WE

GERANIUM MACRORRHIZUM
Also known as Cranesbill. Semi-evergreen with bright pink-red flowers from May-July.

HEUCHERA 'FROSTED VIOLET'

Beautifully marbled dark leaves with light pink to pink flowers between June-August.

HELLEBORUS FOETIDUS
The Helleborus foetidus is an evergreen plant with deeply incised leaves resembling palm leaves. The plant blooms from December/January into spring and produces green/yellow flowers.

PLANTGUIDE

OUTDOOR PLANTING

HEUCHERA 'LIME RICKEY'

Softly ruffled and ruffled lime green leaves that retain their bright colour. Small bell-shaped white flowers appear in late spring on slender stems.

HEUCHERA 'MARMALADE'

Also known as the Purple Bell. Striking leaf color and the leaves are curled and show beautiful cream-white flower clusters between June and September.

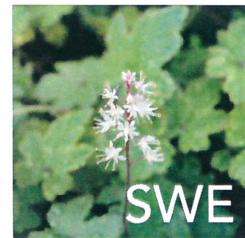

HEUCHERA 'OBSIDIAN'

Striking dark purple-red leaf colour and the leaves are curled at the leaf edge and show beautiful white flower clusters between June and September.

TIARELLA 'BRAVEHEART'

Clump-forming, semi-evergreen perennial with rosettes from heart-shaped to broad oval, deeply lobed, bright to yellow-green leaves with maroon-marked veins. Dense, upright racemes of fluffy, pale pink flowers appearing from late spring to summer.

TIARELLA CORDIFOLIA

Also known as foam flower or Persian cap. Ground cover perennial with a pale pink plume-shaped flower. Reaches 20cm height and flowers between April and May.

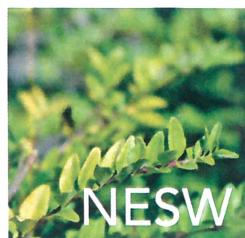

VINCA MINOR

The Vinca minor is a strong evergreen ground cover plant. Blooming very early in the spring with blue flowers, Vinca suits both sunny and shady spots. The Vinca will produce more flowers in the sun than in the shade.

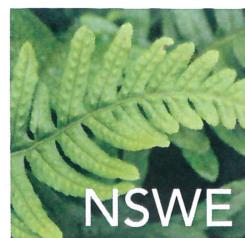

HEUCHERA 'PARIS'

Decorative leaves with dark leaf veins. The lobed leaves are mint green, covered with silver markings. The stems of the deep pink flowers grow longer in late spring.

LONICERA NITIDA 'MAIGRUN'

The Lonicera nitida 'Maigrun' is a hardy evergreen shrub. The leaves are small and shiny. It is an easy plant that can be planted in any aspect.

POLYPODIUM VULGARE

Also known as the Common Oak Fern. Evergreen with leathery leaves and orange traces on the bottom. Reasonably drought tolerant, likes partial shade and grows up to 30 cm high. Does not tolerate lime in the soil.
