. Cleaning is advisable but not necessary, and the front panel can be removed by turning the screw hook.

Due to its weight, it is not suitable for fences or garden sheds.

Internal Dimensions (brood chamber): 16 x 10. x 15 cm (L x W x D)  
 External Dimensions : 24.5 x 43 x 20 cm (L x W x D)  
 Weight: 15 kg  
 Number of brood chambers: 3
