1. The post and rail fence helps to divide ownership between private and public. It defines the garden space. It is a natural structure (Which is found onsite). The post and rail fence is to be a traditional chestnut fence with morticed joints. It also allows a degree of permeability.
2. Trees and hedges are pulled some 12 m away from the face of the barn. The hedge is at a lower level, a granite sett edge divides the lawn in two. The hedge would be maintained at heights no greater than 1.2m. We have proposed a native hedge to try and increase opportunities for biodiversity. This hedge is typical of the existing landscape character.
3. Tree species – With climate change being an ever important factor, the cumulative effect of planting more trees helps to increase carbon storage. Please refer to this link by the woodland trust for further information. The trees used have tight light canopies, thus permeability through is maintained. They also bear small fruit which again improves opportunities for biodiversity.

Amar,

27256/APP/2021/3759 MANOR COURT Details of Landscaping in compliance with
HIGH STREET condition 6

Objections have been received to the landscaping scheme from Historic England and Harmondsworth Conservation Area Advisory Panel, which are set out below.

Historic England

I am writing on behalf of the English Heritage Trust. This organisation, a charitable trust established in 2015 to conserve and present the 420 historic buildings and ancient monuments in State care in England, is therefore responsible for managing the Great Barn of Harmondsworth. I am writing as 'occupier' of this building, which is the property of Historic England. Public access is managed by the Friends of the Great Barn at Harmondsworth. Harmondsworth Barn is Grade I listed and has exceptional architectural and historic interest. Built in 1426

by Winchester College as part of its manor farm at Harmondsworth, the oak-framed barn is an outstanding example of medieval carpentry and contains one of the most intact interiors of its era. It was rescued by English Heritage after years of neglect.

English Heritage does not appear to have been consulted on this application directly by the London Borough of Hillingdon. I would be grateful if you could please directly consult us on all planning applications which may impact on the setting of the barn.

English Heritage wishes to object to some aspects of application 27256/APP/2021/3759 (approval of details for 27256/APP/2017/3721).

We are concerned that the Grade I listed barn is not shown on the proposed landscaping plan.

However, a Beech hedge is proposed to be planted directly against the footings of the barn physically blocking access to the 3 pairs of entrance doors and visually obscuring the barn. A row of 6 trees are also proposed along the length of the barn. The hedge and trees would be incongruous features for what was historically an open farmyard setting, which remains appreciable, and harm the significance of the barn.

Vegetation in such close proximity to a medieval barn could lead to problems with root penetration, subsidence, overshadowing and leaf litter fall which could lead to the physical decay of the structure and make adequate maintenance more difficult to achieve.

HCAAP

I am writing on behalf of the Harmondsworth Conservation Area Advisory Panel and the Friends of the Great Barn at Harmondsworth.

We are concerned to see the current proposals for landscaping are very different to those submitted as part of the original planning application (27256/APP/2017/3721). The new landscape plan does not show the Grade I listed Great Barn (though the outline if its parking area is shown) so the negative impact of the proposed planting on its setting cannot easily be appreciated. The proposed hedge (of unspecified height) and row of six trees running north-south down the boundary between the land belonging to the Barn and that belonging to the L-shaped building to the north of the site is completely unacceptable as it will obscure views of the Barn and will break up the open 'farmyard' area that was carefully preserved when the L-shaped block was given permission in the late 1980s. We also find it strange that it is proposed to install a post and rail fence along the blank wall on the north-west end of the L-shaped building and along the south border of the garden to the studio flat as there is an existing metal estate fence dividing the land around the Barn from the proposed garden area to the north. We also note that the existing trees to the northwest are not within the development site but on land belonging to the Great Barn.

Given the above objections, officers are unable to recommend discharge of the relevant condition.

I would therefore request that your landscape consultant addresses the above concerns and resubmit a revised scheme accordingly.

27256/APP/2021/3759 MANOR COURT Details of Landscaping in compliance with
 HIGH STREET condition 6

CONDITION 6: Landscape details Landscape proposals have been prepared by Studio Loci. Plans include a general layout plan, ref. 10216-GA-01 Rev 1 showing the general disposition of hard and soft landscape types. Planting plans 1 and 2 of 2 show the general layout of plant typologies (as above) with schedules of plants added. However, the details are incomplete because there is no labelled planting plan to explain which species are to be planted where?

Existing structure planting (trees and hedges) is indicated on plan but should be labelled for the sake of clarity.

Drawing ref. 18216-DT-CD-01 Rev 1 provides a typical tree planting pit design. A landscape management plan (document) specifies the main operational requirements to establish and maintain the planting. The plan includes the monitoring and replacement of any plants that fail. At 3.4 the plan specifies the attention to tree stakes and ties, however, the tree planting detail shows underground guying - which obviates the need for tree stakes? There is no supporting planting specification (document).

RECOMMENDATION Further details and clarification are required to ensure that the LPA (and the landscape contractor) understand what is proposed and to secure a robust and high quality scheme when completed.
