

## **PURE CARE LOGDE LTD**

### **TRAVEL PLAN**

#### **Introduction**

This Travel Plan sets out how Pure Care Lodge will manage transport to and from its children's home in Hillingdon. The aim is to minimise traffic and parking impacts on the local neighbourhood, while ensuring safe, sustainable, and accessible transport for children, staff, and visitors.

The home will accommodate up to three children with learning disabilities, autism, ADHD, and behavioural challenges. Staffing will consist of up to three team members on duty at any given time, with a night shift pattern ensuring two staff remain awake and available throughout the night. A single dedicated vehicle will be used for essential operational needs. For all service user outings, two staff members will accompany and support the itinerary to ensure safety and engagement.

### **Existing Sustainable Travel Options**

#### **Walking & Cycling**

Safe pavements, well-lit streets, local parks encourage walking and cycling. Children will be accompanied by staff for all journeys outside the home unless independence is part of their care plan.

#### **Public Transport**

Frequent buses and nearby stations mean staff can commute without cars. Children will be encouraged to use buses/trains safely, with travel cards provided if appropriate.

#### **Dedicated Vehicle**

The home will operate one insured staff vehicle for:

School runs and appointments

Supervised outings

Shift changeovers (via car share)

Shopping for the home

### **Managing Travel**

Recruitment will prioritise staff who live locally, encouraging walking, cycling, or bus use. A car-share rota will be used to reduce staff commuting impacts.

#### **Visitors**

Scheduled in advance to avoid peak hours (e.g. social workers, therapists, family visits). Driveway has sufficient capacity for visitors at any time.

#### **Children's Transport**

No residents will hold driving licences. Transport for school, health, or activities will be managed via the home's shared vehicle, walking, or public transport. Taxis may be used but only with staff escorts.

The home's convenient location near bus routes and safe walking paths reduces the need for staff and visitors to rely on private cars. This setting naturally supports the use of more sustainable, eco-friendly travel options.

Pure Care Lodge prioritises recruiting trained and vetted local staff who live close enough to either walk or take public transport to the home. To limit unnecessary car use, a structured car-sharing arrangement will also be introduced. This scheme will make use of the home's dedicated vehicle, enabling staff to travel together for shift changes and journeys to and from their own residences.

The designated home vehicle will have capacity for at least four passengers and will be fully insured, with driving limited to authorised and qualified staff. Its use will be restricted to essential purposes, including:

- Staff handovers and changeovers.
- Transporting children to school, medical appointments, and outings.
- Shopping for the household.
- Attending business-related meetings.

### **Alternative Modes of Transport**

Walking encouraged for short local trips (shops, parks, GP)  
Cycling promoted through provision of secure storage and safe route planning  
Public transport supported with pre-loaded Oyster/travel cards  
Community engagement, access to local youth centres, libraries, and sports facilities using sustainable transport

### **Conclusion**

The Pure Care Lodge Travel Plan aligns with Hillingdon's Local Plan and SEND Strategy by promoting sustainable travel and reducing car dependency. With a focus on walking, cycling, and public transport, and the controlled use of a single dedicated vehicle, the plan ensures:

- Minimal disruption to neighbours
- Safe, accessible travel for children and staff
- Positive environmental and community impact

The home will monitor travel arrangements annually as part of Ofsted compliance and update this plan where required.
