GENERAL NOTES:
Any dimensions shown are indicative only and are subject to verification on site. The contractor to set out, check and co-ordinate all dimensions on site during the course of the works and prior to setting out on site. This drawing to be read in conjunction with all other Architect's and Engineer's drawings, Structural Engineers' calculations and any specialist supplier's drawings.
For the contractor, building control and the homeowner is responsible and should:-
1. Ensure that all working drawings and calculations are completed, approved by Building Control or Planning Departments & that they are the current revised drawings before any works start on site.
2. Inform the Building control department that the works are about to commence on site after receiving an approved decision from planning / building control on building your proposed works.
3. Verify boundary lines & ground conditions including, checking utility and other services of all gas, electrical, water & other services drainage act. within the site prior to the commencement of excavations. Owner is responsible for establishing own boundary lines as DPL are not responsible for checking land ownership even if drawings have been approved by the planning and building control departments. If uncertain a land search should be carried out by the homeowner/contractor.
4. DPL are not responsible for builders changing design methods from proposed works. The client is responsible for works being carried out on a building notice. No project should start without calc's.
5. Owner is responsible for purchasing additional materials and covering extra engineering design costs for any additional structural design change on site from the start to end of building works requested by building control or any other third party's instruction during building works.
6. Request a copy of the Party Wall Award where works affect party wall or involve excavations within 3 meters of adjoining buildings or building over a public sewer. (clients responsibility)

7. Where works involve demolition to ensure that all elements of the building and adjoining structures are accounted for and that all necessary propping and temporary supports are in place. "do not scale off this drawing as the scaling may be off"
8. Works carried out under a building notice or prior to approval of drawings are at the contractors/owners risk. (all DPL drawings must be approved before works commence) Builders building without plans being approved by planning & building control departments are fully responsible for the likelihood of condemned works.
9. Any discrepancies, either between written and site dimensions or between this drawing and other consultant's or suppliers drawings, should be brought to the immediate attention of DPL before executing the works. drainage, mechanical and electrical works. This includes type of materials, if materials are to be delivered on site which is on site then this will need to be brought to DPL attention straight away before works commence and purchase of materials is made so an alternative design can be rechecked and approved by building control or the engineer before works can commence.
10. All of DPL structural designs are subject to footings being 1m deep, if however the existing foundation is different a trial-hole will need to be dug to establish the existing foundation type and building control will need to advise on a different method of construction. If requested by the contractor, site engineer or building control, this will need to be designed by an engineer with an addendum cost being implemented.
11. All wall/s which have been designed to be removed on plans are to be checked on site by building control/inspector/builder for load bearing or non-load bearing status before purchase of steel/a. If non-load bearing then steel/s should not be ordered. No refund or claim can be given against DPL on the design/materials charged for these steel/a.

OTHER NOTES:
All new proposed roof and wall finishes on this drawing to match existing materials. All new proposed skylights shown on this drawing will be designed not protrude more than 150mm from the existing roof profile. All new proposed windows shown on this drawing which overlook other property's are designed to be non opening and of obscure glazing. For a permitted development loft design the dormer designed on this drawing is set back from the eaves by 300mm. This note is a confirmation that it is designed this way. All works to be carried out in accordance with the latest appropriate codes of practice and to comply with current building regulations.
An inspection of the underground drainage was not possible on survey. Contractor should check drainage runs from ground level up to starting work on site and notify building control of results. ALL DRAINAGE SHOWN IS ASSUMED AND MUST BE VERIFIED BY CONTRACTOR.
