# EXTERNAL LUMINAIRE SCHEDULE

Rev. 02

**PROJECT** Northwood and Pinner Health Centre

**STAGE 4+**

**SCHEDULE REF:** 0212-INS-HC-XX-SH-E-6003

REF	DESCRIPTION	MANUFACTURER / CAT No	IMAGE
X1	SINGLE-PIECE DIE-CAST ALUMINIUM HOUSING, THAT CONFORMS TO EN1706 AC-46500, WITH INTEGRAL HEAT SINK FINS TO OPTIMISE THERMAL MANAGEMENT THROUGH CONDUCTIVE COOLING. LED MODULES ARE IP65 WITH INDIVIDUAL LENSES, AND HIGH GRADE ALUMINIUM HOUSING TO TRANSFER HEAT AWAY FROM THE LEDS AND DISSIPATE THROUGH THE FINNED HOUSING FOR COOLING. THE LED DRIVER IS MOUNTED IN DIRECT CONTACT WITH THE FINNED HOUSING FOR COOLING TO PROMOTE LOW OPERATING TEMPERATURE AND LONG SYSTEM LIFE. HOUSING IS COMPLETELY SEALED AGAINST MOISTURE AND ENVIRONMENTAL CONTAMINANTS (IP65). INSTALLATION IS VIA THE INTEGRATED MOUNTING BLOCK AND INTEGRAL ARM THAT FACILITATE A QUICK AND EASY INSTALLATION. # EXTERNAL LUMINAIRE X1 & X2

# D-SERIES

D-SERIES

**HOLOPHANE**<sup>®</sup>  
An Acuity Brands Company

# D-SERIES

The modern styling of the **D-Series** is striking yet unobtrusive - making a bold, progressive statement as it blends seamlessly with its environment. **D-Series** takes all the benefits of LED technology and moulds it into a high performance, high efficacy and long life area lighting luminaire.

With its exceptional 'finned' thermal management system, **D-Series** is capable of delivering over 100,000 hours LED module life. Offering a wide range of lumen packages and optical distributions, **D-Series** delivers optimised lighting application designs.

With the integrated ZD4i compatibility **D-Series** delivers a controllable luminaire that helps you realise energy consumption goals and demonstrate environmental responsibility. With its unique optics placed below each LED it ensures light is delivered where it needs to be, providing a uniform Nighttime Friendly environment with minimal light pollution.

#### Applications

- Amenity Areas
- Car Parks
- Retail Parks
- Truck Yards
- Warehousing Exterior Areas

#### Optics / Light Source

- Lumen packages ranging from 2,000 - 50,000 in 3 different luminaire variants
- Fully soak tested light engines ensuring LED reliability and eliminating early failures.
- 2700K/3000K/4000K colour temperature.
- RA 70.

#### TM66 CEAM-Make Rating

Rating: 2.6 Excellent Circularity.

TM66 Assured Score

#### Approvals

Complies with EN60598

IP IP65 luminaire and LED optic

Ta -40°C to +40°C

## AN ENVIABLE REPUTATION THROUGHOUT THE WORLD

125 years of   
Innovation & Excellence

When Holophane was founded in 1896 in London, headed by Pelham Trotter, it marked the start of an incredible history that has now seen Holophane become a global business revered throughout the world for its expertise, quality, innovation and excellence in lighting.

Holophane's first product was the famous patented globe in 'white' or 'rose crystal' that sold for around 2 shilling (10p). Today, Holophane continues this proud tradition with our values deeply rooted in the dedication to creating luminaires, with exceptional lighting performance, innovative patented technologies, and delivering added customer value beyond illumination.

### What does it mean for our customers?

#### A Trusted & Reliable UK Manufacturer

From Royalty all the way to small residential projects, Holophane has been a trusted manufacturer over the decades for all manner of projects. You can be sure you are in good hands and can rely on the collective knowledge and expertise we have gathered since our inception in 1896.

#### Development of Innovative Products

As part of our design philosophy, Holophane are always trying to push boundaries in the development of unique product innovations. As such many of our luminaires hold UK and International design patents.

#### Products That Deliver Added Value

In today's world, sustainability and added value are becoming increasingly important. As such our products and solutions go further than just lighting. Many of our innovations include integrated smart connected solutions to help customers achieve further energy savings and can also enable remote monitoring.

#### Delivering excellent customer service

Over our 125-year history we have always been committed to delivering the best service to our customers and supporting in a myriad of ways to ensure the best possible outcomes. This goes as far as offering a free lighting design service to one-off products/solutions to meet customers unique needs.

## THE D-SERIES RANGE 3 LUMINAIRES, ONE COMPLETE PROJECT SOLUTION

The **D-Series** range has been designed not only for super optical quality and performance but also to have a cohesive family aesthetic.

Available in 3 luminaire sizes, the D-Series range offers a full outdoor lighting solution for any environment.

### DSX2

30,000 - 50,000 lumens  
8m mounting heights and above

### DSX1

22,000 - 36,000 lumens  
between 6m and 10m mounting heights

### DSX0

2,000 to 22,000 lumens  
up to 6m mounting heights

## PRODUCT FEATURES

# D-SERIES

### Enhanced Performance

The **D-Series** range features the very latest LED technologies. In conjunction with silicone optics this delivers the best lighting performance coupled with low-energy consumption and high efficacy. This also means D-Series meets BREEAM compliance.

### Class leading optics

The **D-Series** range has the flexibility of 4 optimised optical distributions. Through using individual bubble optics per LED D-Series controls the light exactly where it's needed. This results in a luminaire that provides best in class spacings and uniformity.

### Easy maintenance

The **D-Series** range has an easily accessible gear compartment ensuring fast and simple component changes if required.

DSX1

DSX2

### Connected

The **D-Series** range is ZD4i compatible when specified with the 4-pin Zhaga socket options (TZ01 or TZ02) enabling a future proof luminaire that can be used in conjunction with Controlux Air or an expanding ecosystem of third party devices and sensors.

**Note:** Post Top Bracket for The D-Series range is sold separately. Please enquire with your Holophane representative for the full range of mounting options.

DSXO

# THERMAL MANAGEMENT

The reliability and performance of an LED luminaire is dependent on a combination of factors. Keeping the temperature of the drivers, LEDs and electronic components as low as possible is critical to maintaining the luminaire's efficiency.

One of Holophane's key luminaire design principles ensures that the **D-Series** family utilises all three heat transfer principles of conduction, convection and radiation.

## Conduction

Taking heat away from electronic components, LEDs and drivers.

The **D-Series** range has drivers and LEDs that are mounted directly to thermally efficient, LM6 Aluminium to promote efficient transfer of heat from these critical components.

## Convection

From luminaire heat sink chassis and LED module to ambient air.

The **D-Series** range is designed to have drivers and LEDs that are mounted separately to avoid compound heating of components. This ensures critical components are kept as cool as possible to ensure long system life.

## Radiation

Surface finish and form designed to maximise heat radiation.

The **D-Series** range incorporates a large finned casting design which increases the total surface area of the luminaire and in turn helps to promote cooling through radiation.

# THERMAL MANAGEMENT

DSX1

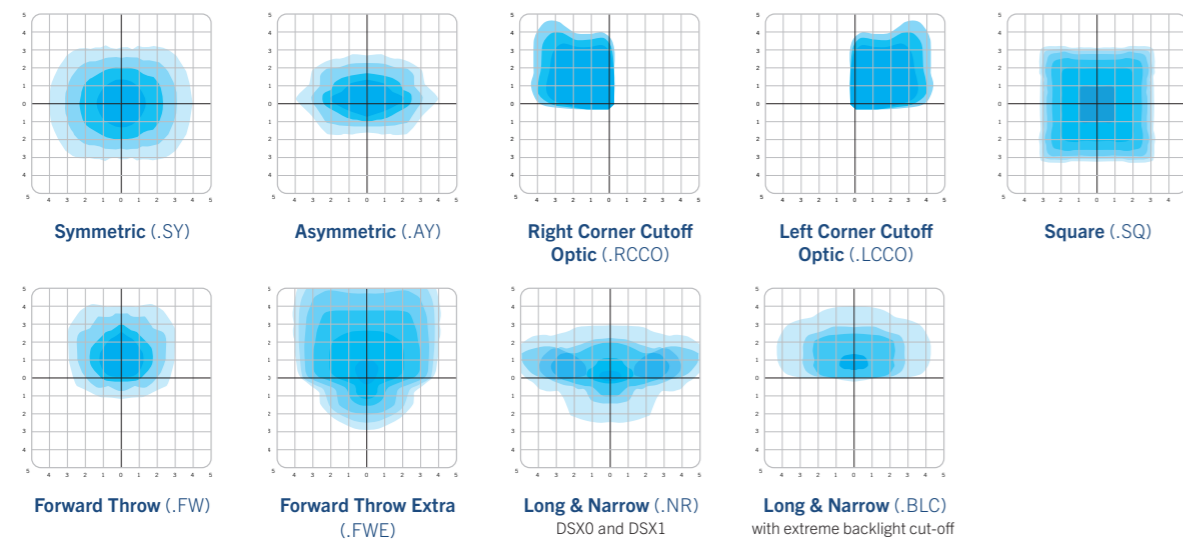

# SPECIFICATION

## Specification

Single-piece die-cast aluminium housing, that conforms to EN1706 AC-46500, with integral heat sink fins to optimise thermal management through conductive cooling. LED modules are IP65 with individual lenses, and high grade aluminium housing to transfer heat away from the LEDs and dissipate through the finned housing for cooling. The LED driver is mounted in direct contact with the finned housing for cooling to promote low operating temperature and long system life. Housing is completely sealed against moisture and environmental contaminants (IP65). Installation is via the integrated mounting block and integral arm that facilitate a quick and easy installation. 3000K or warmer must be selected for IDA dark sky certification.

## Light Distributions

## Features and benefits

### System Longevity

- The D-Series's diecast aluminium housing acts as its primary heat sink. Its longitudinal fins employ conductive cooling techniques to dissipate heat away from the key LED components and driver that extends the life of the luminaire.
- Light engine(s) consist of either 20 or 30 high efficacy LEDs (subject to chosen configuration) mounted to a metal-core circuit board to maximize heat dissipation and promote long life.

### Exceptional Performance

- Offering six lumen packages ranging from 2000 lm to 50,000 lm with efficiencies of up to 143 lpw (Lumens Per Watts).

- Four optimised distributions (Symmetric, asymmetric, forward throw and long and narrow) delivered by quality LEDs and bespoke UV stabilised optics.
- LED light engines with 0% ULOR ensuring night time friendly.

### Complete Light Package

- Available with ZD4i compatibility for use with range of 3rd-party sensors and devices.
- Fully integrated into Holophane standard column range.

# DIMENSIONS & PERFORMANCE

dimensions in mm

# SPECIFICATION

## LIGHTING WHERE YOU NEED IT... NOT WHERE YOU DON'T

Addressing unwanted spill light along the perimeter of your outdoor lighting design is no easy task. Whether you are trying to limit the light trespass due to concern for neighbouring properties, or simply seeking to achieve the most optimised lighting design, you need the most stringent light control available.

The D-Series Extreme Cutoff Optics, with its industry-leading optics addresses light trespass using innovative backlight control, delivering outstanding performance, long life and energy efficiency. This is accomplished through the use of specialised point-source black light engines, integrated specular reflectors with optimised optics and dedicated light-absorbing backlight shields to provide maximum control for backlight while providing superior lighting levels and luminaire efficiency.

## INNOVATIVE OPTICS THAT SUPPORT YOUR DESIGN

### Specialised, Black D-Series Light Engines

The stray-light absorbing light engines remove light scattered during refraction, ensuring light is directed exactly where it is needed - virtually eliminating spill light.

### Integrated Shield

The integrated shield design virtually eliminates light trespass, reduces glare, and maximises forward-reflected light, while maintaining high luminaire efficiency.

## INNOVATION IN ACTION

### Dedicated Backlight Control

The BLC optic enables significant backlight control, projecting light directly to the front and side of the task area while having as little as 0.5% of total backlight beyond the boundary line or column placement. This optic allows for optimal backlighting results when used on paths, curbs and parameter edging where backlight is not required. This is accomplished using a specialised

point-source black light engine with integral reflectors, optimised optics and light-absorbing backlight shields, providing superior lighting levels and luminaire efficiency. LEDs also can't be seen from the rear, which helps reduce glare when looking at the fitting from behind.

- Curb Line
- Property Line  
Virtually all light is cutoff right at that property line.
- Boundary Line

### Corner Cutoff Control

The RCCO (right-corner cutoff optic) and LCCO (left-corner cutoff optic) apply the same principles as the BLC optic. However, this optical distribution caters to aiding perimeter lighting control to the corners of parking lots and other outside areas. The image above illustrates this optic working in harmony with the BLC optic to provide unmatched perimeter lighting while

maintaining light levels that offer high visibility to the target area. The image further illustrates how sharp the cutoff is of the light. Allowing for projects to have a column mounted in the corner without any light spill going to one side. This helps support compliance with intrusive light requirements along the perimeter area while the target area remains illuminated.

# SUSTAINABILITY ENVIRONMENTAL

AN ECO DESIGN THAT IS SUSTAINABLE WITHIN.

Our products are just one part of our sustainability efforts, with the 4 pillars of our eco-design which constantly push us to create the most sustainable products that reduce our own environmental impact.

### Pillar One Sustainable we make more with less

- How are we doing it?
- To make use of recycled materials where we can
  - Reducing unnecessary materials, weight and component count
  - Only using components that can be used in other luminaires
  - Reduce labour time and energy usage during the manufacturing process

### Pillar Three Serviceable we ensure product longevity

- All of our products are:
- Upgradable
  - Simple in design
  - Ensure easy access to internal components
  - Spares are easily available to enable customer servicing and repair

### Pillar Two Scalable we tailor the product for application

- We offer:
- Products that are scalable to accommodate new features
  - Form-factor sizing for each application to help reduce material waste
  - Flexible mounting options

### Pillar Four Separable we are committed to global sustainability

- Our products are:
- Environmentally friendly
  - Recyclable
  - Easy to disassemble, making materials used easy to separate

## CIRCULAR ECONOMY TM66

Holophane's ambitious sustainability efforts have set us on the path to obtaining several accreditations with the LIA and CIBSE's TM66 which allows us to rate our products and follow a method that designs out waste.

The traditional resource consumption model is linear, where raw material is collected to make products, then often thrown away once they have served their purpose.

CIBSE's TM66 allows us to rate our products and follow a method to design out waste, maximise value and improve maintenance so that our luminaires can be repaired, recycled and re-used.

TM66 Assured Score

2.5 to 4.0	Excellent circularity
1.5 to 2.5	Definite/substantial progress to circularity
0.5 to 1.5	Some circular economy functionality
0 to 0.5	Very poor circular economy performance

# CONTROLS COMPATIBLE WITH CONTROLUX AIR

Controlux Air helps users transform their existing infrastructure into a wireless platform. With Controlux Air, you have full remote configuration or your site with an intuitive user interface which is map based and delivers accurate/update reporting.

## Wireless Controller

Wireless communication, lighting control and external sensor interface.

External antenna allowing communication with 'Motion Sensor' and 'Wireless Gateway'.

Creates a wireless mesh type network when used with the 'Wireless Gateway'.

Available with option codes .CA or .CAP

## Motion Sensor

Motion sensor and wireless communication triggering 1 to 10 luminaires (with Integral Wireless Controller) upon detection (user configurable).

Wireless communication with 'Gateway'.

Detects pedestrians, cyclists and cars range (range: 2.5 -75 mph)

Range: up to 15m on each side, 9m front and 3m behind at a mounting height of 5m (max).

## Gateway

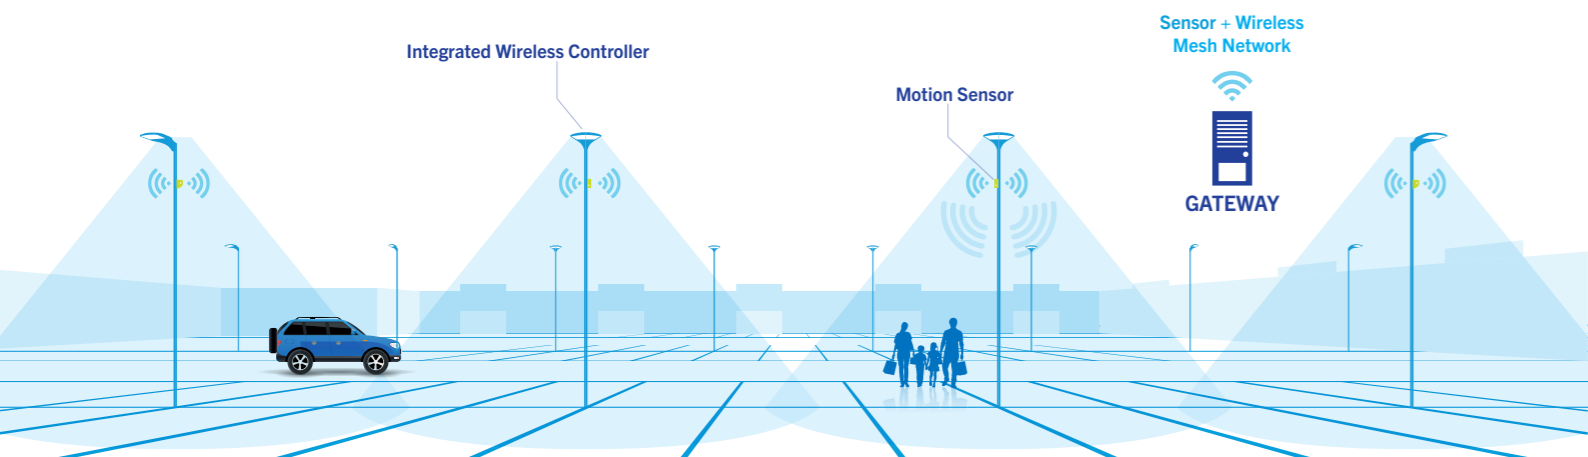

Wireless network and server communication (via SIM Card).

Suitable for pole, wall or inside cabinet mounting.

One Gateway required for up to 200 devices (Motion Sensors or Integrated Light Controllers)

with a range of up to 1km open field range.

Links all devices to web-based Customer Interface for remote management of luminaires and devices.

## Intuitive user interface

Gain in-depth insights into every single aspect of your lighting system. Smart analytics and simple charts will help you make the right decision about your lighting infrastructure.

## Automatic failure reports

Lighting-related system faults are identified, and automatic failure reports are sent in real-time. This results in optimized maintenance, better planning, reduced costs and extended luminaire life.

## Power metering

Dedicated hardware provides precise energy metering, which is converted into detailed energy usage and savings reports.

## Accurate real-time data

Generation of analytics per an individual light point or their groups. Available data includes: notifications about lighting-related faults, number of triggers per light point, generated energy savings, heatmaps, and more.

## Map-based visualizations

Outdoor lighting points are represented in a graphic interface on Google Maps, coordinated with GPS technology, which enables you to locate, monitor and control individual light points with ease.

## Continuous support

CityManager receives periodic security and feature upgrades. We do this to ensure optimum functionality and system performance.

## Financial Benefits

By installing Controlux Air controls systems, you benefit financially, thanks to energy savings and reduced energy costs.

### Energy savings of up to 80%

- By using dynamic lighting, it is possible to generate energy savings of 40-80%, depending on the usage environment
- In dense urban environments, the Controlux Air solution has the potential to generate energy savings of 40-50% (in this case, actual savings depend on the traffic intensity)

### Maintenance costs savings up to 50%

- Automatic failure reporting
- No need for expensive visual inspections
- Extended luminaire lifetime
- Excellent preventive maintenance

For more information about ControluxAir scan the QR code or visit [www.holophane.co.uk/controlux-air](http://www.holophane.co.uk/controlux-air)

# Floodlight FL 21

Reliable as always.  
Flexible and smart like never before.

Types,  
data sheets,  
configuration –  
all at a glance:  
**Floodlight  
FL 21 iQ**

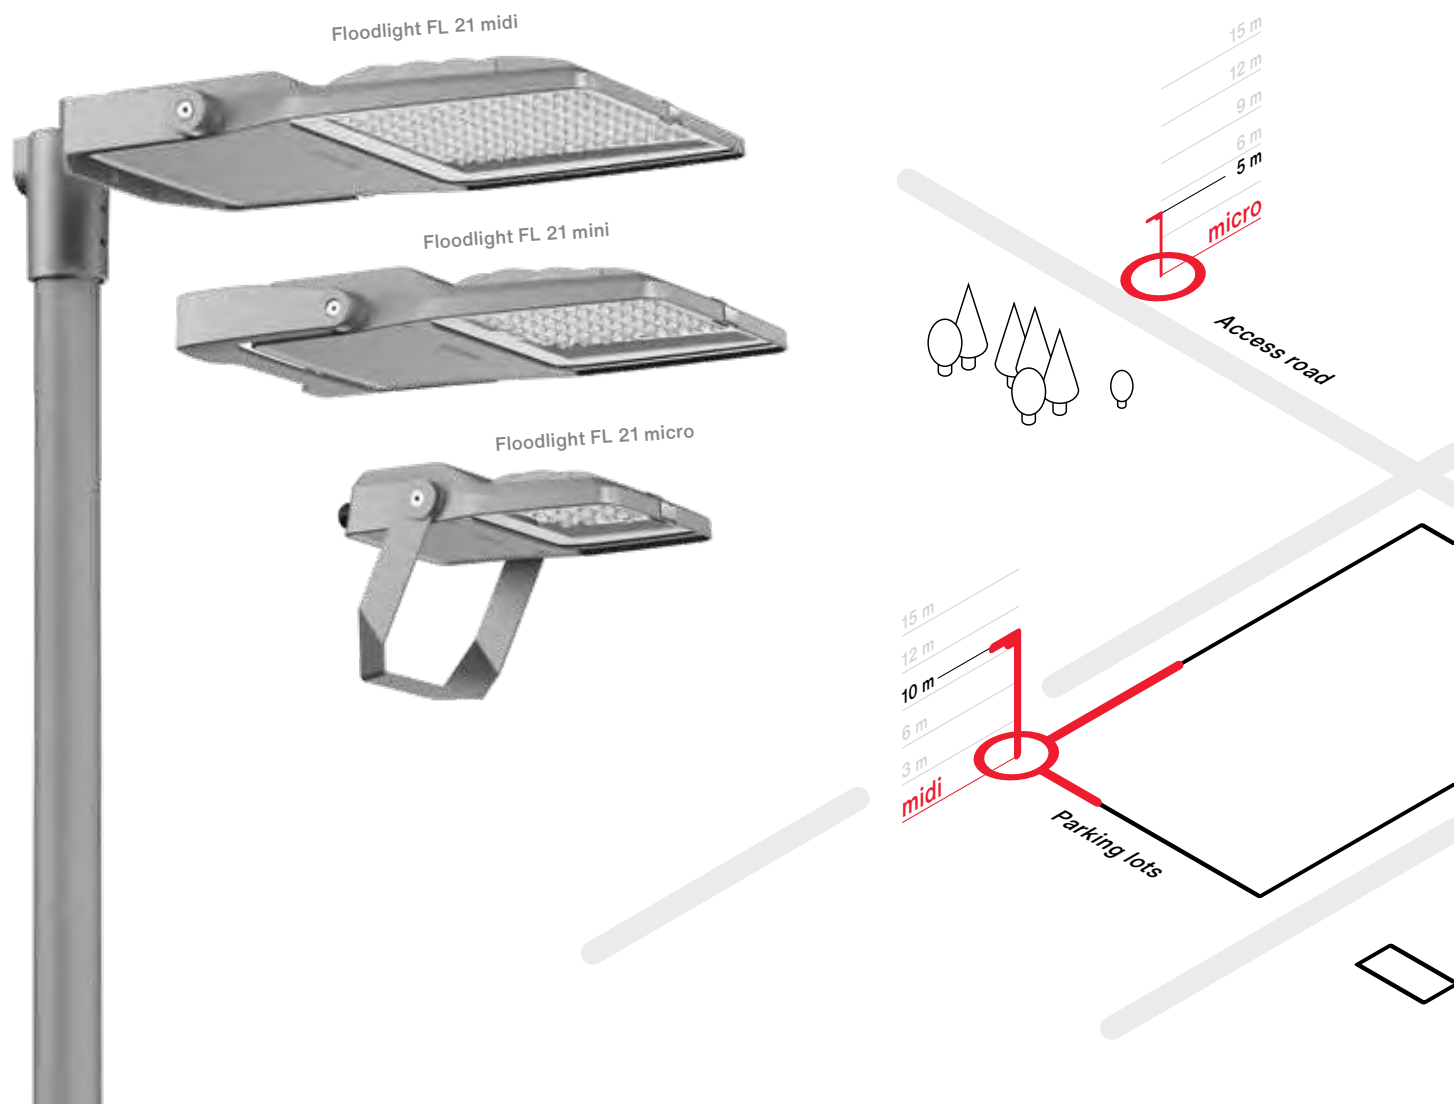

# Floodlight FL 21. A family that's flexible like never before.

Floodlight FL 21: The SITECO product family is well known for its lighting quality and reliability. And thanks to this product line's robustness, perfect for parking areas, halls, industry, sports and recreation. The latest generation is more intelligent, more flexible and more environmentally conscious than ever before.

Three sizes. One shared, consistent design. And all the details that modern lighting needs: Like, for example, abundant models for connecting and brand-new control features. This makes light not only flexible, but smart as well.

**Floodlight FL 21: the versatile multitalent with a high IQ!**

**As smart and convenient as you want it to be.**

Fulfills your individual requirements: With DALI, multilumen, Smart Interface and SITECO iQ, Floodlight FL 21 is ready for every scenario. How smart would you like it to be?

**A versatile design.**

Simple support bracket or stylish design bracket? Whether your project involves mast-top mounting or mast-side mounting or even mounting two floodlights on a mast: Floodlight FL 21 flexibly meets your installation requirements as well.

**Environmentally friendly down to the smallest detail.**

“Green” lighting addresses many issues related to environmental protection: Separable materials and exchangeable components. The right kind of packaging. Floodlight FL 21 stands for all this and consequently makes a real contribution to environmental protection.

## Flexible installation? And how!

Hardly any other floodlight family boasts as much flexibility and versatility as Floodlight FL 21. No matter if mounted on a wall, crossbars or a mast. No matter if mounted low or high on canopies and facades. FL 21 masters different looks equally well: stylish using a design bracket and reserved using a support bracket as well as powerful when you mount two floodlights on a mast.

**Installing Floodlight FL 21 is also more flexible than ever before.  
And always meets your needs.**

**Bracket and mast connections  
as well as accessories at a glance:**

**Bracket luminaire**

**Design bracket**

**Support bracket**

**Mast luminaire**

Used for both mast-top- and  
mast-side-mounted luminaires.

**Mast flange**

**Mast bracket**

**Single/dual connection** for all sizes

- Mast flange for 76 mm, 60 mm and 42 mm
- Available for mast-top- and mast-side-mounted models

# Used everywhere. Always indestructible.

This floodlight is not made of sugar:  
Salty spray, chlorinated water, emergency  
operation: Floodlight FL 21 holds its own  
no matter how tough the environment.

The floodlight provides homogeneous  
illumination to help with quick orientation  
and safe maneuvering and loading.  
And it creates the kind of atmosphere  
where you can let off some steam and  
join in the excitement.

## **Weather resistant.**

Those who work hard need reliable  
support. Boasting a **C5 corrosion  
protection class** and **IP66 rating**, the  
FL 21 is a reliable floodlight even under  
extreme conditions.

## **Increase safety exponentially.**

Out on a parking lot in the evening hours?  
The right lighting makes the experience  
feel much safer. Floodlight FL 21 provides  
homogeneous illumination all the way into  
the most remote corners – thanks to the  
new PL64 and PL33T light distribution  
system. A further advantage: The FL 21  
is **DC capable** – and that means you can  
count on the floodlight when it's in  
emergency operation.

Available in  
5,700 K,  
CRI 90

**Tough as nails.**

Where sports are played and the balls come flying fast, your lighting system has got to be able to take it. That's why the FL 21 midi has been thoroughly tested to ensure it's **ballproof**.

**Glare-free.**

In demanding environments, you need outstanding **glare-free lighting**. The solution for swimming pools is called **Mirrortec**: The floodlights disperse light through a multifaceted system, producing an **especially uniform** light distribution. A further advantage: The series version of Flood-light FL 21 is already resistant to chlorine.

# Made for extremes.

While always working  
at top efficiency.

**Absolutely exceptional:** IP66, IK08,  
CE certified, ENEC certified,  
D-mark certification, ballproof,  
suitable for swimming pools.

**Durable, exchangeable materials,**  
including non-yellowing PMMA  
lenses and glass cover.

**SITECO iQ Street Remote:** Light level can  
be suitably and conveniently adjusted over  
Bluetooth and the iQ app according to use.

● **Maximum glare control** thanks to an excellent asymmetric light distribution system.

● **High thermal stability:** up to 50 °C outdoors, 40 °C indoors.

● Exceptionally steady luminaire due to **high vibration stability**. Perfect for outdoor use in very exposed areas.

● **Extreme snow load stability** with a pressure load of 400 kg/m<sup>2</sup> – that means a snow load zone with snow depths of up to 1.5 m.

● Luminaire that preserves the natural darkness of night **with zero light pollution** and a warm white light color.

**Light. Right where  
it's needed.**  
Without disturbing  
residents or nature.

**0%**  
light pollution

# Gentle on the environment like never before.

Light has a special responsibility to assume as human settlements encroach more and more on the habitats of wildlife. And SITECO does as well.

The FL 21 luminaire family directs its light downward with maximum precision. The night sky remains dark, adjoining areas, too.

But environmental protection starts even earlier at SITECO: We don't glue materials together, which means components can be separated by type. Our deliveries come in reduced packaging free of Styrofoam.

### **Targeted with no light pollution.**

Thanks to an asymmetrical light distribution system, FL 21 floodlights direct light with targeted precision onto the respective surface – and only there. Without scattered light or light pollution to contend with, the sky remains dark and nature and the neighborhood undisturbed.

### **Environmental protection – through and through.**

Not only does the design score points thanks to a flexible modular system.

Modular thinking also infused the FL 21's inner values: The ECG and LED module are cleanly separated, which makes replacing the components easy.

**Securely packaged.**  
The FL 21 is shipped without using Styrofoam and plastic.

# Smart like never before.

The FL 21 luminaire family makes everything possible, letting you use a conventional control over DALI or a networked solution.

Smart Interface transforms your lighting into a future-proof control center. It communicates with many standard radio-based control systems and sensors. This is where SITECO iQ, the patented control electronics we developed in-house, delivers big by helping you unleash the full potential of intelligent control.

You can conveniently manage everything using the iQ app.

### Auto Match

Exchange ECGs in no time – without reprogramming.

### Desk Remote

Adjust luminaires in the workshop without opening any luminaires or shipping boxes.

### Street Remote

Configure luminaires from the sidewalk or from a vehicle “on the fly.”

### Color Switch

Get prepared now for future environmental and animal-protection guidelines and be able to react flexibly.

### Light Switch

Boost visibility and safety for road users when the weather changes.

### Smart Wire

Dim using existing control wires and intelligently switch between dim profiles, light colors and light distributions.

### iQ app

With a smartphone, always have the full range of functions at your fingertips.

### Lumen Switch

Flexibly adapt the luminaire’s luminous flux to its location as well as accommodate residents’ requests.

### Night Set

Automatically adjust nighttime reduction to multiple levels and switch between two profiles. (for example, weekends and weekdays)

### Surge protection

With integrated surge protection, ensure your luminaires enjoy a long life.

### Smart Interface

Using standardized Smart Interface, intelligent functions can be combined according to Zhaga book 18.

### Light Fading

Ensure a pleasant city atmosphere with soft dimming and no irritations.

### CLO 2.0

Constant luminous flux control from SITECO takes into account ambient temperatures and dimming. This also helps to save energy.

### Temp Guard

Reliably protect luminaires against overheating and ensure a long service life even at high temperatures.

### Fuse Plus

Keep existing circuit breakers and use them for additional luminaires.

# SITECO iQ CLO 2.0

## As much light as needed – automatically.

Wind, rain and temperature impact the amount of power needed to maintain a constant luminous flux. The lower the ambient temperature, the less power LEDs have to consume to achieve a given luminous flux level. This means that at ambient temperatures below 25 °C, the luminous flux of typical LED luminaires producing a consistent intensity will be higher than planned – and more energy will be used than is necessary.

SITECO CLO 2.0 controls the current feed and accounts for outside conditions, thereby ensuring there's always exactly as much light as is really needed. In concrete terms, this means potential energy savings of 7 %!

Readjustments are made continuously depending on the surroundings and dimming behavior.

CLO 2.0 provides up to

**7 %**  
energy savings

# SITECO iQ

Because we know  
what challenges you  
are facing every day.

**Smart-Interface**

**Intelligent light at its peak – for maximum future viability.**

**Street-Remote**

**Intelligent features – for maximum convenience in everyday use.**

**Lumen-Switch**

**CLO 2.0**

**Light-Fading**

**Temp-Guard**

**Surge Protection**

**Fuse-Plus**

**Intelligent foundation – for maximum efficiency.**

## Get started today with SITECO Connect

### **From simple control to a connected system.**

Ready when you are: You decide when and what steps you want to take to upgrade to modern control technology. Floodlight FL 21 and Smart Interface give you complete flexibility. You can gradually adopt the control technology and retrofit elements at any time.

Floodlight FL 21 lets you think in terms of planning options. Smart Interface provides standardized interfaces according to Zhaga Book 18 and D4i as well as NEMA, so that many radio-based control systems and sensors are compatible and plug & play installation is possible at any time.

This gives you independence and future-proofs your lighting systems.

# 100% flexibility

## SITECO Connect 31: Single luminaires

- Individual luminaires are activated or dimmed with a local motion detector.

Configure and diagnose on-site with a USB transmitter on a laptop

## SITECO Connect 21: Several luminaires connected locally

- Several luminaires are connected via radio.
- The luminaires in the network communicate and synchronize among themselves.
- The luminaires are synchronously or continuously activated and dimmed.

Collimate and diagnose using web remote access

## SITECO Connect 11: Several luminaires connected with remote access

- The luminaires are connected via radio.
- Settings can be defined from the office through the network with remote access and status messages sent automatically.
- Existing inventory and workflow systems like luxData by sixData can be used as a master.

## Modern lighting control offers many advantages

Improves traffic safety and protects against vandalism

Contributes to sustainability by protecting environmental resources and wildlife

Boosts energy efficiency thanks to needs-based dimming

Optimizes operational management using current diagnostic data and documented systems

# Our light distribution systems. Precise as always.

Uniform, efficient and exceptionally precise: Floodlight FL 21 delivers the latest generation of planar lighting thanks to powerful LED units and state-of-the-art lens technology. Facades and advertising spaces can also be dramatically presented. The precisely calculated light distribution options streamline work for planners, too: The name already indicates the maximum width and depth of the beam spread.

**For improved light through precise planning.**

## Light distribution options

Planar lighting		
1st position in name Typical application area	2nd position in name Wide beam spread with its factor to the light point height	3rd position in name Narrow beam spread
PL = planar	4	3
	5	2
	6	1

Spotlight illumination	
1st position in name Light characteristic	2nd position in name Half scattering angle specified in degrees
RS = rotationally symmetric	17

W = width  
Narrow beam spread

**PL43** – to illuminate areas using a narrow beam spread

**PL52** – to illuminate wide streets and parking areas

**PL61** – to illuminate streets with widely separated light points

**PL64** – to illuminate areas using a narrow beam spread

**PL33T** – to illuminate corners

**RS07 | RS08 | RS12** – to use with Mirrortec applications and halls

# Saving energy is teamwork.

How much work may we take off your hands?

## + Light audit

Our experts will take a look at your existing set up and define the individual requirements for the new plant with you on site. + Reduction of operating costs and CO<sub>2</sub> + Investment and payback

## + Planning

Tailored exactly to your needs, we develop a lighting concept or a customized solution – so that you can benefit from outstanding and sustainable lighting and control technology. + Lighting design + Lighting and electrical concept + Customizing solution

## + Project management

Everything from a single source – you have exactly one point of contact: your project manager. They handle the formalities and coordinate all steps – so that everything happens just in time, and everyone is well-integrated. + Project coordination and control

## + Financing

With our individual financing solutions, you save money from day one. The term is flexible and depends entirely on your needs. In addition, we prepare the efficiency proof of at least 50 % CO<sub>2</sub> savings for the funding application. + Government funding consultation + Financing

## + Service

You decide whether we handle the installation through our network of installation partners. If desired, we can also fully operate your system. + Installation and commissioning + Maintenance and servicing

Choose and combine these five service modules entirely according to your needs.

All tailored to your preferred level of service.

## Contact.

PATENTED DESIGN

# WALL DENVER™ iD

**The Denver iD: Wall** combines a cohesive family aesthetic with an unrivalled system performance - perfect for creating the ideal design-inspired landscape.

Featuring a patented Transition Zone the Denver iD: Wall offers improved visual comfort and lower perceived glare; perfect for the unique requirements of pedestrian-friendly amenity spaces.

Coupled with the latests LED technologies, smart controls integration and class-leading optical performance the new Denver iD: Wall truly brings together form and a feature rich luminaire system.

The Denver iD: Family consists of Pole, Wall and Bollard luminaires, offering the complete solution to your next outdoor environment.

For over 125 years Holophane has enjoyed an enviable reputation throughout the world for expertise, quality and innovation in Lighting. From the earliest days, when the company pioneered its famous glass refractor, the Holophane name has been ever present as a leader in the field of luminaire and lighting design. **Denver iD: Wall** is a continuation of this proud tradition and builds on our heritage of designing luminaires with exceptional optical performance and thermal management which fused together deliver a solution that is future-proof and fully serviceable.
