

Understanding EnviroRail® Railings

Twist Cleats

Twist Cleats are used to secure the rails to the posts.

Intermediate Posts

These are used to hang the ends of the fencing panel.

Top Rail

Lasered with stars, designed for the infill to pass through (flat top is one sided)

Mid Rail

Only for panels 2.0 and 2.4m in height

Railing Support Leg

These are used to help hold the weight of the panel and are concreted into the ground

Bottom Rail

Lasered with stars on one side, designed for the infill to seat into the rail and completed with drainage cut outs and holes for support legs
