To whom it may concern,

I am writing with regards to the above address, we visited the property on Tuesday 6th February to view an Ash Tree in the residents front garden.

On examination of the tree it is highly evident that the tree is decayed through from the bottom all the way through to the top through the middle of the tree. The tree is completely hollow with a diameter of approx 12-15inches .

The tree is leaning over a garage building and a house and should there be any severe winds there is a risk of the tree falling and causing severe damage.

I trust that this information is helpful and should you require any further information please reply to this email or call the office on 01296 624669.

Kind regards
