DISTRIBUTION

This report has been prepared for the exclusive use of **Shurgard UK Ltd.** It should not be reproduced in whole or in part, or relied upon by third parties, without the express written authority of Ardent Consulting Engineers.

1.0 INTRODUCTION

1.1 Ardent Consulting Engineers (ACE) has been appointed by Shurgard UK LTD to advise on the highways/transportation and infrastructure planning/engineering aspects of the proposals for an extension to the Shurgard self-storage facility at Uxbridge Road, Hayes in the London Borough of Hillingdon (LBH).

1.2 This Transport Statement (TS) has been prepared to accompany a planning application submission to the LBH as both planning and highway authority.

1.3 A brief summary of the development is as follows:

Partial demolition and extension to existing building to provide additional self-storage floorspace (Use Class B8) with associated new car and cycle parking, refuse storage, landscaping and other associated works ancillary to the development.

1.4 This assessment has been prepared in-line with the *National Planning Policy Framework (NPPF)* and in-line with guidance from LBH policy documents.

1.5 Following this introduction, this report is structured as follows: -

- **Section 2.0** provides a review of the accessibility of the site by all relevant modes of transport;
- **Section 3.0** outlines the proposed development in terms of built form, access, parking and servicing;
- **Section 4.0** sets out the traffic assessment of the proposed development;
- **Section 5.0** provides a summary and conclusions.

2.0 SITE ACCESSIBILITY

Introduction

- 2.1 This section of the report provides a review of the accessibility of the proposal site in transport terms.

Site Location

- 2.2 The application site is located at Uxbridge Road, Hayes as shown in **Plate 2.1** below.

Plate 2.1: Site Location

- 2.3 The site is currently operating as a self-storage unit, with the proposals intending to increase the floor space of the existing facility. The site currently comprises approximately 8,180sqm of B8 floor space.

- 2.4 Vehicular access to the existing site is via a priority junction onto Uxbridge Road, adjacent the Uxbridge Road / Delamere Road junction.
- 2.5 The surrounding area is in a largely built-up, primarily residential area although there is a significant industrial/retail development to the south, on the opposite side of Uxbridge Road.

Site Accessibility

Pedestrian & Cycle Access

- 2.6 Existing pedestrian & cycle access to the site is via the access road off Uxbridge Road.
- 2.7 Uxbridge Road benefits from footways on both sides of the road, as well as extensive street lighting.
- 2.8 A number of cycle routes are provided in the vicinity of the site as shown in **Plate 2.2** below.

Plate 2.2: Local Cycle Routes (OpenCycleMap.org)

- 2.9 Considering the presence of footways and cycle routes, the site is considered accessible on foot or by cycle.

Public Transport

PTAL Mapping

- 2.10 A PTAL (Public Transport Accessibility Level) assessment has been conducted for the proposal site, using the TfL WebCat tool. A plan showing the PTAL map of the site and surrounding areas is provided at **Plate 2.3** below.

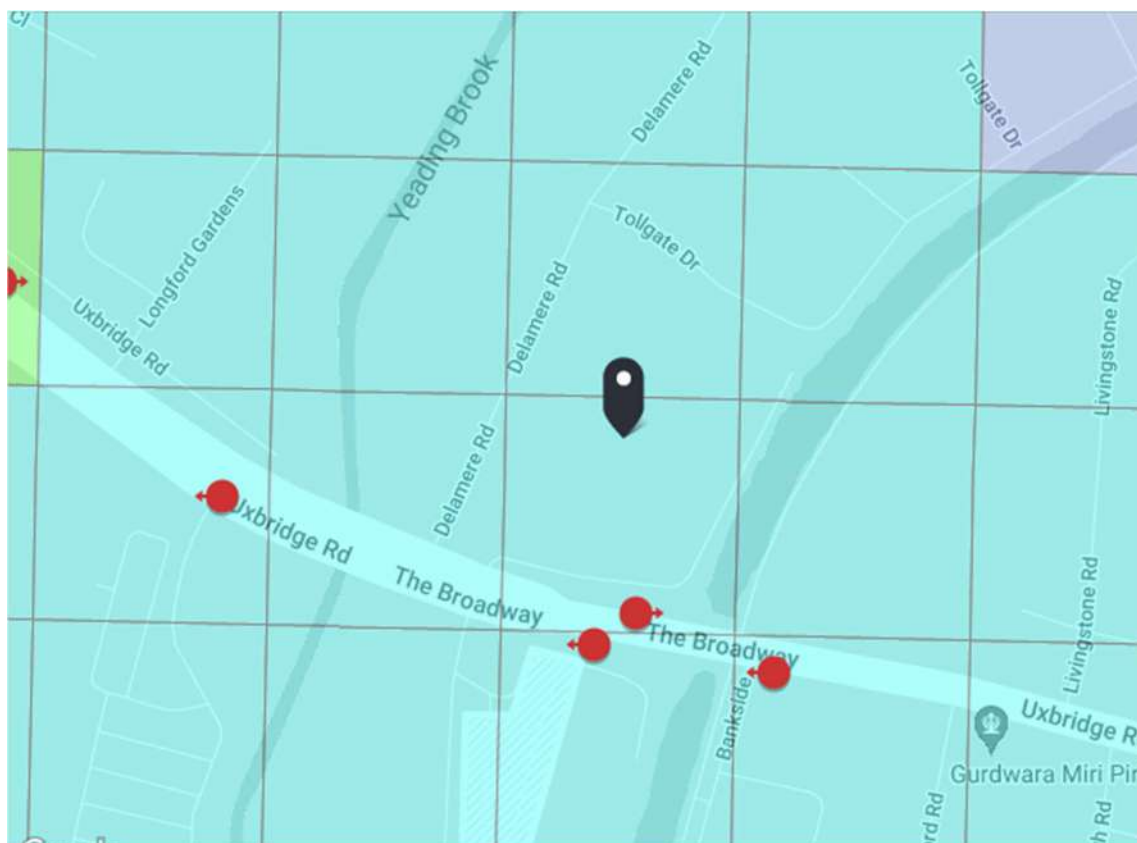

Plate 2.3: PTAL Map

- 2.11 Full PTAL Outputs are provided at **Appendix A** and indicates the site has a PTAL score of 2 in the current and future year scenario.

Bus

- 2.12 The closest bus stops to the site are the 'Hayes Bridge' bus stops located on Uxbridge Road. The eastbound stop is located approximately 180 metres to the south, with the westbound stop located approximately 250 metres to the southeast of the site. The Hayes Bridge stops are served by the 207, 427 and night time N207 service. These services provide connections to Southall, Ealing, Acton, Shepherd's Bush and Uxbridge.
- 2.13 The nearest rail station to the site is Southall, which is approximately 1.8km (22 minutes walk) to the southeast. Southall Station is served by the Great Western Railway and the Elizabeth Line.

Local Highway Network

- 2.14 The site is currently accessed via a simple priority junction with Uxbridge Road. Uxbridge Road is a single carriageway road with dedicated bus lanes on both sides.
- 2.15 Uxbridge Road provides access to the A312 The Parkway, which in turn provides access to the M4 and A40.

Highway Safety

- 2.16 A review of the most recent 3-year Personal Injury Accident (PIA) data was carried out using Crashmap.co.uk. An extract of the PIA map is included in **Plate 2.4** below and indicates there were no accidents along the site frontage or at the existing access point.

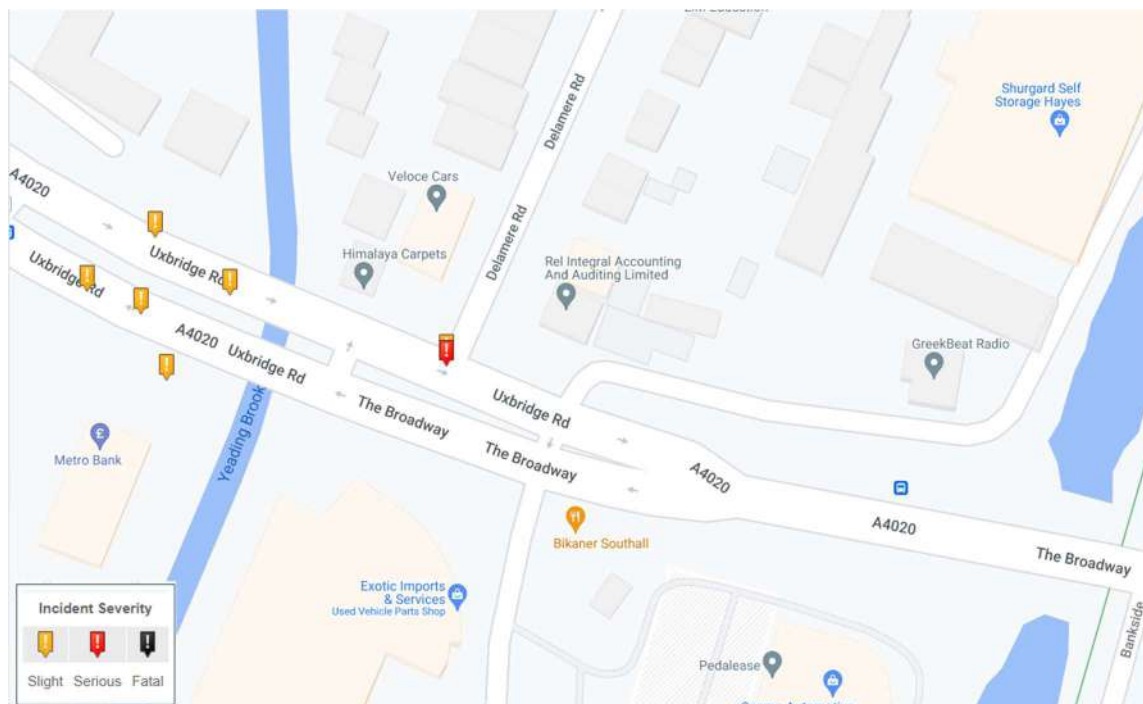

Plate 2.4: PIA mapping extract
(crashmap.co.uk/Search)

- 2.17 As can be seen above, no incidents have been recorded at the access to the site however one serious accident and one slight accident have occurred at the Delamere Road junction to the west. 5 further accidents have been recorded on Uxbridge Road to the west, all of which were classified as slight in severity.
- 2.18 The accident record does not indicate a significant existing safety concern in the vicinity of the site.

3.0 PROPOSED DEVELOPMENT

Introduction

3.1 This section of the report provides an overview of the proposed development, in terms of built form, access arrangements, servicing and parking provision.

Built Form

3.2 A summary of the development is as follows:

- The partial demolition of the existing building on site and extension to provide additional self-storage floorspace (Use Class B8) with associated car and cycle parking facilities.
- The proposal seeks to demolish 1,540sqm GIA of existing floorspace. A total of 3,078sqm GIA floorspace will be installed at ground, first and third floors within the extension. Overall, including retained floorspace and demountable mezzanines, the Site can provide a maximum of 11,770sqm GIA / 10,344 GEA class B8 floorspace. For the purposes of robustness this upper figure has been used to assess the impact of the proposals.
- The proposed development will provide a total of 20 car parking spaces, of which one will be reserved for disabled users. In the unlikely event that larger vehicles require access to the site, two of the parallel car parking spaces can be utilised at once, or a vehicle is able to wait within the circulation space without impeding the ability of another vehicle. 6 spaces will provide active electric vehicle charging infrastructure.
- Access to the site will be via the existing priority junction onto Uxbridge Road, with no vehicular or pedestrian access (apart from emergency access) available via Tollgate Drive to the north, as per the existing situation.

- 3.3 The proposed ground floor layout plan is provided on the Threesixty Architecture drawing '**21065GA-D-001**', provided at **Appendix B**.

Access Arrangements

- 3.4 Vehicular access to the site will only be via the existing junction onto Uxbridge Road. All vehicles, including customer, staff and servicing vehicles, are to access the proposed development via the above junction.
- 3.5 Pedestrian and cyclist access will also be via the existing access junction.

Servicing

- 3.6 Swept path analysis of a refuse vehicle (the largest vehicle expected to access the site) is shown on ACE drawing '**2203260-001**' and demonstrates that access can be easily achieved.
- 3.7 The results of the swept path analysis indicate that the site layout is appropriate for use, with the service vehicle able to enter and exit the site in forward gear.
- 3.8 A refuse storage area is provided on the ground floor, adjacent the existing reception building, within close proximity of the access to the proposal site. All servicing therefore takes place on site.

Parking Provision

- 3.9 The parking standards applicable to the proposed development are found in the adopted LBH Local Plan Part 2 Development Management Development Plan Document (January 2020).
- 3.10 Policy DMT 6: Vehicle Parking of the adopted LBH Development Plan states the following:

“Development proposals must comply with the parking standards outlined in Appendix C Table 1 in order to facilitate sustainable development and address issues relating to congestion and amenity”

- 3.11 The car parking standards for the borough are contained within Appendix C of the Local Plan. The maximum standards for the borough are detailed below in **Plate 3.1** below.

ALL OTHER B CLASS USES
2 spaces plus 1 space per 50 – 100 sqm of gross floorspace

Plate 3.1: LBH Maximum Car Parking Standards

- 3.12 Based on the above, the maximum number of spaces allowed on site would be 237.

- 3.13 In addition to the above, Table 10.4 of the London Plan 2021 provides maximum parking standards for B2 / B8 developments. Table 10.4 is replicated in **Plate 3.2** below.

Table 10.4 - Maximum office parking standards	
Location	Maximum parking provision*
Central Activities Zone and inner London	Car free^
Outer London Opportunity Areas	Up to 1 space per 600 sq.m. gross internal area (GIA)
Outer London	Up to 1 space per 100 sq.m. (GIA)
Outer London locations identified through a DPD where more generous standards apply	Up to 1 space per 50 sq.m. (GIA)

Plate 3.2: London Plan 2021 Maximum Car Parking Standards

3.14 Considering that the site lies within Outer London, the standards would allow a maximum of 117 car parking spaces ($11,770 \div 100 = 117.7$).

3.15 Policy 6.2(C) of the London Plan 2021 states the:

"B8 (storage or distribution) employment uses should have regard to these office parking standards and take account of the significantly lower employment density in such developments. A degree of flexibility may also be applied to reflect different trip-generating characteristics. A degree of flexibility may also be applied to reflect different trip-generating characteristics."

3.16 TfL have advised that the site lies within the Heathrow Opportunity Area, where parking standards are a maximum of 1 space per 600sq.m of B8 floorspace. The Heathrow Opportunity Area standards would therefore expect a maximum of 20 car parking spaces based on the GIA of the development ($11,770 \div 600 = 19.62$).

3.17 The proposed development provides a total of 20 parking spaces, as 4 visitor spaces and 16 customer spaces, and so is well within LBH and London Plan maximum standards detailed above, as well as according with the Heathrow Opportunity Area standards. One of the visitor spaces adjacent to the reception building will be reserved for disabled users whilst the majority are also suitable for light goods vehicles. Six spaces will provide electric vehicle charging infrastructure.

3.18 In order to confirm that no overspill parking would result from the extension to the facility, a survey was undertaken of the existing operations on site of parking uptake. A survey of the site covering arrivals, departures and dwell times was undertaken from Friday 1st July 2022 to Thursday 7th July 2022, inclusive. At this time, the facility was 92.3% occupied and therefore the parking demand has been factored accordingly. The weekday accumulation profiles have been averaged to provide a typical weekday.

3.19 The results of the survey have been used to calculate the parking accumulation profile of the existing development, which can be seen in **Plate 3.3** below.

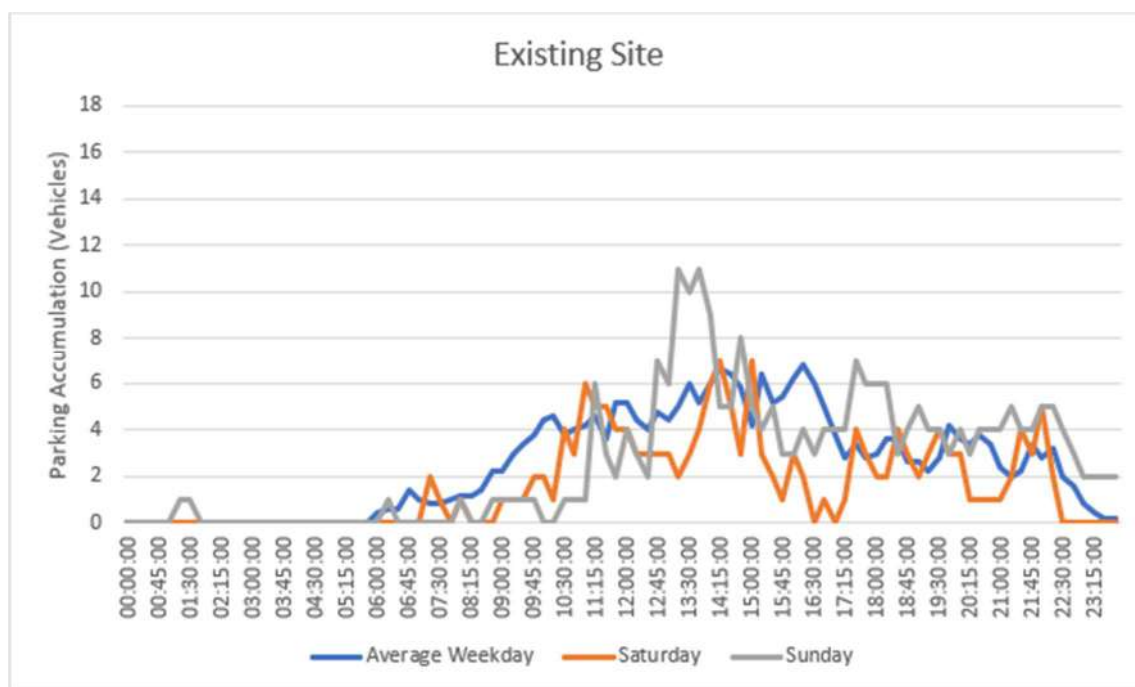

Plate 3.3: Existing parking demand

3.20 As demonstrated above, the maximum parking demand at any one time was 11 vehicles recorded around 13:30 to 14:15 on a Sunday. The maximum number of vehicles recorded on site during the busiest weekday was 7.

3.21 In order to calculate total existing demand, the number of cars has been factored up from the 92.3% occupancy at the time of the survey to replicate 100% occupancy. This predicted demand is shown in **Plate 3.4** below.

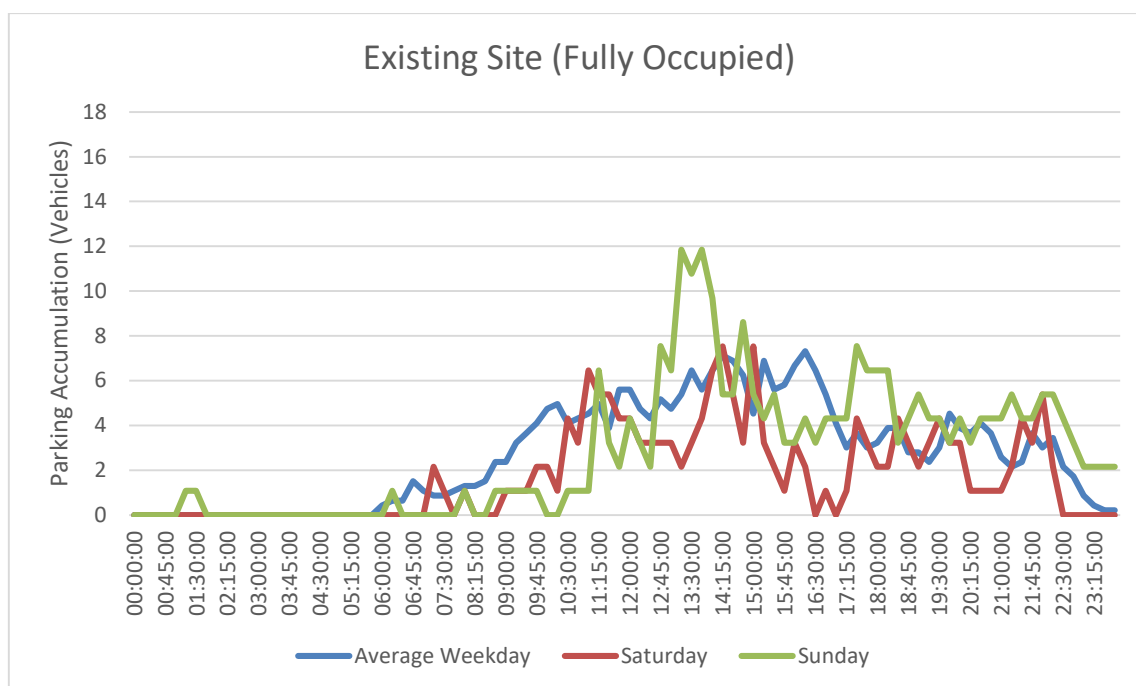

Plate 3.4: Existing (100% Occupancy) parking demand

3.22 To determine the parking requirements for the proposed development, the parking demand of the existing site has been increase pro-rata with the proposed maximum increase in floor area (i.e. a 44% uplift if mezzanines in the potential future scenario are included). The predicted future parking demand of the site is shown in **Plate 3.5 below**.

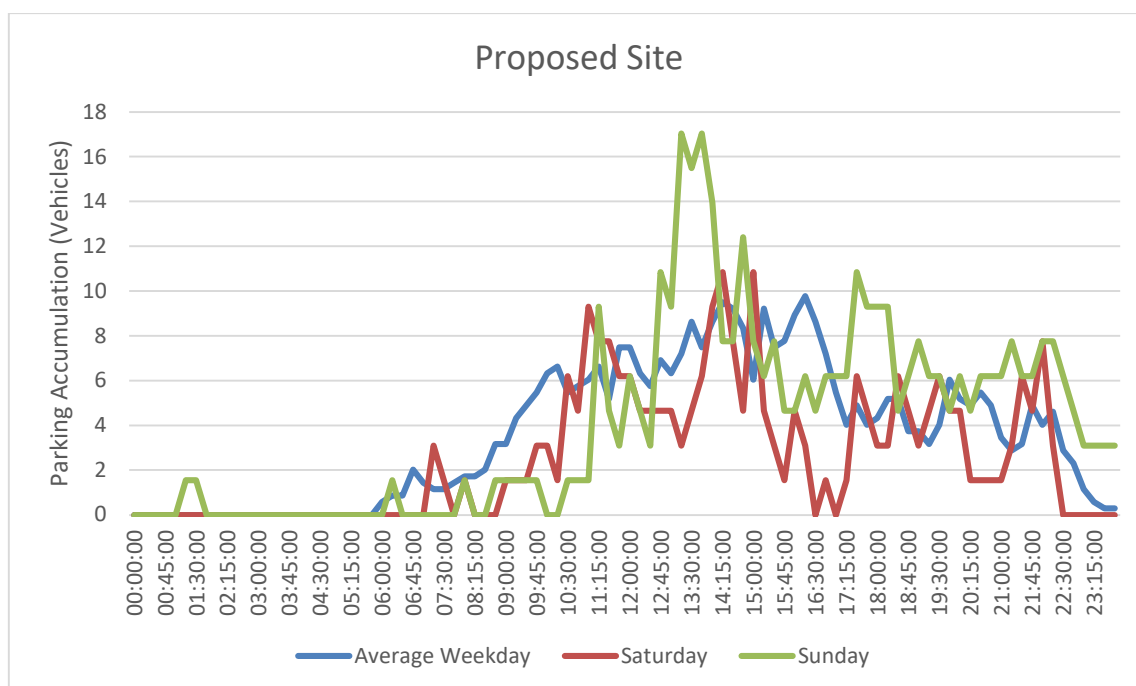

Plate 3.5: Predicted future parking demand

3.23 As demonstrated above, the maximum parking demand at any one time is expected to be 17 vehicles around 13:30 to 14:15 on a Sunday. The maximum number of vehicles expected during the average weekday is 10.

3.24 The 20 spaces proposed on site is therefore considered sufficient to accommodate all parking needs of the proposed development. The spare capacity on site would also allow larger vehicles to take up multiple spaces to unload in the unlikely event they are required, even during peak times, and if required larger vehicles can wait on the road with suitable space for a vehicle to pass available.

Cycle Parking

3.25 The cycle parking standards applicable to the proposed development are also found in the adopted LBH Local Plan Development Management Development Plan Document (January 2020).

- 3.26 Policy DMT 6: Vehicle Parking of the adopted LBH Development Plan states the following:

"Development proposals must comply with the parking standards outlined in Appendix C Table 1 in order to facilitate sustainable development and address issues relating to congestion and amenity"

- 3.27 The cycle parking standards for the borough are contained within Appendix C of the Local Plan. The minimum standards for the borough are detailed below in **Plate 3.1** below.

(b) B2 – B8 (General Industry storage and distribution)

1 per 500

Plate 3.2: LBH Minimum Cycle Parking Standards

- 3.28 Based on the above, the standards would expect a minimum of 24 spaces ($11,770 \div 500 = 24$).

- 3.29 Table 10.2 of the London Plan 2021 provides minimum parking standards for B2 / B8 developments. An extract of Table 10.2 showing the cycle parking standards for B2 / B8 uses is provided in **Plate 3.3** below.

Use Class		Long-stay (e.g. for residents or employees)	Short-stay (e.g. for visitors or customers)
B2-B8	general industrial, storage or distribution	1 space per 500 sqm (GEA)	1 space per 1000 sqm (GEA)

Plate 3.3: London Plan 2021 Minimum Cycle Parking Standards

- 3.30 Based on the above, the standards would expect a minimum of 13 long-stay cycle parking spaces ($11,770 \div 500 = 24$) and a minimum of 12 short-stay cycle parking spaces ($11,770 \div 1000 = 12$).

- 3.31 The proposed development provides a total of 36 cycle parking spaces, as 24 long stay spaces and 12 short stay spaces. The proposals therefore accord with London Plan standards. Furthermore, of the 10 short stay spaces 2 cargo bike spaces are provided to encourage sustainable transport of goods.

4.0 TRAFFIC ASSESSMENT

Introduction

- 4.1 This section of the report provides details of the traffic assessment of the proposed development.
- 4.2 A survey of the existing self-storage site was undertaken between 01/07/22 and 08/07/22 which recorded all vehicles accessing / egressing the site classified by vehicle type. This data has been utilised to detail the existing trip attraction of the site but has also been factored to detail the likely trip attraction of the proposed extension (and total site).

Existing Site Trip Attraction

- 4.3 The site currently comprises 8,180sqm GIA of floor space. The survey referred to above captures arrivals and departures each hour for 7 days. The average arrivals / departures during the typical network peak are detailed in **Table 4.1** below.

Table 4.1: Existing Development Vehicular Trip Generation

	Weekday AM peak period (08:00-09:00) – Two-way trips						
	Cars	LGV	OGV1	OGV2	PSV	M/B	Cyc
Total Existing Trips (8,180sqm - B8)	1	1	0	0	0	0	0
	Weekday PM peak period (17:00-18:00) – Two-way trips						
	Cars	LGV	OGV1	OGV2	PSV	M/B	Cyc
Total Existing Trips (8,180sqm - B8)	5	5	0	0	0	0	0

- 4.4 As demonstrated in Table 4.1 above, the existing site generates 2 two-way vehicular movements in the AM peak and 10 two-way vehicular movements in the PM peak.

Proposed Development Trip Attraction

- 4.5 The proposed development could provide up to a total Gross Internal Area (GIA) of 11,770sq.m if mezzanines are included in a future scenario. Trip attraction has therefore been calculated based on this higher figure, which results in an increase of 3,590sqm compared to the existing scenario.
- 4.6 The trip attraction detailed in **Table 4.1** have been factored up by a calculation factor of 1.44 to reflect the increase in floorspace. The predicted development trips are detailed in **Table 4.2** below.

Table 4.2: Proposed Development Trip Rates

	Weekday AM peak period (08:00-09:00) – Two-way trips						Cyc
	Cars	LGV	OGV1	OGV2	PSV	M/B	
Total Existing Trips (11,770sqm - B8)	1	1	0	0	0	0	0
	Weekday PM peak period (17:00-18:00) – Two-way trips						Cyc
	Cars	LGV	OGV1	OGV2	PSV	M/B	
Total Existing Trips (11,770sqm - B8)	7	7	0	0	0	0	0

- 4.7 It should be noted that the above calculations will include some grouped trips involving public transport into the pedestrian category, with some visitors to the site completing the last leg of their otherwise public-transport based journey on foot.
- 4.8 The proposed development is expected to attract a total of 2 two-way vehicular trips in the AM peak and 14 two-way trips in the PM peak which will have a negligible impact on the operation of the local network.
- 4.9 **Table 3.3** below details the net change in vehicular trips as a result of the development (two-way trips).

Table 4.3: Net Change in Vehicular Trip Generation

	AM Peak Period 0800-0900	PM Peak Period 1700-1800
Existing Site Vehicular Movements	1	10
Proposed Development	1	14
Difference	0	+4

- 4.10 **Table 4.3** demonstrates that the difference in vehicular trips between the existing and proposed uses is negligible with an increase of 0 vehicles in the AM peak and an increase of 4 vehicles during the PM peak. The impact of the proposals on the local highway network is therefore considered negligible. Given the nature of the site, the impact on bus, train, cycle and pedestrian infrastructure is also likely to be negligible.

5.0 SUMMARY AND CONCLUSIONS

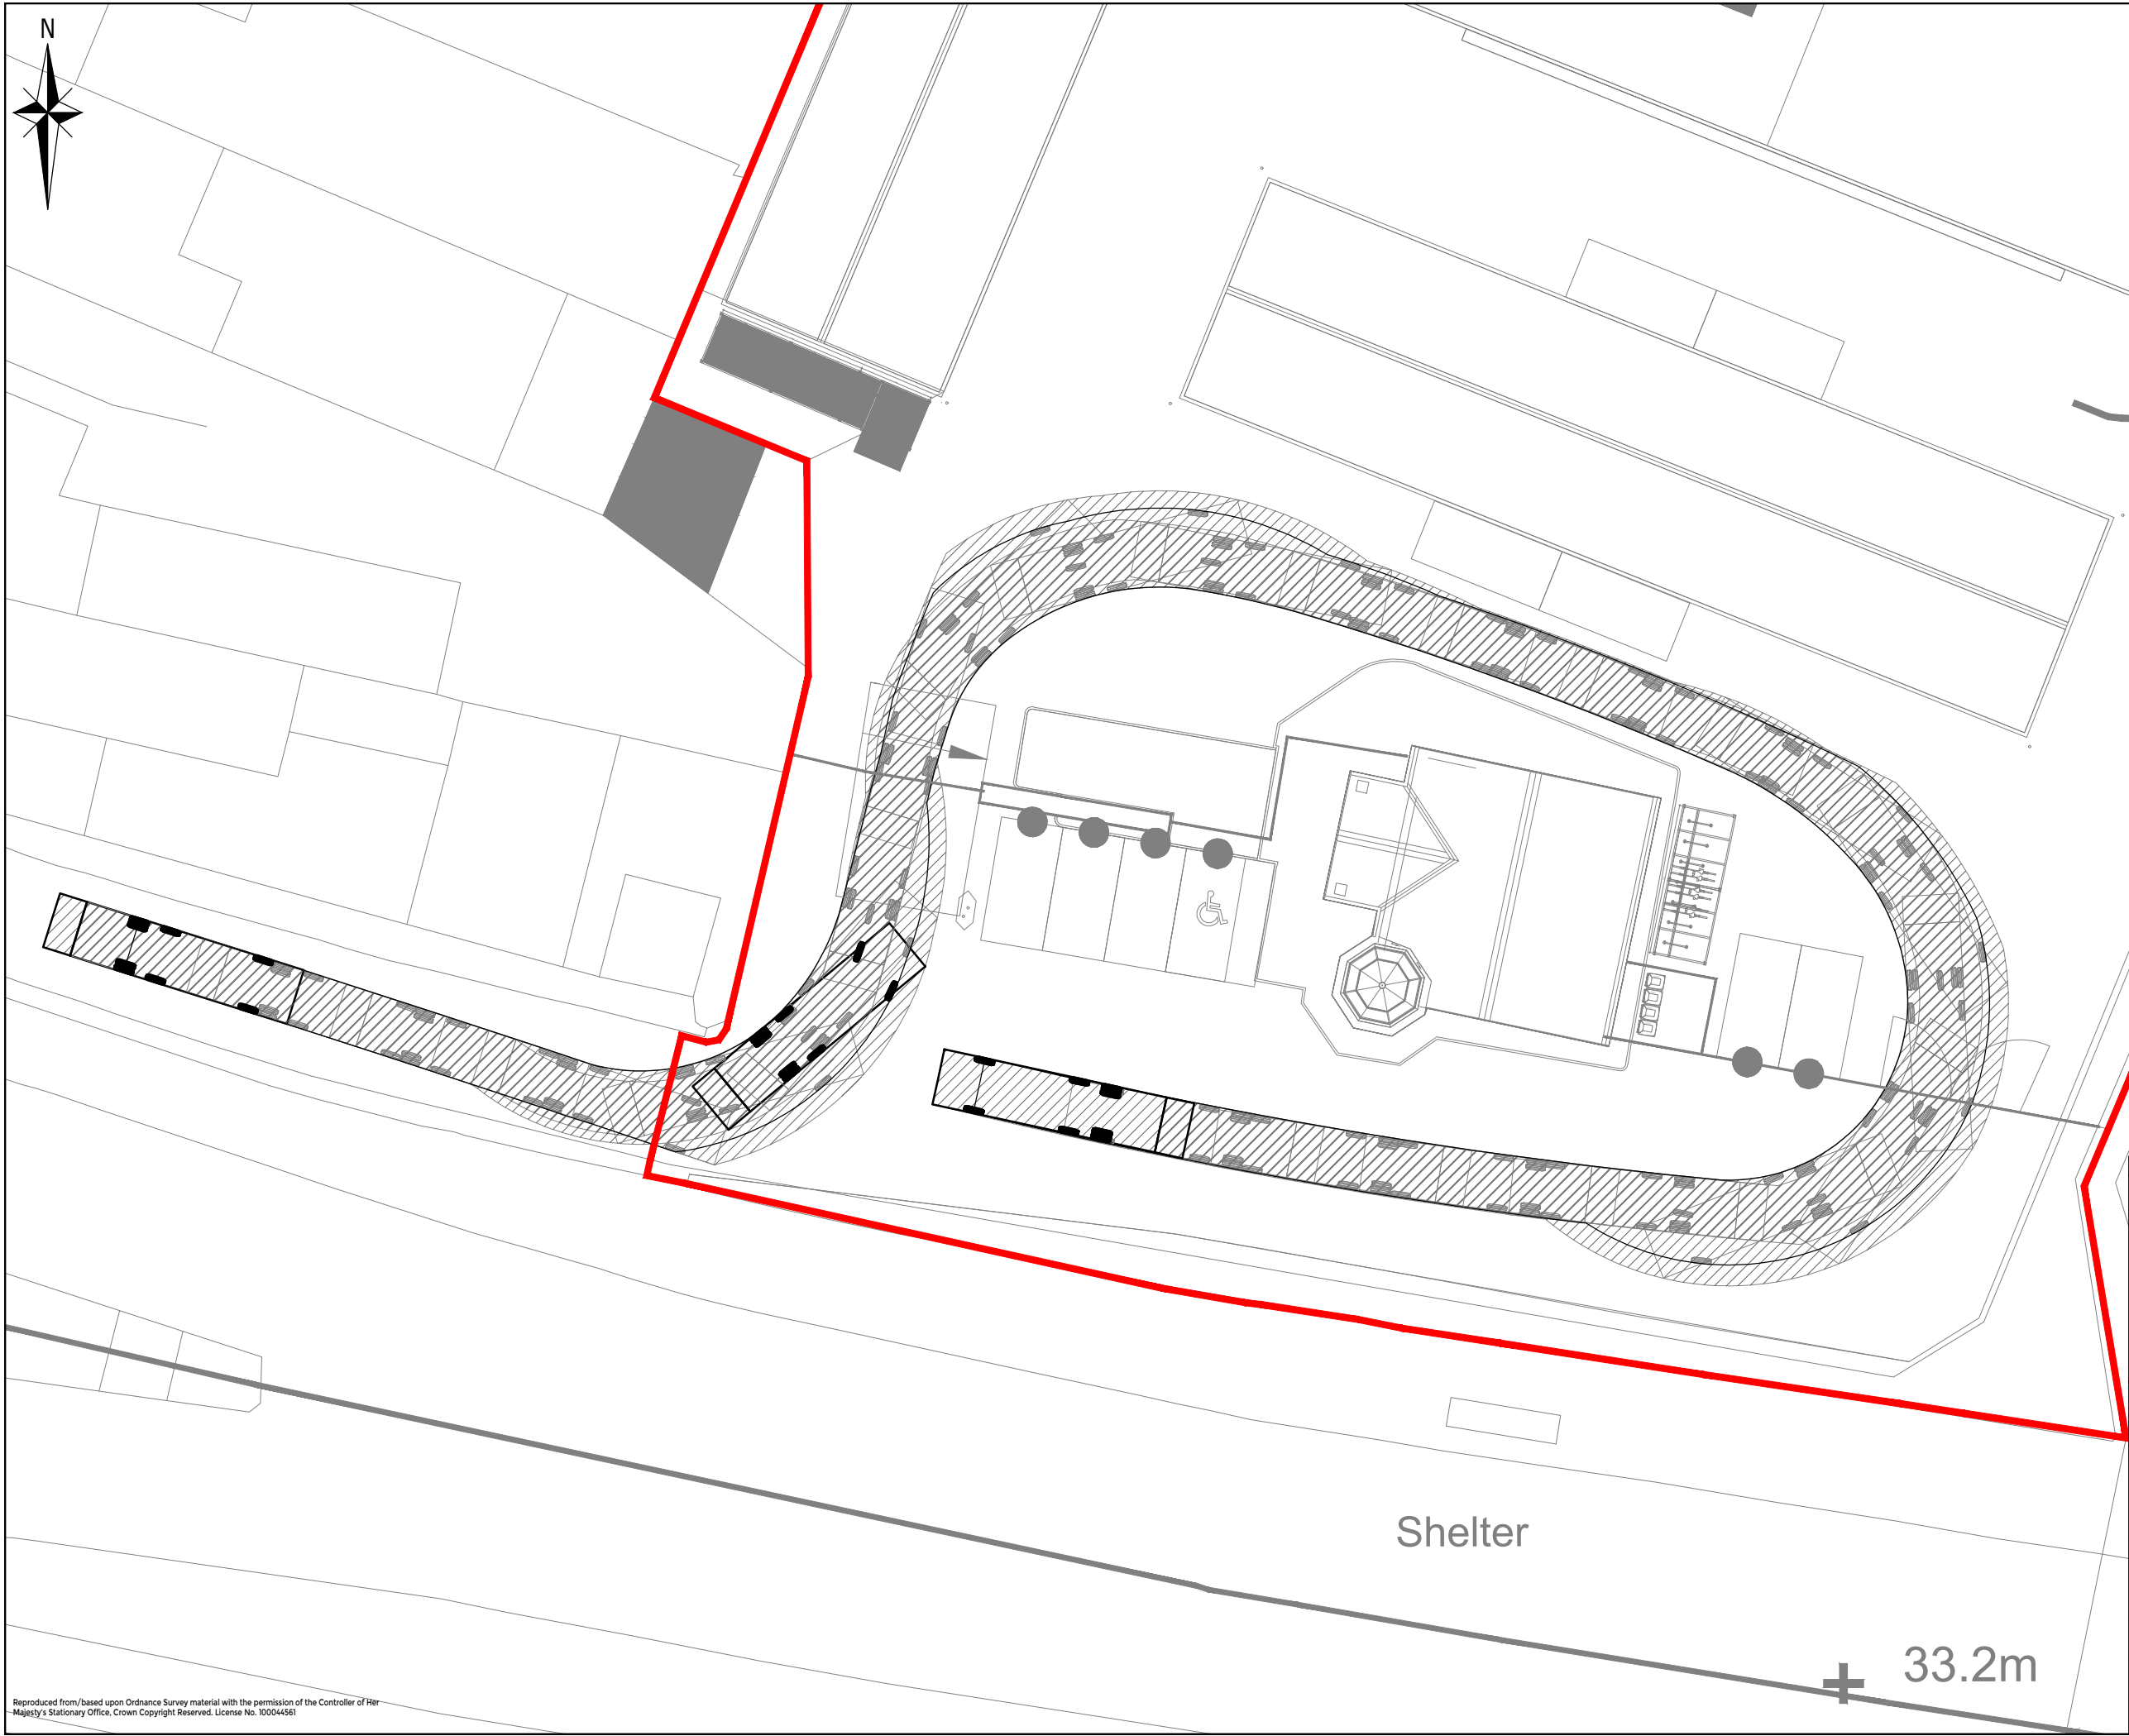

Summary

- 5.1 Ardent Consulting Engineers has been appointed by Shurgard UK LTD to advise on the highways/transportation and infrastructure planning/engineering aspects of the proposals for an extension of the existing Shurgard self-storage facility at Uxbridge Road, Hayes in the London Borough of Hillingdon.
- 5.2 The site is within walking distance of a range of facilities and residential population, as well as numerous public transport services. Whilst many site users will need to travel to/from the site using a vehicle owing to the nature of the site, a substantial number of visitors, including staff, will be able to travel to the site via non-car modes of transport.
- 5.3 The layout of the proposed development accords with local car and cycle parking standards.
- 5.4 A trip assessment of the site, based on data from the existing Shurgard site shows that the potential trip attraction of the proposed extension is negligible, especially when compared to the existing uses on site.

Conclusion

- 5.5 The results of the above highlight that the proposed development does not have a severe impact on the local network and is acceptable from a highways perspective.
