Wall Mounting Cycle Rack

from **£22.23** ex VAT

£26.68 incl. VAT

🚚 **2 to 3 Day Day Delivery**

The Wall Mounting Cycle Rack provides a compact and flexible solution for locking bicycles at schools and workplaces, as well as in public locations such as busy high streets or town centres. It is suitable for bicycles with a maximum tyre width of 50mm and is manufactured from zinc plated steel for maximum durability.

Each rack can be adjusted 180 degrees which makes it easy to store bikes in areas with limited space as it enables the bicycle to be stored from all angles. This product comes supplied fully assembled with two pre-drilled fixing holes and all the necessary wall fixings for secure mounting.

Features

- Top Selling Zinc plated steel constuction wall-mount unit
- Adjustable through 180 degrees.
- Suits all types of tyre up to 50mm.
- Fully assembled.
- Easy installation

Wall Mounted Cycle Rack for Various Locations

Cycle storage is an important part of modern life, and this wall mounted cycle rack allows businesses and organisations to open up their location to cyclists in need of a safe place to put their bike. Cycle storage rack wall mounting is a viable alternative to fixed floor cycle racking as it takes up less space while still offering cyclists the option to leave their bicycle in a specific location. In contrast to other types of bike storage, the wall mounted cycle rack is both unobtrusive and practical, allowing organisations of all shapes and sizes to be bicycle-friendly without equipment getting in the way or breaking the bank.

Adjustable Wall Mounted Cycle Rack

This wall mounted cycle rack is adjustable, allowing it to fit into unusual spaces without compromising on the security of the bicycles it's protecting. Suitable for cycles with a maximum tyre width of 50mm, the rack itself can be adjusted 180 degrees to allow bicycles to be stored at different angles. This makes it ideal for cycle storage where space is limited, as bikes can be angled to point in one direction or another. For example, two of these wall mounted cycle racks next to each other could be adjusted so the bicycles were closer to the wall rather than standing out into the pavement.

Where to Use the Wall Mounted Cycle Rack

The beauty of this cycle rack is that it can be used almost anywhere as long as there is a wall to allow for mounting. Cycle storage rack wall mounting can be undertaken in premises as diverse as schools, public car parks, retail parks and the exterior of industrial premises such as factories or warehouses. It's a low-cost and low maintenance way of providing cycle storage, and it can be used to extend cycle storage options if existing racks have reached capacity. This wall mounted cycle rack is supplied fully assembled and comes with two pre-drilled holes for easy mounting to the wall. It also comes complete with all necessary fixings to allow for secure wall mounting.
