| <b>Introduction and Site Activities</b>                         | <p>In April 2011, SKM Enviros were commissioned to undertake a Phase 1 environmental assessment at Hyde Park, Hayes (HPH, the site) on behalf of Melford Capital General Partner LP, c/o Melford Capital Partners LLP to support acquisition. In May 2011 SKM Enviros was also commissioned to undertake a round of groundwater monitoring on existing wells at the site.</p> <p>In March 2012 SKM Enviros were commissioned to update the Phase 1 environmental assessment and provide it in a suitable form for submission to the London Borough of Hillingdon (LBH) to obtain planning permission to develop three disused areas of the site. It is understood that the existing office accommodation and car park will continue with current use and that three cleared areas will be developed into offices and a hotel.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |               |          |
| <b>Location</b>                                                 | The site is located off North Hyde Road and Millington Road, approximately 1.5 miles north of junction 3 of the M4 motorway west of London.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |          |
| <b>Surrounding Land Uses</b>                                    | Residential housing is located to the north, west and south east, a large area of vacant land to the east, light industrial estates to the south and industrial units to north-east.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |          |
| <b>History</b>                                                  | <p>Initial development by mid 1930s, continuing until late 1960s, as part of adjacent aeronautical works. Development from 1970s onwards with various warehouses and subsequent offices and car parking.</p> <p>Potentially contaminative development in the surrounding area included the aeronautical works, warehouses and offices.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |               |          |

| <b>Regulatory issues, environmental data, previous reports.</b> | <p>On-site Registered Radioactive Substances entry – relating to 7E &amp; 7F Millington Road. The authorisation is indicated to have been superseded by a variation however no further details are provided.</p> <p>A contemporary trade directory entry also exists relating to a fuel station outside the proposed application area. The local authority were contacted with regard to this and informally indicated that it had a capacity of 22,000 litres and was installed in approximately 1975. The tank is understood to have been decommissioned by filling with soil/ foam.</p> <p>Phase 1 desk study and Phase 2 site investigation reports completed by Delta Simmons in 2005 / 2006 were provided for review. The reports identified localised contamination of soil by heavy metals and groundwater by VOCs and TPH. Slightly elevated carbon dioxide was also recorded on one occasion. The overall risks associated with the site were considered to be low as the site was mainly covered with hardstanding and the relatively low sensitivity setting of the site with respect to controlled waters. Recommendations included a further round of groundwater monitoring and provision of information to any groundworkers in relation to the potential to encounter contamination.</p> |               |          |

|                            | Historic site use (including aeronautical works)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Groundworkers during redevelopment     | Moderate / Low |
|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Future site users of offices and hotel | Moderate/Low   |
|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Groundwater                            | Moderate       |
| <b>Overall Conclusions</b> | <p>The historic use of the site and the surrounding area has the potential to impact sensitive receptors on and in the vicinity of the site.</p> <p>The risks to human health receptors from historic use of the site are assessed as Moderate/Low for construction workers and Low for future site users. The risks to controlled waters are assessed as Moderate. This reflects:</p> <ul style="list-style-type: none"> <li>■ The historic use of the site and surrounding area;</li> <li>■ The presence of localised elevated concentrations of lead, cadmium and copper as well as slightly elevated SVOCs, VOCs and TPH were identified in localised soil samples when compared to guidelines for commercial use;</li> <li>■ Groundwater sampling in May2011 confirmed the presence of elevated concentrations of VOC and metals in upgradient boreholes; and,</li> <li>■ The proposed redevelopment of the site for low sensitivity office and hotel use.</li> </ul>                                                                                                                                            |                                        |                |
| <b>Recommendations</b>     | <p>Based on assessment contained within this report we have the following recommendations:</p> <ol style="list-style-type: none"> <li>1) Submit this Phase 1 desk study and a site investigation scope of works to the LBH contaminated land officer and to the Environment Agency as part of pre-planning application discussions.</li> <li>2) Complete a ground investigation to assess the potential for contamination to impact future use of the site within proposed development areas, including additional wells in the centre of the site and along the upgradient boundary to assist in further groundwater risk assessment. Given the history of the site this would be required as part of any planning application.</li> <li>3) After grant of planning permission, supply a remediation method statement outlining the remediation works to mitigate or eliminate potential source-pathway-receptor linkages.</li> <li>4) After completion of any required remediation work, supply to the LBH contaminated land officer a validation report providing evidence of agreed remediation works.</li> </ol> |                                        |                |

# 1. Introduction

| Aspect               | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Background</b>    | <p>In April 2011, SKM Enviros were commissioned to undertake a Phase 1 environmental assessment at Hyde Park, Hayes (HPH, the site) on behalf of Melford Capital General Partner LP, c/o Melford Capital Partners LLP to support acquisition. In May 2011 SKM Enviros was also commissioned to undertake a round of groundwater monitoring on existing wells at the site.</p> <p>In March 2012 SKM Enviros were commissioned to update the Phase 1 environmental assessment and provide it in a suitable form for submission to the London Borough of Hillingdon (LBH) to obtain planning permission to develop three disused areas of the site. It is understood that the existing office accommodation and car park will continue with current use and that three cleared areas will be developed into offices and a hotel.</p> |
| <b>Site Use</b>      | The site is currently occupied by three recently refurbished office buildings, HPH1, 2, and 3, and three areas HPH4, 5 and 6 awaiting redevelopment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Objectives</b>    | <p>The objectives of the work are to:</p> <ul style="list-style-type: none"> <li>Assess the presence, likely extent and nature of potential environmental hazards;</li> <li>Undertake a qualitative environmental risk and liability assessment; and,</li> <li>Identify further works and actions, if any, to clarify manage and mitigate land quality risk for the purposes of fulfilling the requirements of a planning application with the LBH.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Project brief</b> | For the purposes of this report, SKM Enviros has reviewed commercially available information held on an environmental database from Landmark Information Group (Appendix A). Information on potential historical sources, current site use from a site inspection, regulatory data, previous Phase 1 desk study and Phase 2 site investigation reports, groundwater monitoring (May 2011) and site sensitivity information have been used to undertake a preliminary risk assessment.                                                                                                                                                                                                                                                                                                                                             |
| <b>Limitations</b>   | This report represents the findings and opinions of experienced environmental consultants based upon the information obtained from a variety of sources as detailed within the report. SKM Enviros believes the information obtained from third parties is reliable but does not guarantee its authenticity. The information has been accepted <i>de facto</i> but we have used our professional judgement in its interpretation.                                                                                                                                                                                                                                                                                                                                                                                                 |

| Site Area             | HPH4 – 3,585m <sup>2</sup><br>HPH5 – 5,580 m <sup>2</sup><br>HPH6 – 3,903 m <sup>2</sup>                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Site Description      | <p>The three areas are located off North Hyde Road and Millington Road, approximately 1.5 miles north of junction 3 of the M4 motorway west of London. A Site Location Plan is presented as Figure 1.</p> <p>The three areas under consideration (HPH4-6) are irregular in shape and comprise open ground formerly covered by warehousing as shown by Figure 2.</p> <p>They are surrounded by three multi-storey office blocks (HPH1 (The White House), HPH2 (The Courtyard) and HPH3 (The Suite Factory)), a multi-storey car park and ground level car park. .</p> |
| Proposed Site Use     | <p>HPH4 and 5: office accommodation</p> <p>HPH6: hotel. See Figure 3.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Topography            | The surrounding land slopes down to the south and east. The site has been cut into the surrounding land and hence is approximately 2m lower than the land to the north west. Similarly the rear of the lower ground floor of HPH1 is level with the surrounding land.                                                                                                                                                                                                                                                                                                |
| Surrounding Land Uses | <p>East: a large area of vacant land.</p> <p>South: Light industrial units including Nipon express, City circle coaches and BTC coaches.</p> <p>South-east and west: Residential housing</p> <p>North-east : Industrial Units (Vodel)</p> <p>North : Residential housing</p>                                                                                                                                                                                                                                                                                         |

### 2.2. Site History

The site history has been determined from a review of OS historical maps provided by Landmark Information Group. The text below describes significant historical activities on the site and surrounding area. Complete historical maps are included in Appendix A. Please note that the red line boundary line shown in the Landmark reports and mapping below refer to the original area selected for the 2011 Phase 1 environmental assessment. The areas of HPH4-6 have been superimposed below to show areas of the site under consideration.

|                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <p><b>1914 (250m search buffer)</b></p>   | <p><b>1866 – 1914</b></p> <p><b>On Site:</b></p> <p>The earliest available map dated 1866 indicates the site to be open land likely to have been associated with a nearby farm.</p> <p><b>Off-site:</b></p> <p>The earliest available map indicates the site to be surrounded by farmland. The Great Western Railway line, orientated east-west, is present approximately 100m north of the site. By 1915 industrial development had occurred immediately north of the Great Western Railway and included a gramophone works and other engineering works.</p>                                                                                                                                                                                                                                                                                                              |
| <p><b>1967 (250m search buffer)</b></p>  | <p><b>1915 - 1969</b></p> <p><b>On-site:</b></p> <p>By some time between 1914 and the mid 1930s buildings associated with an Aviation Works, (Fairey Aviation Company Limited) were developed in the centre of the site. Tanks associated with the aviation works were indicated to be present at the eastern site boundary. By the mid 1960s buildings associated with the Aviation Works had been developed across the site in the area associated with HPH5. There is no building in the area of HPH4.</p> <p><b>Off-site:</b></p> <p>By the 1930s the majority of buildings associated with the Aviation Works are immediately east of the site. Further buildings had been added to the industrial area immediately north of the railway. Residential housing had been developed to the west and south of the site and continued to be developed up to the 1970s.</p> |
| <p><b>1974</b></p>                      | <p><b>1970-1989</b></p> <p><b>On site:</b></p> <p>A warehouse building is shown in the area of HPH4. The Aviation Works associated with HPH5 has been renamed as a warehouse. There is no change in use for the Mercury House associated with HPH6.</p> <p><b>Off Site:</b></p> <p>By the early 1970s the aeronautical engineering works to the east has been redeveloped into a single large warehouse. Some of the buildings associated with the Aviation Works adjacent to HPH5 have been demolished.</p>                                                                                                                                                                                                                                                                                                                                                               |

|                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| <p><b>2006</b></p>   | <p><b>1990 - 2006</b></p> <p><b>On-site:</b></p> <p>The main works building associated with the area of HPH5 has been demolished by 2006 and replaced with a warehouse. There has been no change to the building associated with HPH6.</p> <p><b>Off-site:</b></p> <p>The main Aviation works building has been demolished by 2006 and replaced by high rise offices associated with HPH1-3. The large warehouse to the east of the site has been renamed the Westlands Estate.</p>                              |
| <p><b>2011</b></p>  | <p><b>2011</b></p> <p><b>On-site:</b></p> <p>Between 2006 and 2011 former buildings associated with the aviation works were removed from the areas of HP4-6</p> <p><b>Off-site:</b></p> <p>The area immediately north of the railway line continued to be occupied by industrial units with changes to the layout of the buildings occurring in a piecemeal fashion up to the most recent map edition dated 2011. The Westland Estate shown to the east was demolished in 2011 and is currently open ground.</p> |

## 2.3. Environmental Setting & Sensitivity

The environmental site setting and sensitivity has been assessed based on available information from previous reports and the Landmark environmental database. The full Landmark dataset held for the site is provided in Appendix A.

| Aspect       |             | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                   |                                                                                                                   |
|--------------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
|              |             | An intrusive site investigation was undertaken in 2005 (Ref. 1). Ten boreholes were advanced to a maximum depth of 6m below ground level (bgl) at locations distributed across the site.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                   |                                                                                                                   |

Weathers to brown sandy clay. Chalk present at depth beneath London Clay. |
|              |             | <p>*Information obtained from Reference 1.</p> <p>In the west of the site the made ground was located directly over the Lynch Hill Gravel deposits. This is supported by geological mapping which indicates strata associated with the Langley Silt Member to be absent immediately west of the site. The lower permeability Langley Silt can therefore not be considered to be of sufficient thickness or lateral continuity to prevent downward flow of contaminants from the site.</p> <p>Groundwater was encountered in all boreholes with a resting level of between 3.0m and 3.5m bgl in the majority of boreholes in 2005.</p>                                                                                                                                                                                                                                                                                                          |                                                                                                   |                                                                                                                   |
|              | Mining:     | Not in an area impacted by mining.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                   |                                                                                                                   |
| Hydrogeology |             | <p>The Environment Agency (EA) classify the Langley Silt as unproductive strata and the Lynch Hill Gravels as a Principal Aquifer (Ref. 3). The underlying London Clay Formation is classified as unproductive strata.</p> <p>The site is not located within a groundwater source protection zone (Ref. 3). The closest groundwater abstraction to the site is indicated to be located approximately 140m north of the site and is licensed to Thorn Emi Electronic Ltd. The groundwater is indicated to be abstracted from the Chalk for manufacturing purposes (Appendix A). Shallow groundwater was recorded at between 3.6-3.6m in 2011 and was established to flow beneath the site in a west south-westerly direction.</p> <p>The Water Framework Directive River Basin Management Plans for Groundwater in the area (Ref. 3) indicate the groundwater chemical quality is 'Poor' and is predicted to continue to be 'Poor' in 2015.</p> |                                                                                                   |                                                                                                                   |
|              |             | <p><b>Moderately High (M1) Sensitivity.</b> The western portion of the site is directly underlain by a Principal Aquifer. Site not located in groundwater source protection zone and no known abstractions from the aquifer within 1km of the site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                   |                                                                                                                   |
| Hydrology    |             | <p>The closest surface water feature to the site is the Grand Union Canal located approximately 400m north of the site. As a manufactured waterway it is likely to be lined and hence is not considered to be a receptor.</p> <p>The nearest surface water abstraction to the site is located approximately 500m north and relates to an abstraction from the Grand Union Canal for non-evaporative cooling purposes. A discharge consent into the canal also exists for the same</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                   |                                                                                                                   |

|                | operation. There are no other active abstractions from groundwater or discharge consents within 750m of the site. T                                                                                                                              |
|                | <b>Low Sensitivity (L1).</b> Grand Union Canal approximately 500m north of site. Overland flow unlikely and migration via baseflow also unlikely as canal likely to be lined. Surface water abstraction from the canal is for cooling processes. |
| <b>Ecology</b> | There are no sites of high ecological importance (Ramsar sites, Special Areas of Conservation, Special Protection Areas, Site of Special Scientific Interest, NNational Nature Reserves, Marine Nature Reserves) within 1km.                     |
|                | <b>Very Low.</b> No sites of high ecological importance within 1km.                                                                                                                                                                              |

## 2.4. Site Regulatory and Environmental Data

Regulatory data is presented in full in Appendix A and summarised in Appendix B.

Entries of relevance related to an on-site Registered Radioactive Substances entry. The details provided indicate that it was registered to Saunders Roe Ltd, 7E & 7F Millington Road. The authorisation is indicated to have been superseded by a variation however no further details are provided.

A contemporary trade directory entry also exists relating to a fuel station formerly located at 3 Millington Road which is outside the application boundaries of HPH4-6. The local authority were contacted with regard to this and informally indicated that it had a capacity of 22,000 litres and was installed in approximately 1975. The tank is understood to have been decommissioned by filling with soil/ foam. The former refuelling area has been completely removed and is replaced by a gym with the former pumps being adjacent to the bike shed extension.

Discussion with the local Environmental Health Officer indicated that they had visited the site in recent years and did not consider it likely that the risks to human health would lead to it being classified as contaminated land. However, she did not have records in relation to controlled waters.

## 2.5. Previous Reports

The following reports have been produced for the site and have been made available to SKM Enviros for review. A summary of the finding of these reports is presented below.

**Phase 1 Environmental Assessment, Former Safeway HQ, 6 Millington Road, Hayes, Middlesex. Completed by Delta-Simons on behalf of Hyde Park Partnership. September 2005. Ref 05-3230.01**

This report details the findings of a Phase 1 environmental assessment undertaken at the site. At the time of the visit the layout and use was similar to today (mainly offices and parking) with the exception of the following developments on the three currently vacant areas:

- Site A was occupied by Mercury House, a vacant three storey office building;
- Site B was occupied by an Annexe / restaurant; and
- HPH4 Site was occupied by Maccess Ltd, a warehouse used for storage of vehicle parts, possible previous use for car maintenance purposes but not at time of visit.

Potential sources of contamination identified were as follows:

- HPH1 – 2 diesel above ground storage tanks;
- HPH3 – 1 diesel above ground storage tank, former petrol underground storage tank, pump and interceptor;
- HPH4 – minor storage of oils /solvents associated with car maintenance, no sign of spills, good quality floor;
- Site A – electricity substation;
- Centre of site - 1 diesel above ground storage tank and electricity substation;
- Recycling area with evidence of oil staining.
- Historical use including – infilling in the west, tanks associated with aeronautical works in east and other nearby offsite industries.

A site investigation was recommended to assess the potential presence of any soil or groundwater contamination and the potential for land gas generation associated with infilling in the west of the site.

**Phase 2 Environmental Assessment, Former Safeway HQ, 6 Millington Road, Hayes, Middlesex. Completed by Delta-Simons on behalf of Hyde Park Partnership. Ref 05-3230.02 (undated)**

This report provides details of an intrusive geo-environmental investigation undertaken at the site. The investigation comprised the advancement of ten boreholes to 6mbgl. The locations were focused on sources of potential contamination identified in the Phase 1 report as well as to provide coverage of the site area. Soil and groundwater samples were collected and sent for laboratory analysis for a range of contaminants. Elevated lead, cadmium and copper as well as slightly elevated SVOCs, VOCs and TPH were identified in localised soil samples when compared to guidelines for commercial use. The concentrations were not considered to represent a significant risk to the site given the extent of hardstanding. BH7, which contained elevated cadmium, is located in the HPH4 site currently proposed for redevelopment with outline planning consent for offices rather than more sensitive residential use.

Significantly elevated concentrations of VOCs were noted in two groundwater samples but were not considered to represent a significant risk to human health (due to a shallow clay layer above the water table) or groundwater (due to the physical setting of the site and its history). One round of gas monitoring indicated slightly elevated levels of carbon dioxide. The report indicates that flow levels were low although no data is provided.

The overall risks associated with the site were considered to be low as the site was mainly covered with hardstanding and the relatively low sensitivity setting of the site with respect to controlled waters. Recommendations included a further round of groundwater monitoring, provision of information to any groundworkers in relation to the potential to encounter contamination and a Japanese Knotweed survey and treatment programme.

## **2.6. Groundwater Monitoring (May 2011)**

On 19th May 2011 SKM Enviros visited the site to monitor groundwater levels and take samples from the four accessible previously installed boreholes: BH2, BH6, BH8 and BH9.

Groundwater levels were dipped and related to Ordnance Datum following topographic surveying of the borehole locations. The groundwater was found to be present between 3.6m and 3.7m below ground level and flowing in a west south westerly direction as shown in Figure 3. This is consistent with the regional distribution of surface water features, i.e. River Thames and reservoirs to southwest. These levels were similar to those recorded in 2005 as indicated in Table 1.

■ **Table 1 Groundwater Levels and Elevations (2005 and 2011)**

| Location | elevation of ground (mAOD) | depth to groundwater 2011 (mbgl) | elevation of groundwater 2011 (mAOD) | depth to groundwater 2005 (mbgl) | elevation of groundwater (mAOD) |
|----------|----------------------------|----------------------------------|--------------------------------------|----------------------------------|---------------------------------|
| BH2      | 31.58                      | 3.60                             | 27.98                                | 2.97                             | 28.61                           |
| BH6      | 31.98                      | 3.65                             | 28.33                                | 3.29                             | 28.69                           |
| BH7      | 31.52                      | Not found                        | Not found                            | 1.39                             | 30.13                           |
| BH8      | 32.21                      | 3.78                             | 28.436                               | 3.5                              | 28.71                           |
| BH9      | 32.00                      | 3.74                             | 28.269                               | 4.46                             | 27.54                           |

Analyses of the four groundwater samples were undertaken for a range of inorganic and organic parameters. The laboratory results are summarised with a comparison against water quality standards shown in Appendix C. Where parameters exceed the water quality standard then the concentration is highlighted in bold text. The standards are used by the Environment Agency to ensure the quality of water intended for human consumption (Ref. 4) and supplemented by World Health Organisation guideline values. Laboratory analysis certificates are presented in Appendix D.

The results show that boreholes BH2 and BH8, which are both in the north of the site, do not show elevated concentrations of contaminants.

Chemical analysis of water in boreholes BH6 (eastern boundary, upgradient) and BH9 (southern corner) indicates elevated concentrations of hydrocarbons, volatile organic compounds (VOCs) and chromium above conservative guidelines within the shallow groundwater in the Principal Aquifer of the Lynch Hill Gravels beneath the site. Specifically:

- Chromium is elevated in BH6 at 889µg/l
- Hexavalent chromium is present in BH6 at a concentration of 0.977 mg/l. BH8 shows a concentration just above the detection limit.
- Total aliphatic and aromatic >C5-35 (aq) are present in BH6 at a concentration of 1030 µg/l and in BH9 at 1840 µg/l, although individual components of the hydrocarbon mixture do not exceed quality standards.
- Vinyl chloride is present in BH9 at a concentration of 209 µg/l, well above the quality standard of 0.05 µg/l. NB the LOD of 1.2 µg/l is above the quality standard.
- Cis 1,2-Dichloroethene exceeds the WHO drinking water guideline of 500µg/l with BH6 being 1720 µg/l and BH9 being at 1840 µg/l.
- Trichloroethene is present in BH6 at 2530 µg/l.

Since BH6 and BH9 are on the upstream groundwater site boundary, an off-site source is probable.

The concentrations of contaminants in groundwater found in May 2011 are compared in Table 2 to earlier samples collected in investigations cited in Section 2.5 of this report.

This comparison indicates that groundwater, particularly in May 2011, at the up-gradient boundary contains elevated contaminants, and implies that groundwater in the surrounding area is degraded and an off-site source of contamination exists. Given the location of the elevated concentrations in earlier samples from on-site (BH4 which was not accessible during this monitoring round), a source of contamination within the site may also exist.

■ **Table 2 Comparison of Groundwater Quality in May 2011 with September 2005**

| <i><b>SKM Sampling May 2011</b></i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <i><b>Earlier sampling September 2005</b></i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Site Description and Activities      | <p>The site is a commercial estate containing three multistorey offices and a car park. The offices are believed to have been built between the 1970s and 1990s and were previously used as Safeway’s head quarters. A former refuelling area has been completely removed and is replaced by a gym with the former pumps being adjacent to the bike shed extension and is outside the application area for HPH4-6.</p> <p>The buildings have the following occupiers:</p> <p>HPH1 – Rackspace</p> <p>HPH2 – Used as disaster recovery centre. The post room is manned.</p> <p>HPH3 – Blink, Dom Vito, Regus, CHAMP, Cargo Systems Limited, China Airlines</p> <p>The site has been landscaped in the last three years. This included constructing a landscape garden behind and to the south of HPH1 and extending into the area formerly occupied by the Maccess Limited.</p> |                 |               |

|                                      | <p>the south west and north-east are vacant plots of land. They were formerly occupied by the buildings - Maccess Limited (HPH4), the annexe/restaurant (HPH5) and Mercury House (HPH6). These buildings have since been demolished. Building rubble is present over the building footprint. The tarmac hardstanding around the edges remain in place.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                 |               |

| <p><b>Site surfacing and landscaping</b></p> | <p>The areas of HPH4-6 are covered by building rubble. The tarmac hardstanding around the edges remain in place.</p> <p>Outside the application areas, the majority of the site is covered with tarmac hardstanding. This was in good condition. Landscaped areas were present at the edge of the car parking areas and behind HPH2. The previously identified Japanese Knotweed at the HPH3 car park, between HPH2 and around HPH3 was no longer apparent and may have been removed during the landscaping a few years ago.</p> <p>BH2, BH6, BH7, BH8 and BH9 were all located, although BH7 was not accessible during monitoring. It is possible that BH3, and BH4 were removed during the landscaping.</p> |
|----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 3.1.1. Above / Under Ground Storage Tanks

There were no visible above or below ground storage tanks associated with HPH4-6.

Outside the application area, there is one underground storage tank adjacent to HPH3. The fill point is above ground and showed no evidence of staining. The volume of the tank is unknown. No integrity testing is reported to have been carried out on the tank or the connecting lines.

At HPH1 there is one above ground storage tank for diesel in the centre of the building. It was brick bunded and connected to an external filling point. There was no staining in the bund. In the lower ground floor of HPH1 was two tanks (each 14.3m<sup>3</sup>) in a bunded room, there was a minor leak from one tank.

See 2.2.4 above for details of the offsite underground storage tanks associated with the former service station.

### 3.2. Waste storage and disposal

There were no visible waste storage or disposal associated with HPH4-6.

### 3.3. Atmospheric Emissions

The Landmark data does not record any LAPPC permits on the site and the site visit did not highlight any activities that would require registration.

### 3.4. Effluent discharge and drainage

The Landmark data does not record any discharge consents at the site. No information on the drainage system at the site has been provided to SKM Enviros.

There is a buried collection pit for the foul sewer at the front of HPH1, which acts as a collection sump prior to sewage being pumped into the adjacent roadside sewer.

## **4. Conceptual Model and Risk Assessment**

### **4.1. General**

A preliminary qualitative risk assessment has been carried out for the site based on the data obtained for this desk-based study. The guiding principal behind the assessment is to consider connecting links between a contaminant, via an exposure pathway to a potential receptor sensitive to that contaminant. The contaminant-pathway-receptor links are identified for the site as a result of its historical and current land use.

### **4.2. Preliminary Qualitative Risk Assessment**

A qualitative risk assessment for the site has been undertaken for the potential source-pathway-receptor linkages summarised in Section 3 to identify potentially unacceptable risks. This approach is based on Department of the Environment, Transport and the Regions (DETR) (now DEFRA) and the Construction Industry Research and Information Association (CIRIA) guidance on risk assessment and model procedures for the management of land contamination (References 5, 6 and 7).

The following sources of potential contamination have been identified:

- Offsite: Current site use including above ground and below ground fuel storage;
- On site: Historic site use (localised elevated heavy metals in soil and elevated VOCs and TPH in groundwater).

The following receptors are considered to be most sensitive at the site:

- Human health (construction workers / future site users of the hotel and offices);
- Groundwater (Principal Aquifer).

Surface water is not considered a sensitive receptor as the nearest watercourse is a canal (likely to be lined) 500m distant.

The risk assessment is based on the future use of HPH4-6 for offices and hotel with minimal areas of soft landscaping:

- The likelihood of an event (probability – takes into account both the presence of the hazard and the sensitivity of the receptor and the integrity of the pathway); and
- The severity of the potential consequence (takes into account both the potential severity of the hazard and the sensitivity of the receptor).

Professional judgement has then been used to estimate the combination of likelihood and severity of the harm posed by the pollutant linkages. The risk category is used to help prioritise/target any subsequent phases of investigation. The results of the qualitative risk assessment are presented in Table 3 overleaf.

■ Table 3. Risk Assessment for Development of HPH4-6 into Offices and Hotels

| Source                                                                         | Pollutant | Receptors                                             | Pathways to Receptor                  | Associated Hazard [Severity]                | Likelihood of Occurrence                                                                                                                                                                                                                                                                                                                                                                                                                                 | Potential Risk |

| On and Off Site:<br>Previous historic use (including aeronautical works) | Heavy metals, VOCs, TPH | Future construction workers                           | Direct contact, inhalation, ingestion | Health hazard [Medium]                      | Low<br>Previous intrusive site investigation reported localised heavy metals within the soils and elevated VOCs and slightly elevated TPH in groundwater. Hardstanding present across the site which will prevent direct contact. Potential for direct contact during any below ground works. However, suitable PPE and health and safety procedures likely to be adopted during any groundworks.                                                                                                                                                                                     | Moderate/Low   |
|                                                                          |                         | Human health (future site users of hotel and offices) | Direct contact, inhalation, ingestion | Health hazard [Medium]                      | Low<br>Previous intrusive site investigation reported localised heavy metals within the soils. Due to extensive hard landscaping across the proposed development there is unlikely to be a source-pathway-receptor linkage for contamination in the soil. Further assessment would be required to assess the risks to human health from VOC in groundwater.                                                                                                                                                                                                                           | Moderate/Low   |
|                                                                          |                         | Groundwater (Principal Aquifer)                       | Migration via permeable strata        | Contamination of controlled waters [Medium] | Likely<br>Previous intrusive site investigation reported localised heavy metals within the soils and elevated VOCs and slightly elevated TPH in groundwater. Sampling in May 2011 has confirmed that groundwater continues to be contaminated and that groundwater in the surrounding area is likely to be degraded. Site predominantly covered in hardstanding which will reduce infiltration. Groundwater sensitivity assessed as moderately high, Principal Aquifer underlies site, extent of protective overlying low permeability Langley Silts variable. No local abstractions. | Moderate       |

## 5. Conclusions & Recommendations

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Conclusions</b>     | <p>The historic use of the site and the surrounding area has the potential to impact sensitive receptors on and in the vicinity of the site.</p> <p>The risks to human health receptors from historic use of the site are assessed as Moderate/Low for construction workers and Moderate/Low for future site users. The risks to controlled waters are assessed as Moderate. This reflects:</p> <ul style="list-style-type: none"> <li>■ The historic use of the site and surrounding area;</li> <li>■ The presence of localised elevated concentrations of lead, cadmium and copper as well as slightly elevated SVOCs, VOCs and TPH were identified in localised soil samples when compared to guidelines for commercial use;</li> <li>■ Groundwater sampling in May 2011 confirmed the presence of elevated concentrations of VOC and metals in upgradient boreholes; and,</li> <li>■ The proposed redevelopment of the site for low sensitivity office and hotel use.</li> </ul>                                                                                                                                                                                                                                                              |
| <b>Recommendations</b> | <p>Based on assessment contained within this report we have the following recommendations:</p> <p>Submit this Phase 1 desk study to the LBH contaminated land officer as part of pre-planning application discussions.</p> <ol style="list-style-type: none"> <li>1) Submit this Phase 1 desk study and a site investigation scope of works to the LBH contaminated land officer and to the Environment Agency as part of pre-planning application discussions.</li> <li>2) Complete a ground investigation to assess the potential for contamination to impact future use of the site within proposed development areas, including additional wells in the centre of the site and along the upgradient boundary to assist in further groundwater risk assessment. Given the history of the site this would be required as part of any planning application.</li> <li>3) After grant of planning permission, supply a remediation method statement outlining the remediation works to mitigate or eliminate potential source-pathway-receptor linkages.</li> <li>4) After completion of any required remediation work, supply to the LBH contaminated land officer a validation report providing evidence of agreed remediation works.</li> </ol> |

## Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

## Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

## Ove Arup Copyright Notice

The Data provided in this report was obtained on Licence from Ove Arup & Partners Limited (for further information, contact [mining.review@arup.com](mailto:mining.review@arup.com)). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The information and data supplied in the product are derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

## Peter Brett Associates Copyright Notice

The cavity data presented has been extracted from the PBA enhanced version of the original DEFRA national cavity databases. PBA/DEFRA retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by PBA. In no event shall PBA/DEFRA or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

## Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and the Health Protection Agency.

## Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

### Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

### Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

### Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.

## Client Details

Mr I Muir, SKM Enviros, Victoria House, Southampton Row, London, WC1B 4EA

## LANDMARK TERMS AND CONDITIONS

### Definitions

**"Authorised Reseller"** means an agent or reseller of Landmark whom Landmark has duly appointed to resell its Reports and Services.

**"Content"** means any data, computing and information services and software, and other content and documentation or support materials and updates included in and/or supplied by or through the Websites, in Reports or Services or in any other way by Landmark and shall include Landmark developed and Third Party Content.

**"First Purchaser"** means the first person, or legal entity to purchase the Property Site following provision of a Report.

**"First Purchaser's Lender"** means the funding provider for the First Purchaser

**"Information Pack"** means a pack compiled by or on behalf of the owner or prospective buyer of the Property Site, designed to aid the marketing or purchase of the Property Site and containing information provided by or on behalf of the owner or prospective buyer of the Property Site.

**"Intellectual Property Rights"** means copyright, patent, design right (registered or unregistered), service or trade mark (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right. **"Order"** means the request for Services from Landmark by You.

**"Property Site"** means a land site on which Landmark provides a Service.

References to **"We"**, **"Us"** and **"Our"** are references to Landmark Information Group Limited ("Landmark"), whose registered office is 7 Abbey Court, Eagle Way, Exeter, EX2 7HY. Where You are not ordering the Services directly from Landmark, but from an Authorised Reseller, references to "Landmark" or "We", "Us" and "Our" shall be construed so as to mean either Landmark and/or the Authorised Reseller as the context shall indicate.

References to **"You/Your/Yourself"** refer to the contracting party who accesses the Website or places an Order with Landmark.

**"Report"** includes any information that Landmark supplies to You including all reports, services, datasets, software or information contained in them.

**"Services"** means the provision of any service by Landmark pursuant to these Terms, including without limitation, any Report.

**"Landmark Fees"** means any charges levied by Landmark for Services provided to You.

**"Suppliers"** means any organisation who provides data or information of any form to Landmark.

**"Terms"** means these Terms & Conditions.

**"Third Party Content"** means the services, software, information and other content or functionality provided by third parties and linked to or contained in the Services.

**"Websites"** means websites hosted by Landmark and includes the Content and any report, service, document, data-set, software or information contained therein, derived there from or thereby.

### 1. Terms & Conditions

a. These Terms govern the relationship between You and Landmark whether You are an unregistered visitor to the Website or are purchasing Services. Where these Terms are not expressly accepted by You they will be deemed to have been accepted by You, and You agree to be bound by these Terms when You place any Order, or pay for any Services provided

b. If the person communicating with Landmark is an Authorised Reseller, they must ensure that You agree to these Terms

c. The headings in these Terms are for convenience only and shall not affect the meaning or interpretation of any part of these Terms.

d. Landmark may modify these Terms, and may discontinue or revise any or all other aspects of the Services at its sole discretion, with immediate effect and without prior notice, including without limitation changing the Services available at any given time. Any amendment or variation to these Terms shall be posted on our Websites. Continued use of the Services by You shall be deemed an acceptance by You to be bound by any such amendments to the Terms.

e. These Terms, together with the prices and delivery details set out on our Websites, Landmark's Privacy Policy and Your Order comprise the whole agreement relating to the supply of Services to You by Landmark. No prior stipulation, agreement, promotional material or statement whether written or oral made by any sales or other person or representative on our behalf should be understood as a variation of these Terms. Save for fraud or misrepresentation, Landmark shall have no liability for any such representation being untrue or misleading.

f. These Terms shall prevail at all times to the exclusion of all other terms and conditions including any terms and conditions which You may purport to apply even if such other provisions are submitted in a later document or purport to exclude or override these Terms and neither the course of conduct between parties nor trade practice shall act to modify these Terms.

### 2. Services

a. Landmark will use reasonable care and skill in providing the Services to You, however, the Services are provided on the express basis that the information and data supplied in the Services are derived from third party sources and Landmark does not warrant the accuracy or completeness of such information or data. Such information is derived solely from those sources specifically cited in the Services and Landmark does not

claim that these sources represent an exhaustive or comprehensive list of all sources that might be consulted.

### 3. Intellectual Property

a. You acknowledge that all Intellectual Property Rights in the Services are and shall remain owned by either Landmark or our Suppliers and nothing in these Terms purports to transfer, assign or grant any rights to You in respect of the Intellectual Property Rights.

b. Subject always to these Terms You may, without further effect at any time:

- the owner of the Property at the date of the Report,
- any person who purchases the whole of the Property Site,
- any person who provides funding secured on the whole of the Property Site,
- any person for whom You act in a professional or commercial capacity;
- any person who acts for You in a professional or commercial capacity; and
- prospective buyers of the Property Site as part of an Information Pack but for the avoidance of doubt, Landmark shall have no liability to such prospective buyer unless the prospective buyer subsequently purchases the Property Site, and the prospective (or actual) buyer shall not be entitled to make the Service available to any other third party.

Accordingly Landmark shall have the same duties and obligations to those persons in respect of the Services as it has to You.

c. Each of those persons referred to in clause 3.b. shall have the benefit and the burden of Your rights and obligations under these Terms. The limitations of Landmark's liability as set out in clause 6 shall apply to all users of the Service in question in aggregate and Landmark shall not be liable to any other person.

d. All parties given access to the Services agree that they will treat as strictly private and confidential the Services and all information which they obtain from the Services and shall restrict any disclosure to employees or professional advisors to enable the relevant party to conduct its internal business. The requirement in this clause to treat the Services as confidential shall include a requirement to maintain adequate security measures to safeguard the Services from unauthorised access, use or copying.

e. Each recipient of the Services agrees (and agrees it will cause its employees, agents or contractors who may from time to time have access to the Services to agree) it will not accept or permit any disclosure of any problem, event, action or default by Landmark:

- effect or attempt to effect any modification, merger or change to the Service, nor permit any other person to do so; or
  - copy, use, market, re-sell, distribute, merge, alter, add to or create any new redistribution, reproduction, translation, publication, reduction to any electronic medium or machine readable form or commercially exploit or in any other way deal with or utilise or (except as expressly permitted by applicable law) reverse engineer, decompile or disassemble the Services; Content or Website;
  - remove, alter or in any way change any trademark or proprietary marking in any element of the Services and You shall acknowledge the ownership of the Content, where such Content is incorporated or used into Your own documents, reports, systems or services whether or not these are related to the Services; or
  - create any product which is derived directly or indirectly from the data contained in the Services
- f. The mapping contained in any Services is protected by Crown Copyright and must not be used for any purpose outside the context of the Services or as specifically provided by these Terms.
- g. You are permitted to make five copies of any Report, but are not authorised to re-sell the Report, any part thereof or any copy thereof unless you are an Authorised Reseller. Further copies may not be made in whole or in part without the prior written permission of Landmark who shall be entitled to make a charge for each additional copy.

### 4. Charges

- VAT at the prevailing rate shall be payable in addition to the Landmark Fees. You shall pay any other applicable indirect taxes related to Your use of the Services.
- An individual or a monthly invoice showing all Orders created by You will be generated subject to these Terms. You will pay the Landmark Fees at the rates set out in Landmark's or its Authorised Reseller's invoice. The Landmark Fees are payable in full within 30 days without deduction, counterclaim or set off. You acknowledge that time is of the essence with respect to the payment of such invoices. Landmark reserve the right to amend the Landmark Fees from time to time and the Services will be charged at the Landmark Fee applicable at the date on which the Service is ordered.
- We may charge interest on late payment at a rate equal to 3% per annum above the base lending rate of National Westminster Bank plc.
- Landmark or its Authorised Reseller shall not be obliged to provide any third party other than You for the provision of Services, but where Landmark or its Authorised Reseller does so invoice any third party at Your request, and such invoice is not accepted or remains unpaid, Landmark or its Authorised Reseller shall have the option at any time to cancel such invoice and invoice You direct for such Services. Where Your order comprises a number of

Services or severable elements within any one or more Services, any failure by Landmark or its Authorised Reseller to provide an element or elements of the Services shall not prejudice Landmark's or its Authorised Reseller's ability to require payment in respect of the Services delivered to You.

### 5. Termination

- Landmark may suspend or terminate Your rights under these Terms without any liability to You with immediate effect at any time:
- You fail to make any payment due in accordance with clause 4;
- You repeatedly breach or commit or cause to be committed any material breach of these Terms; or
- You commit a breach and You fail to remedy the breach within 7 days of the date of the written notice to do so; additionally, without prejudice to the foregoing, Landmark may remedy the breach and recover the costs thereof from You.
- If Your rights are terminated under this clause and You have made an advance payment We will refund You a reasonable proportion of the balance as determined by Us in relation to the value of Services previously purchased.
- Landmark reserves the right to refuse to supply any or all Services to You without notice or reason.

### 6. Liability

- We provide warranties and accept liability only to the extent stated in this clause 6 and clause 7
- Nothing in these Terms excludes either party's liability for death or personal injury caused by that party's negligence or willful default, and the remainder of this clause 6 is subject to this provision and Your statutory rights.
- As most of the information contained in the Services is provided to Landmark by others, Landmark cannot control its accuracy or copy of the Report to the insurers. Where such policy is purchased, all liability remains with the insurers and You are entirely responsible for ensuring that the insurance policy offered is suitable for Your needs and should seek independent advice. Landmark does not guarantee that an insurance policy will be available on a Service or the Services with regard to the effect of insurance policies for any premises will be made solely at the discretion of the insurers and Landmark accepts no liability in this regard. The provision of a Report does not constitute any indication by Landmark that insurance will be available on the property.
- Professional opinions contained in Reports are provided to You by third parties, and such third parties are solely liable for the opinion provided. For the avoidance of doubt, those parties providing assessments or professional opinions on Landmark products include RPS Plc & Wilbourn Associates Limited, and any issues with regard to the provision of such opinion should be taken up with the relevant third party.

If Landmark provides You with any additional service obtained from a third party, including but not limited to any interpretation or conclusion, risk assessment or environmental report or search carried out in relation to a Report on Your Property Site, subject to clause 6.0 below Landmark will not be liable for any information contained therein or any issues arising out of the provision of those additional services to You. Landmark will be deemed to have acted as an agent in these circumstances and the supply of these additional services will be governed by the terms and conditions of those Third Parties.

- In any event no person may rely on a Service more than 12 months after its original date.
- If You wish to vary any limitation of liability as set out in these Terms, You must request such variation prior to ordering the Service. Landmark shall use its reasonable endeavours to agree such variation but shall not be obliged to do so.
- Time shall not be of the essence with respect to the provision of the Services.
- Ordnance Survey have undertaken a positional accuracy improvement programme which may result in discrepancies between the positioning of features used in datasets in the Services and the Ordnance Survey mapping. Subject to clause 6.0 below, Landmark and its Suppliers exclude all and any liability incurred as a result of the implementation of such positional accuracy improvement programme.
- Where Landmark provides its own risk assessment in connection with any Report, Landmark shall carry out such assessment with all reasonable skill and care but shall have no liability for any such risk assessment conclusion which is provided for information only, save where Landmark conducted the same negligently, in which case the provisions of clause 6 shall apply. Notwithstanding the provisions of any such risk assessment conclusion you should carefully examine the remainder of the Report and should not take or refrain from taking any action based solely on the basis of the risk assessment. For the avoidance of doubt, the provisions of this clause 6n apply solely to risk assessments conducted by Landmark, and the provision of any other risk assessment by a third party shall be governed by the third party's terms in accordance with the provisions of clause 6i above.
- Landmark obtains much of the information contained in its Report from third parties. Landmark will not accept any liability to You for any negligent or incorrect entry, or error or corruption in the Third Party Content supplied to Landmark, but Landmark's Suppliers may be liable for such

- Subject to clause 6.0 below You shall have no claim or recourse against any third Party Content supplier nor any of our other Suppliers. You will not in any way hold us responsible for any selection or retention of, or the acts or omissions of Third Party Content suppliers or other Suppliers (including those with whom We have contracted to operate various aspects or parts of the Service) in connection with the Services (for the avoidance of doubt Landmark is not a Third Party Content supplier). Landmark does not promise that the supply of the Services will be uninterrupted or error free or provide any particular facilities or functions, or that the Content will always be complete, accurate, precise, free from defects of any other kind, computer viruses, software locks or other similar code although Landmark will use reasonable efforts to correct any inaccuracies within a reasonable period of them becoming known to us;
- Landmark's only obligation is to exercise reasonable skill and care in providing environmental property risk information to persons acting in a professional or commercial capacity who are skilled in the use of property and environmental information and You hereby acknowledge that You are such a person; no physical inspection of the Property Site reported on the Landmark Fee shall be undertaken by Landmark and Landmark do not warrant that all land uses or features whether past or current will be identified in the Services. The Services do not include any information relating to the actual state or condition of any Property Site nor should they be used or taken to indicate or exclude actual fitness or unfitness of a Property Site for any particular purpose nor should it be relied upon for determining saleability or value or used as a substitute for any physical investigation or inspection. Landmark recommends that You inspect and take other advice in relation to the Property Site and not rely exclusively on the Services.
- Subject to clause 6.0 below, Landmark shall not be

responsible for error or corruption in the Services resulting from inaccuracy or omission in primary or secondary information and data, inaccurate processing of information and data by third parties, computer malfunction or corruption of data whilst in the course of conversion, geo-coding, processing by computer or electronic means, or in the course of transmission by telephone or other communication link, or printing.

- Landmark will not be held liable in any way if a Report on residential property is used for commercial property or more than the one residential property for which it was ordered.
- The Services have not been prepared to meet Your or anyone else's individual requirements; that You assume the entire risk as to the suitability of the Services under Part II(a) of the Environmental Protection Act 1990 (the "Notice") Landmark will contribute to the cost of such works as either the First Purchaser or First Purchaser's Lender (but not both) are required to carry out under the Notice subject to the provisions of this clause 7 and on the following terms:
- The Contribution shall only apply to contamination or a pollution incident present or having occurred prior to the date of the Report;
- The Contribution shall only apply where the Property Site is a single residential dwelling house or a single residential flat within a block of flats. For the avoidance of doubt, this obligation does not apply to any commercial property, nor to any Property Site being developed or redeveloped whether for residential purposes or otherwise;
- The Contribution is strictly limited to the cost of works at the Property Site and at no other site.
- The Contribution will not be paid in respect of any of the following:
  - Radioactive contamination of whatsoever nature, directly or indirectly caused by or contributed to or arising from ionising radiations or contamination by radioactivity from any nuclear fuel or from any nuclear waste from the combustion of nuclear fuel or the radioactive waste from the production or processing of nuclear fuel or from any other hazardous properties of any explosive nuclear assembly or nuclear component thereof.
  - Asbestos arising out of or related in any way to asbestos or asbestos-containing materials on or in structures or services serving the structures.
  - Naturally occurring materials arising from the presence or required removal of naturally occurring materials except in circumstances where such materials are present in concentrations which are in excess of their natural concentration.

Intentional non-compliance arising from the intentional disregard of or knowing willful or deliberate non-compliance with any statutory or regulatory requirement of the Property Site with any statute, regulation, administrative complaint, notice of violation, or notice letter of any Regulatory Authority. Any condition which is known or ought reasonably to have been known to the First Purchaser or the First Purchaser's Lender prior to the purchase of the Report. Any condition which is caused by acts of War or an Act of Terrorism. Any property belonging to or in the custody or control of the First Purchaser which does not form a fixed part of the Property Site or the structure of the Property Site. Any fines liquidated damages punitive or exemplary damages. Any bodily injury including without limitation, death, illness or disease, mental injury, anguish or nervous shock. Any financial loss in respect of any loss of any rental, profit, revenue, savings or business or any consequential indirect or economic loss damage or expense including the cost of rent of temporary premises or business interruption. Any losses incurred following a material change in use of, alteration or development of the Property Site. The maximum sum that shall be contributed by Landmark in respect of any Contribution shall be limited to £60,000. In the event that more than one Report is purchased on the Property Site the Contribution will only be payable under the first Report purchased by or on behalf of any First Purchaser or First Purchaser's Lender and no Contribution will be made in respect of any subsequent Report purchased by or on behalf of such First Purchaser, First Purchaser's Lender or any person connected to them.

Landmark shall only pay a Contribution where the Notice is served within 36 months of the date of the Report. Any rights to a Contribution under this Clause 7 are not assignable in the event of a sale of the Property Site and Landmark will not make any Contribution after the date of completion of such sale.

In the event the First Purchaser or First Purchaser's Lender wishes to claim any Contribution, it shall notify Landmark in writing within 3 months of the date of the Notice. The First Purchaser or First Purchaser's Lender (as applicable) shall comply with all reasonable requirements of Landmark with regard to the commission and conduct of the remediation works to be carried out under the Notice, and in the event the First Purchaser or First Purchaser's Lender (as applicable) does not do so, including without limitation, obtaining Landmark's prior written consent to any estimates for such works or

negligent or incorrect entries, or errors or corruptions, subject to the terms and conditions on which they supply the Third Party Content to Landmark.

### 7. Contribution

- Save where expressly provided, this clause 7 shall apply solely to Envirosearch Residential Reports (regardless of the result of such Report). Nothing in this clause 7 shall operate to override or vary the provisions of clause 6.
- Landmark are prepared to offer, at their sole discretion, and without any admission of or inference of liability, a contribution towards the costs of any remediation works required under a Notice (as defined below) on the terms of this clause 7 ("the Contribution")
- In the event that a Remediation Notice is served on the First Purchaser or First Purchaser's Lender of a Property Site under Part II(a) of the Environmental Protection Act 1990 (the "Notice") Landmark will contribute to the cost of such works as either the First Purchaser or First Purchaser's Lender (but not both) are required to carry out under the Notice subject to the provisions of this clause 7 and on the following terms:

- The Contribution shall only apply to contamination or a pollution incident present or having occurred prior to the date of the Report;
- The Contribution shall only apply where the Property Site is a single residential dwelling house or a single residential flat within a block of flats. For the avoidance of doubt, this obligation does not apply to any commercial property, nor to any Property Site being developed or redeveloped whether for residential purposes or otherwise;
- The Contribution is strictly limited to the cost of works at the Property Site and at no other site.
- The Contribution will not be paid in respect of any of the following:
  - Radioactive contamination of whatsoever nature, directly or indirectly caused by or contributed to or arising from ionising radiations or contamination by radioactivity from any nuclear fuel or from any nuclear waste from the combustion of nuclear fuel or the radioactive waste from the production or processing of nuclear fuel or from any other hazardous properties of any explosive nuclear assembly or nuclear component thereof.
  - Asbestos arising out of or related in any way to asbestos or asbestos-containing materials on or in structures or services serving the structures.
  - Naturally occurring materials arising from the presence or required removal of naturally occurring materials except in circumstances where such materials are present in concentrations which are in excess of their natural concentration.

Intentional non-compliance arising from the intentional disregard of or knowing willful or deliberate non-compliance with any statutory or regulatory requirement of the Property Site with any statute, regulation, administrative complaint, notice of violation, or notice letter of any Regulatory Authority. Any condition which is known or ought reasonably to have been known to the First Purchaser or the First Purchaser's Lender prior to the purchase of the Report. Any condition which is caused by acts of War or an Act of Terrorism. Any property belonging to or in the custody or control of the First Purchaser which does not form a fixed part of the Property Site or the structure of the Property Site. Any fines liquidated damages punitive or exemplary damages. Any bodily injury including without limitation, death, illness or disease, mental injury, anguish or nervous shock. Any financial loss in respect of any loss of any rental, profit, revenue, savings or business or any consequential indirect or economic loss damage or expense including the cost of rent of temporary premises or business interruption. Any losses incurred following a material change in use of, alteration or development of the Property Site. The maximum sum that shall be contributed by Landmark in respect of any Contribution shall be limited to £60,000. In the event that more than one Report is purchased on the Property Site the Contribution will only be payable under the first Report purchased by or on behalf of any First Purchaser or First Purchaser's Lender and no Contribution will be made in respect of any subsequent Report purchased by or on behalf of such First Purchaser, First Purchaser's Lender or any person connected to them.

Landmark shall only pay a Contribution where the Notice is served within 36 months of the date of the Report. Any rights to a Contribution under this Clause 7 are not assignable in the event of a sale of the Property Site and Landmark will not make any Contribution after the date of completion of such sale.

In the event the First Purchaser or First Purchaser's Lender wishes to claim any Contribution, it shall notify Landmark in writing within 3 months of the date of the Notice. The First Purchaser or First Purchaser's Lender (as applicable) shall comply with all reasonable requirements of Landmark with regard to the commission and conduct of the remediation works to be carried out under the Notice, and in the event the First Purchaser or First Purchaser's Lender (as applicable) does not do so, including without limitation, obtaining Landmark's prior written consent to any estimates for such works or

complying with any other reasonable request by Landmark, Landmark shall not be required to pay any Contribution. Notwithstanding the payment of the Contribution by Landmark or its Authorised Reseller, Landmark's Lender as applicable shall take all reasonable steps to mitigate any costs incurred in connection with the conduct of works required under the terms of any Notice.

- In the event that the First Purchaser or First Purchaser's Lender receives any communication from a statutory authority to the First Purchaser or First Purchaser's Lender as applicable under Part II(a) of the Environmental Protection Act 1990 they will advise Landmark within a maximum period of two months from receipt of such communication. This clause 7h and the service of any notice under it shall not affect the provisions of clauses 7 e and 7g, and any such communication shall be advised to Landmark will not operate as notice under clause 7a.
- Landmark reserve the right at any time prior to a claim for Contribution being made in accordance with clause 7 g) above, to withdraw the offer of payment of Contributions without further notice.

### 8. Events Beyond Our Control

- You acknowledge that Landmark shall not be liable for any delay, interruption or failure in the provision of the Services which are caused or contributed to by any circumstance which is outside our reasonable control including but not limited to, lack of power, telecommunications failure or overload, computer malfunction, inaccurate processing of data, or delays in receiving, loading or checking data, corruption of data whilst in the course of conversion, geo-coding, processing by computer in the course of electronic communication, or printing.
- 9. Severability**
  - If any provision of these Terms are found by either a court or other competent authority to be void, invalid, illegal or unenforceable, that provision shall be deemed to be deleted from these Terms and never to have formed part of these Terms and the remaining provisions shall continue in full force and effect.
- 10. Governing Law**
  - These terms shall be governed by and construed in accordance with English law and each party agrees irrevocably submit to the exclusive jurisdiction of the English courts if any dispute arises out of or in connection with this agreement (a "Dispute") the parties undertake that, prior to the commencement of Court proceedings, they will seek to have the Dispute resolved amicably by use of an alternative dispute resolution procedure acceptable to both parties with the assistance of the Centre for Dispute Resolution (CEDR) if required, by written notice initiating that procedure. If the Dispute has not been resolved to the satisfaction of either party within 60 days of initiation of the procedure or if either party fails or refuses to participate in or withdraws from participating in the procedure then either party may refer the Dispute to the Court.
- 11. General; Complaints**
  - Landmark may assign its rights and obligations under these Terms without prior notice or any limitation.
  - Landmark may authorise or allow our contractors and other third parties to provide to Landmark and/or to You services necessary or related to the Services and to perform Landmark's obligations and exercise Landmark's rights under these Terms, which may include collecting payment on Landmark's behalf.
  - No waiver on Landmark's part to exercise, and no delay in exercising, any right, power or provision hereunder shall operate as a waiver thereof, nor shall any single or partial exercise of any right, power or provision hereunder preclude the exercise of that or any other right, power or provision.
  - Unless otherwise stated in these Terms, all notices from You to Landmark must be in writing and sent to the Landmark registered office (or in the case of an Authorised Reseller, to its registered office address) and subject to paragraph e below all notices from Landmark to You will be displayed on our Websites from time to time.
  - Any complaints in relation to the Services should, in the first instance, be in writing addressed to the Customer Service Support Manager at the Landmark registered office. Landmark or its agents will respond to any such complaints in writing as soon as practically possible.
  - A person who is not a party to any contract made pursuant to these Terms shall have no right under the Contract (Right of Third Parties) Act 1999 to enforce any terms of such contract and Landmark shall not be liable to any such third party in respect of any Services supplied.
  - Landmark's Privacy Policy as displayed on the Website governs the use made of any information You supply to Landmark.

## CERTIFICATE OF ANALYSIS

**Date:** 26 May 2011  
**Customer:** H\_ENVIROS\_ABI  
**Sample Delivery Group (SDG):** 110520-30  
**Your Reference:** JL30359  
**Location:** Hayes  
**Report No:** 130892

We received 4 samples on Friday May 20, 2011 and 4 of these samples were scheduled for analysis which was completed on Thursday May 26, 2011. Accredited laboratory tests are defined within the report, but opinions, interpretations and on-site data expressed herein are outside the scope of ISO 17025 accreditation.

Should this report require incorporation into client reports, it must be used in its entirety and not simply with the data sections alone.

All chemical testing (unless subcontracted) is performed at ALcontrol Hawarden Laboratories.

Asbestos testing - we are not accredited for screening soil samples for asbestos fibres. We are only accredited to identify asbestos fibres in bulk material (ACM).

Approved By:

**Sonia McWhan**

## Appendix

1. Results are expressed on a dry weight basis (dried at 35°C) for all soil analyses except for the following: NRA Leach tests, flash point, ammonium as NH<sub>4</sub> by the BRE method, VOC TICS, SVOC TICS, TOF-MS SCAN/SEARCH and TOF-MS TICS.

2. Samples will be run in duplicate upon request, but an additional charge may be incurred.

3. If sufficient sample is received a sub sample will be retained free of charge for 30 days after analysis is completed (e-mailed) for both soil jars, tubs and volatile jars. All waters and vials will be discarded 10 days after the analysis is completed (e-mailed). All material removed during an asbestos containing material screen and analysed for the presence of asbestos will be retained for a period of 6 months after the analysis date. All samples received and not scheduled will be disposed of one month after the date of receipt unless we are instructed to the contrary. Once the initial period has expired, a storage charge will be applied for each month or part thereof until the client cancels the request for sample storage. ALcontrol Laboratories reserve the right to charge for samples received and stored but not analysed.

4. With respect to turnaround, we will always endeavour to meet client requirements wherever possible, but turnaround times cannot be absolutely guaranteed due to so many variables beyond our control.

5. We take responsibility for any test performed by sub-contractors (marked with an asterisk). We endeavour to use UKAS/MCERTS Accredited Laboratories, who either complete a quality questionnaire or are audited by ourselves. For some determinands there are no UKAS/MCERTS Accredited Laboratories, in this instance a laboratory with a known track record will be utilised.

6. When requested, the individual sub sample scheduled will be screened in house for the presence of large asbestos containing material fragments/pieces. If no asbestos containing material is found this will be reported as 'no asbestos containing material detected'. If asbestos containing material is detected it will be removed and analysed by our documented in house method TM048 based on HSG 248 (2005), which is accredited to ISO17025. If asbestos containing material is present no further analysis will be undertaken. At no point is the fibre content of the soil sample determined.

7. If no separate volatile sample is supplied by the client, the integrity of the data may be compromised if the laboratory is required to create a sub-sample from the bulk sample -similarly, if a headspace or sediment is present in the volatile sample. This will be flagged up as an invalid VOC on the test schedule or recorded on the log sheet.

8. If appropriate preserved bottles are not received preservation will take place on receipt. However, the integrity of the data may be compromised.

9. NDP -No determination possible due to insufficient/unsuitable sample.

10. Metals in water are performed on a filtered sample, and therefore represent dissolved metals -total metals must be requested separately.

11. Results relate only to the items tested.

12. LODs for wet tests reported on a dry weight basis are not corrected for moisture content.

13. **Surrogate recoveries** -Most of our organic methods include surrogates, the recovery of which is monitored and reported. For EPH, MO, PAH, GRO and VOCs on soils the result is not surrogate corrected, but a percentage recovery is quoted. Acceptable limits for most organic methods are 70 -130 %.

14. **Product analyses** -Organic analyses on products can only be semi-quantitative due to the matrix effects and high dilution factors employed.

15. Phenols monohydric by HPLC include phenol, cresols (2-Methylphenol, 3-Methylphenol and 4-Methylphenol) and Xylenols (2,3 Dimethylphenol, 2,4 Dimethylphenol, 2,5 Dimethylphenol, 2,6 Dimethylphenol, 3,4 Dimethylphenol, 3,5 Dimethylphenol).

16. Total of 5 speciated phenols by HPLC includes Phenol, 2,3,5-Trimethyl Phenol, 2-Isopropylphenol, Cresols and Xylenols (as detailed in 15).

17. Stones/debris are not routinely removed. We always endeavour to take a representative sub sample from the received sample.

18. In certain circumstances the method detection limit may be elevated due to the sample being outside the calibration range. Other factors that may contribute to this include possible interferences. In both cases the sample would be diluted which would cause the method detection limit to be raised.

19. Mercury results quoted on soils will not include volatile mercury as the analysis is performed on a dried and crushed sample.

20. For the BSEN 12457-3 two batch process to allow the cumulative release to be calculated, the volume of the leachate produced is measured and filtered for all tests. We therefore cannot carry out any unfiltered analysis. The tests affected include volatiles GCFID/GCMS and all subcontracted analysis.

21. For all leachate preparations (NRA, DIN, TCLP, BSEN 12457-1, 2, 3) volatile loss may occur, as we do not employ zero headspace extraction.

22. We are accredited to MCERTS for sand, clay and loam/topsoil, or any of these materials -whether these are derived from naturally occurring soil profiles, or from fill/made ground, as long as these materials constitute the major part of the sample. Other coarse granular material such as concrete, gravel and brick are not accredited if they comprise the major part of the sample.

23. Analysis and identification of specific compounds using GCFID is by retention time only, and we routinely calibrate and quantify for benzene, toluene, ethylbenzenes and xylenes (BTEX). For total volatiles in the C<sub>4</sub> -C<sub>10</sub> range, the total area of the chromatogram is integrated and expressed as ug/kg or ug/l. Although this analysis is commonly used for the quantification of gasoline range organics (GRO), the system will also detect other compounds such as chlorinated solvents, and this may lead to a falsely high result with respect to hydrocarbons only. It is not possible to specifically identify these non-hydrocarbons, as standards are not routinely run for any other compounds, and for more definitive identification, volatiles by GCMS should be utilised.

## SOLID MATRICES EXTRACTION SUMMARY

### Identification of Asbestos in Bulk Materials

The results for asbestos identification for soil samples are obtained from possible Asbestos Containing Material, removed during the 'Screening of soils for Asbestos Containing Materials', which have been examined to determine the presence of asbestos fibres using ALcontrol Laboratories (Hawarden) in-house method of transmitted/polarised light microscopy and central stop dispersion staining, based on HSG 248 (2005).

### Visual Estimation Of Fibre Content

Estimation of fibre content is not permitted as part of our UKAS accredited test other than: - Trace -Where only one or two asbestos fibres were identified.

Further guidance on typical asbestos fibre content of manufactured products can be found in HSG 264.

The identification of asbestos containing materials falls within our schedule of tests for which we hold UKAS accreditation, however opinions, interpretations and all other information contained in the report are outside the scope of UKAS accreditation.

| Asbestos Type           | Common Name    |
|-------------------------|----------------|
| Chrysotile              | White Asbestos |
| Amosite                 | Brown Asbestos |
| Crocidolite             | Blue Asbestos  |
| Fibrous Actinolite      | -              |
| Fibrous Anorthophyllite | -              |
| Fibrous Tremolite       | -              |
