**6163 Yiewsley – Flood Risk Statement**

Dear Sir/Madam,

At our Tesco Superstore - High St, Trout Road Yiewsley, West Drayton, London UB7 7FP United Kingdom to support the operations we are proposing the below:

- 18x Belisha Beacons

The installation of these Belisha Beacons is intended to support the operations of the superstore, enhancing safety and accessibility for our customers and staff alike.

While the site is situated in an area classified as having a medium flood risk (Flood Zone 2) from rivers and the sea, it's important to note that the proposed installation will not affect any permeable surfaces that could exacerbate flood risk factors in the vicinity.

The proposed installation will be carried out under controlled and safe conditions, overseen by a designated Project Principal Designer. Throughout the process, careful consideration will be given to minimizing any potential disruptions to access for colleagues and deliveries, ensuring operational continuity with the least possible impact.

Kind Regards

Andy Horwood
