

Setting out dimensions,
walls and levels to
architects' drawings

GENERAL NOTES

- The drawing is copyright (C).
- The drawing is to be used in conjunction with all relevant drawings and specifications.
- Dimensions shall be taken to the face of the wall unless otherwise stated. All dimensions are shown in millimetres unless otherwise stated.
- Dimensions and conditions shall be verified on site. Any discrepancy between the drawing and the site conditions shall be brought to the attention of the Engineer for resolution prior to starting work on the work.
- All work shall comply with the Building Regulations and the requirements of the Local Authority.
- Dimensions indicated shall be to be confirmed on site.
- For materials of other size see the specification.
- The design is based upon the assumption that the ground is firm and stable. It is the responsibility of the contractor to ensure that the ground is suitable for the proposed work. The contractor shall be responsible for any ground improvement work required.
- Materials shall be of the best quality and shall be suitable for the intended use.
- Site requirements to new steel frame to be checked for compliance with relevant design.
- Structural steelwork shall be of the best quality and shall be suitable for the intended use.
- Structural steelwork shall be of the best quality and shall be suitable for the intended use.
- Site of all materials and fittings (except those noted otherwise) shall be in accordance with the relevant specifications.
- Steel frame ground level shall be confirmed on site.

Setting out dimensions,
walls and levels to
architects' drawings

GENERAL NOTES

1. The drawing is to be used in conjunction with all relevant drawings and specifications.
2. This drawing shall be the basis for all construction. All dimensions are shown in millimetres unless otherwise stated.
3. Dimensions and conditions shall be verified on site. Any discrepancies between the drawing and the site shall be reported to the Engineer for resolution prior to starting work on construction.
4. All work shall comply with the Building Regulations and the requirements of the Local Authority.
5. Dimensions indicated shall be to be confirmed on site.
6. For materials of other size see any contract.
7. The design is based upon the assumptions (details) indicated. It is intended to be 100mm L200 in cross section and 100mm deep. It is intended to be 100mm L200 in cross section and 100mm deep. It is intended to be 100mm L200 in cross section and 100mm deep.
8. Materials shall conform to the relevant standards. All materials shall be of the highest quality and shall be suitable for the intended use.
9. Site requirements to use steel beams to be checked for in conjunction with required. Site design shall be checked for in conjunction with required. Site design shall be checked for in conjunction with required.
10. Structural responsibility of foundation shall be confirmed by required. Structural responsibility of foundation shall be confirmed by required.
11. All work shall be completed by 15th May 2025. All work shall be completed by 15th May 2025.
12. Site of all materials and loading (heavy) must be confirmed by required. Site of all materials and loading (heavy) must be confirmed by required.
