Hi Richard

We have a revised FRA (See attached revised FRA) and drawing to show compensatory storage.

I can confirm if needs be, Mr Ward agrees to dig out the drainage ditch at the front of his property.

If you need a drawing to illustrate how the Flood Resilience Measures would be implemented let me know.

If you require any other information let me know.

Regards

Joseph

Joseph,

Further to yesterday's email and after much discussion, my manager has agreed to delay making a decision on this application to allow you the opportunity to address Vicky's concerns. However, the Council's Enforcement Team have been asked not to wait for a decision to be made on this application and will consider/progress their options separately.

I am therefore aiming to take this to the next Central and South committee meeting on 21 November and therefore I need to have finalised my report by 5/11/18.

If you need to contact Vicky and have problems getting in touch, please let me know and I will see if I can help.

Regards,

Richard
