Tree work at 39 Parkfield Rd, Ickenham, UB10 8LW

T1- Oak tree located at the rear garden of the property, to crown reduce the height by up to 3m and reduce the sizes by up to 2m or to the nearest pruning points. Remove epicormic growth from the main trunk, remove dead-wood.

This will manage the overall size of the tree and reduce wind resistance to prevent storm damage while preserving the trees natural shape. With the tree being so close to the neighbouring houses this reduction will be beneficial.

There is also a cavity right at the base, with a depth of 1100mm as shown in the photo below.
