Planning Application Type:

Householder

Introduction & Context

Description of Proposed Works

Proposed ground floor rear extension, side extension, floor plan redesign and all associated works at 30 Hillside Road.

Parking Provisions

Due to the nature of this development involving conversion of the existing garage. Alternative parking arrangements have been carefully considered and located to the driveway to allow for sufficient parking spaces (3/4 cars).

This is done by re-designing the front driveway so the ramp is demolished as it is no longer in use by the new owner.
