You don't often get email from alec.stanev@lichfields.uk. [Learn why this is important](#)

Hi Christos,

Hope all is well.

We have now discussed the below with IAG Cargo.

As noted in our submission, the current site area is used as an informal parking area for airside vehicles. To confirm, there are no fixed parking areas or painted spaces within the site. The area is currently used to sporadically park airside dollies (trailers) (see photograph below). The area is under-utilised and vacant most of the time. As such, there will be no significant offset of vehicle parking.

To directly answer your queries:

1. No vehicles are currently parked in the site area, however it is used for occasional parking of airside trailers, up to a maximum of c.10 trailers. Satellite imagery (Google Earth, etc.) confirms the site is poorly utilised.
2. Upon construction of the proposed structure, there will no longer be any access for trailers to the site. Instead, they will be parked elsewhere within the wider IAG Cargo campus (i.e. within an operationally safe and functional location). Trailers are also stackable to save space if required.

We trust that the above addresses your queries but please let us know if you require any further information.

We also note that the consultation period for this application expires today (8 September). Please can you advise whether you are awaiting any further consultee comments, and whether we can anticipate the decision to be issued soon?

Look forward to hearing back from you.

Kind regards,
Alec

CAUTION: This email originated from an external source.
Hi Alec

Please could you outline:

- How many vehicles are currently parked within the proposed site boundary
- Where the displaced vehicles will be relocated to

Kind regards

Christos Chrysanthou
