- ☐ Yes, on the development site
- ☐ Yes, on land adjacent to or near the proposed development
- ☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
- ☐ Yes, on land adjacent to or near the proposed development
- ☒ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
- ☐ Yes, on land adjacent to or near the proposed development
- ☒ No

### Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

## Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

The application relates to the construction of a single-storey rear extension to the existing ground-floor commercial premises at 845 Uxbridge Road. The entire application site enclosed by the red-line boundary measures less than 0.2 hectares. The proposed extension would be constructed within the existing developed commercial rear yard, comprising existing hardstanding and land associated with the commercial premises. The development would not result in the loss or degradation of any onsite priority habitat. The application is being made after 6 August 2026 and therefore benefits from the exemption for development carried out on a site no larger than 0.2 hectares, pursuant to regulation 7A of the Biodiversity Gain Requirements (Exemptions) Regulations 2024, as inserted by the Biodiversity Gain (Town and Country Planning) (Amendments and Transitional Provisions) (England) Regulations 2026. Accordingly, the statutory biodiversity gain condition does not apply. A review of Natural England's MAGIC Map has identified no recorded priority habitat within the application site or within 500 metres of the site. The proposed extension would be constructed within an existing developed commercial rear yard comprising hardstanding. No vegetation or other habitat of ecological significance would be removed or degraded. The development would therefore have no impact on any onsite priority habitat.
