Details of the pre-application advice received

Summary of the pre-application advice:

Design:

- Side extensions could be acceptable if 1m distance is maintained between the building and side boundaries on both sides. (This has now been included within the proposal).
- It has been acknowledged that existing south side utility room extension could be rebuilt within the same footprint.
- It is recommended that the side dormer is reduced in size, similar to that of a neighbouring designs, which were approved after the adoption of the current Local Plan. (This has now been included within the proposal).
- Raising the roof in line with neighbouring properties appears likely to be supported by the Council.
- First floor roof extension to the rear - a modest first floor roof extension could be acceptable, however the impact on neighbouring amenities would need to be assessed.
- Rear extension height - it is advisable to reduce the height of the extension. (The roof of rear extension has been re-designed to match the neighbouring extensions parapet line).
- Rear extension depth - the proposed depth does not follow guidelines however, given the location of the existing rear garage the neighbours (no.12) amenities would not be worst than existing. (The new extension depth matches the depth of the neighbouring (no.16) canopy structure. It has been partially reduced with a canopy overhang, which has been subsequently discussed with and supported by the neighbouring property owners).

Amenities:

- Given the gap between dwellings and the existence of the detached garage in the rear garden, it is considered the proposal is unlikely to result in substantial harm to the amenities of the occupiers at No.12, in terms of overdominance, visual intrusion, overbearing impact, loss of daylight/sunlight and loss of outlook.
- Subject to amendments suggested in the Design section of this report (removal of left side extension and reduction in rear extension and size of side dormer), the proposal is considered unlikely to result in substantial harm to the amenities of the occupiers at no.16, in terms of overdominance, visual intrusion, overbearing impact, loss of daylight/sunlight and loss of outlook.

Other:

- In critical Drainage Area a suitable drainage system (SuDS) should be included with any future application to manage surface water on site. It has been advised that a water butt should be incorporated to minimise water from site entering sewers. (Refer to Proposed Site Plan for location).

Private amenity space:

- A sufficient amount of amenity space will be retained.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
