

Ickenham Residents Association Comments – Dec 2023

On behalf of Ickenham Residents' Association We support the relocation of HOAC to a suitable site. However we acknowledge the serious concerns of the Herts/Middlesex Wildlife Trust about the potentially serious impacts of the proposal on wildlife at this SSSI site. We note that the proposal only delivers 3% biodiversity net gain. Should LBH decide to grant permission, we suggest that should be upped to at least 10% via condition, in line with national policy.
