

# Site – 50 – 51 (Amber Lakes / ???)

## Summary

- Round 4 Strategic Noise Maps indicate that only small areas of Site 50 exceeds 55 dB  $L_{Aeq,16h}$ , 93% of the area below the screening criterion is also below 50 dB  $L_{Aeq,16h}$ .
  - However, following review of Heathrow 2023 noise contours air noise levels reach 60 dB  $L_{Aeq,16h}$  based on average modal split contours, 60 dB  $L_{Aeq,16h}$  during westerly operations.
  - This Site does not align with the adopted criteria.**
- Small areas of Site 51 exceed 55 dB  $L_{Aeq,16h}$ , 28% of the area below the screening criterion is also below 50 dB  $L_{Aeq,16h}$ .
  - However, following review of Heathrow 2023 noise contours reach 60 dB  $L_{Aeq,16h}$  based on average modal split contours, 60 dB  $L_{Aeq,16h}$  during westerly operations.
  - This Site does not align with the adopted criteria.**
