The Contractor is to check all dimensions on site and report any discrepancies to the Contract Administrator. This drawing is to be read in conjunction with all other standard documentation. Dimensions are not to be sealed from this drawing.

PROPOSED REAR ELEVATION

PROPOSED SIDE ELEVATIONS

## GENERAL NOTES

This drawing is for Building Regulation submission only, NOT a working drawing. Contractor to take all relevant site dimensions, levels, drainage runs and inverts prior to starting work.

Any construction work carried out prior to receiving all necessary approvals for planning and /or building regulations is entirely at the householders / clients risk.

It is the builder's responsibility to investigate the ground conditions and to identify all services before work commences. All building work to be completed to the satisfaction of the local authority building control officer and in accordance with the current building regulations and as such additional unforeseen building works may be required on site. Client to be aware of responsibilities under Party Wall Act and to obtain written approval for work affecting boundary wall.

Contractor to carry out work in a safe and proper manner with due care for health and safety of operatives. Contractor is to allow for keeping the site clean and tidy and removing debris from the site during and on completion of the works. Allow for liaison with sub-contractors during the course of the work. Include for all new and additional electrical and heating works required. Contractor is to visit the site to familiarise himself with the access to the site especially for the delivery of materials, plant and equipment etc.

Contractor is to include for dust sheets, scaffolding, screens etc and provide the necessary protection to existing fittings and finishes in the property during the course of the works. The client will be living in the property during the course of the works and the contractor is to allow for this in the tender and provide a work sequence programme prior to work commencing so that necessary arrangements can be made to minimise disruption. Contractor is to allow for keeping the site clean and tidy and removing debris from the site during and on completion of the works. Allow for liaison with specialists and sub-contractors during the course of the work. Include for all new and additional electrical and heating works required. Contractor is to visit the site to familiarise himself with the access to the site especially for the delivery of materials, plant and equipment etc.
