Apply 3 coats, allowing 4 hours in between

Coverage

Up to 6 m2 per litre

Application

Brush on

When to use it?

Use it on a warm clear day

How to use 10 Year Woodstain

Before you start

Sand the wood with 120 grit paper. Wear a mask to avoid inhaling any dust. Wipe away dust with white spirit and leave to dry. Stir well before use and test on a small area to check you are happy with the colour.

Application

Use a synthetic brush and apply 3 coats in the direction of the grain. Leave 4 hours between each coat and lightly sand with 240 grit paper before the final coat.

Aftercare - Cleaning

Remove any woodstain from your brush and wash in warm, soapy water. Don't put any left over woodstain down the drain or into watercourses. Your local authority may have facilities to get rid of unused woodstain.
