

This architectural drawing shows the front elevation of a house. The roof is covered in shingles and features a chimney on the right side. There are two small square windows on the roof. The main body of the house has a large multi-paned window on the right and a smaller multi-paned window on the left. A door with a small arched window is located on the left side of the house. The drawing is a line art illustration with a light gray background.

TO MATCH THE EXISTING

This architectural drawing shows a side elevation of a building. The roof is filled with diagonal hatching and features a dashed line indicating a ridge or internal structure. Two chimneys are visible on the roofline. The building has a multi-story structure with a prominent vertical section on the right side containing two windows. A dashed line extends from the ground level up to the roofline on the left side, possibly indicating a structural break or a specific measurement point.

The diagram illustrates a cross-section of a building's roof and wall assembly. The roof is gabled, with rafters supporting a top layer of insulation (hatched with diagonal lines) and a bottom layer of insulation (hatched with horizontal lines). Two chimneys are shown, one on each side of the roof. The wall assembly includes a brick chimney, a brick wall, and a concrete foundation. The diagram is labeled with 'a' and 'b' at the bottom.
