

## **Wedland Roof Lantern – Grey aluminium**

A Wendland roof lantern provides a stunning focal point for any kitchen, living room or dining room. Designed to draw plenty of daylight into your room with its 20° pitch, a Wendland lantern makes your new room bright and airy. Thanks to a strong ridge the Wendland lantern has less bars than other lanterns and with a host of clip-on features there are no visible fixings. Put simply, this means that the lantern looks both neat and stylish.

Wendland lanterns are packed with thermal features to avoid condensation build-up. From the thermal rider rail to the thermal clips, these features combine to ensure excellent performance, especially important in a kitchen where heat levels can change quickly. Made to measure, the lanterns are perfect for any flat roof extension or orangery and are available as standard aluminium (grey, white or black) external and PVCu (grey or white) internal. Available in rectangle and square.

Manual or electric opening modules can be supplied for the Wendland Roof Lantern, the minimum lantern dimensions with opening option would be 2096mm x 1457mm, please contact us for a custom quote.

A Wendland Roof Lantern is a high-quality lantern that can be installed on almost any kind of commercial or residential flat roof. Designed with ease of installation as a top priority, this roof lantern offers owners a convenient and cost-effective way to improve both the interior and exterior of their properties. In addition to allowing more natural light to find its way inside your home or business premises, a Wendland Roof Lantern is guaranteed to add kerb appeal to your property. All lanterns are made to order, which means you can specify the type of glass and frame colours you desire when making your purchase.

### **Durable, High Performance Roof Lanterns**

The hardwearing uPVC frames and toughened glazing these roof lanterns boast help to guarantee their longevity. Each unit is supplied with a 10-year warranty that covers material and manufacturing defects but, in normal use, you can look forward to many more years of use than the warranty might suggest. With a UV-resistant thermal cap, they are also less susceptible to colour fade than many other roof lanterns, helping to reduce your long-term building maintenance costs.
