

SCHARTEC Wheelie Bin Store in Wood Design for 3 Bins

SMB1-3 Wheelie Bin Box 240 L with Automatic Lid – Triple Version

Pre-drilled side panels allow you to connect multiple bin stores together to create a larger unit if needed. The bin store is equipped with a practical automatic lid system featuring gas struts, a soft-close mechanism and slow lowering for near-silent closing. This allows you to dispose of your household waste easily and conveniently with just one hand.

Triple Metal Wheelie Bin Store – Galvanised with Wood Design for Your Entrance Area

The bin store is made from high-quality galvanised steel, ensuring strength and long-lasting durability. Ventilation slots in the doors provide effective airflow and a contemporary design. A front door allows easy access for loading and unloading your bins. The lockable handle is discreetly integrated to enhance security and maintain a clean look.

The Schartec SMB1-3 can be extended with additional modules and is also available as a single, double or 4-bin store.
